Overview

This 2011 edition of Publication 6149 (Calendar Year Return Projections by State) provides state level forecasts of the number of tax returns to be filed in calendar years (CY) 2011 to 2018 by major form type and medium of filing. Internal Revenue Service (IRS) staff from the Office of Research, Analysis, and Statistics prepares these projections annually to reflect changes in filing patterns, economic and demographic trends, legislative requirements and IRS administrative processes. These forecasts are primarily used for resource planning and analysis at the local level. Decisions about future workload realignment among the IRS processing campuses are made using these projections. This publication supplements the forecasts previously released in Calendar Year Projections of Individual Returns By Major Processing Categories, Publication 6187 (Rev. 9-2011) and Calendar Year Return Projections for the United States and IRS Campuses, Publication 6186 (Rev. 10-2011). Discussion of the major trends, the legislative and administrative initiatives embedded in the projections, and other important caveats about these forecasts can be found in those other publications.

These publications are available via the IRS website (www.irs.gov) as referenced in the inside front cover. The projections presented in this publication are based on various forecasting methodologies including regression models, time series techniques, growth rates and historical ratio methods. The projection method employed depends upon the form type, the availability of historical data and applicability of relevant economic and demographic forecasts. Typically, returns are forecasted first for the United States. States are forecasted next and adjusted to the U.S. control totals.

Data Sources and Projection Methodology

The reported actual volumes of returns filed in CY 2010 are based on returns processed and recorded on the IRS master files. With a few exceptions, these volumes are based on the same master file reporting systems as those used in the Internal Revenue Service Data Book (Publication 55B). However, master file counts were not available in a few instances. In these cases, tallies of actual filings were provided by program staff in the IRS operating divisions, typically from data capture systems located in the IRS processing campuses.

The forecasts presented in Publication 6149 are based on various statistical models that capture and extrapolate historical filing trends by each unique form type and medium of filing. Most models use time series extrapolation methods such as trended exponential smoothing approaches. However, some return types, particularly individual income tax filings, are based on regression models that use economic and demographic variables such as total employment and gross domestic product as key input factors. In these instances, forecasts of the economic and demographic data series used as the predictor variables are provided by IHS Global Insight (USA), Inc. Also, where historical data are limited or non-existent, such as for new e-file products, the filing pattern for a comparable return type is applied.

Impact of Recent Legislative and Administrative Changes

As noted, the effects of enacted legislation and administrative plans are embedded in these projections. The more significant of these changes is discussed below.

E-file Mandate

An e-file mandate on tax return preparers was introduced under the Worker, Homeowner, and Business Assistance Act, which was signed into law in November 2009. The act requires preparers who expect to file more than ten individual tax returns (including forms 1040, 1040A, 1040EZ, and 1041) to file them electronically beginning in CY 2011. The current phase-in plan require preparers to electronically file tax returns starting in CY 2011 if they expect to file more than 100 individual tax returns. The threshold drops to more than ten returns for the CY 2012 processing year. The projections in this update include an analysis of the current information available on the IRS implementation and communication plans.

Changes in Estate Tax

Enacted in December 2010, the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 reinstated the estate tax for persons who died in 2010. Furthermore, for a death in 2011 or 2012, the estate tax exclusion amount is $5 million and the highest marginal federal estate tax rate is 35 percent. Under the current law, as of January 1, 2013, the generation-skipping tax rate is scheduled to revert to 55 percent, which is the pre-2001 rate. In addition, the generation-skipping tax exemption is scheduled to drop to approximately $1.4 million. Beginning this year, the unused estate tax exemption of a spouse becomes “portable,” as taxpayers can now claim a spouse’s unused exemption on Form 706. The filing volume of Form 706 is expected to increase, since some estates will file in order to take advantage of the exemption’s portability, even though they are not otherwise required to file. Analysts using these data are advised to monitor legislation in this area.

Changes in Form 990 series

The IRS has revised the filing requirements to file Form 990 series starting with tax year 2008 returns. Filers will be able to file the Form 990-EZ in lieu of the Form 990 if they meet the new filing requirements. For tax year 2008, organizations with gross receipts less than $1.0 million and total assets less than $2.5 million may file the Form 990-EZ. For the 2009 tax year, organizations with gross receipts less than $500,000 and total assets less than $1.25 million may file the Form 990-EZ. The Form 990-EZ filing thresholds will be adjusted permanently to gross receipts less than $200,000 and total assets less than $500,000 beginning in tax year 2010.

Additional Discussion of Trends and Issues in Individual Income Tax Returns

In CY 2009, the share of total electronic volumes over the grand total was around 46 percent; in CY 2010, this share is estimated to be 49 percent and steadily increases to 57 percent in 2017. Individual income tax returns make up over half of the grand total return filings in any given year. In CY 2010, the share of individual Form 1040 series filed electronically is estimated to be around 70 percent and is forecasted to reach 80 percent by 2017. Elimination of the additional fees for electronically filing Federal tax returns by the two largest desktop tax preparation software developers in CY 2009 contributed to the increase in individual e-file in CY 2009. Refer to the 2010 update of IRS Publication 6187, Calendar Year Projections of Individual Returns by Major Processing Categories, for a more detailed discussion of trends and issues in individual income tax returns filings.

Track Record of Projection Accuracy

In an effort to measure the quality of our products and services, this section, along with Table 54, provides a brief analysis of the accuracy of prior projections. Using four years of actual data from 2007 through 2010, Table 54 presents the accuracy of our national level projections by major return categories. This analysis covers only the major return categories projected on a calendar year basis and serves as a general measure for gauging the overall reliability of our U.S. level return projections. The return categories considered in Table 54 consist of the following: Grand Total, Total Primary Returns, Individual (income tax) Total, Individual Estimated Tax, Fiduciary, Partnership, Corporation, Employment, Exempt Organization, and Excise. When there was sufficient data on prior forecasts, selected breakouts were included of “paper” volumes versus “e-file/magnetic tape” filings.

The table presents two measures of projection accuracy; the mean absolute percent error (MAPE), and the number of over-projections. We also include the latest actual filing volumes for 2009 are included to provide perspective on the volume of returns being projected. The MAPE is computed as the average percent projection error regardless of whether they were over- or under- projections over the four most recently applicable projection cycles. The associated number of over-projections can show whether we consistently over- or under- project. A value of two indicates balanced forecasts over the four cycles. The table groups these two measures by time horizon. The time horizon is determined by when the forecast was made and for what future year. For example, a forecast for 2003 made in 2000 would be part of the “3-years-ahead” time horizon. The table presents time horizons from one to five years ahead and factors in the most current four 6 observations. As an example, for the “3-years-ahead” information, we use the forecasts made in 2001 for 2004, those made in 2002 for 2005, those made in 2003 for 2006, and those made in 2004 for 2007.

Comments and Questions

We thank our customers for their support as we continually seek to improve our products and services wherever possible. Comments and suggestions regarding this document can be directed to Michael Sebastiani, Chief, Forecasting and Data Analysis at (202)874-0831. Questions concerning a specific tax return listed in this document may also be directed to the projections staff listed on the inside front cover. Finally, the tables contained in this document are also available electronically, as noted on the inside front cover.

Table Notes

- Detail may not add to total due to rounding.

- Historical (actual) data for each state in this publication have been rounded to the nearest tenth while projected volumes have been rounded to the nearest hundredth; therefore projections of 9 or fewer and 49 or fewer, respectively, were rounded to zero. However, some forms can report zero filings because they are associated with only selected areas, or because their filing options were just established or recently eliminated.

- Actual and forecasted return counts for the major categories are based on IRS master file processing, as recorded in the electronic versions of the "Report of Returns Posted to the IRS Master Files."

Tables 1 ~ 53

- "Grand Total" is the sum of "Total Primary Returns" and "Supplemental Documents." The "Total Primary Returns" category is the sum of all forms shown on the tables, excluding "Supplemental Documents."

- "Individual, Total" is the sum of paper and electronic Forms 1040, 1040-A, 1040-EZ, 1040-NR, 1040-PR, and 1040-SS.

- "Forms 1040, 1040-A, and 1040-EZ" is the sum of paper and electronic Forms 1040, 1040-A, and 1040-EZ.

- The last category in the "Individual, Total" section includes the following: Form 1040-NR (U.S. Nonresident Alien Income Tax Return); Form 1040-PR (U.S. Self-Employment Tax Return--Puerto Rico); and Form 1040-SS (U.S. Self-Employment Tax Return--Puerto Rico, U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands [CNMI]). These forms are assigned to the International area.

- Various return categories, such as Form 1040-ES (Individual Estimated Tax) and other business and individual returns, include line items to account for alternative methods of tax filing (electronic and/or magnetic tape). However, due to space constraints most "paper only" breakouts were omitted in the states tables. The "paper only" components can be derived by subtracting the electronic and/or magnetic tape counts from their respective return totals.

- "Fiduciary, Form 1041, Total" includes both paper and electronic Form 1041.

- "Fiduciary Estimated Tax, Form 1041-ES" is the Estimated Income Tax for Estate and Trust.

- “Partnership, Forms 1065/1065-B, Total” includes both paper and electronic Forms1065 and 1065-B.

- “Corporation Income Tax, Total” includes Forms 1120/1120-A (paper and electronic), 1120-F (paper and electronic), 1120-FSC, 1120-H, 1120-L, 1120-ND, 1120-PC, 1120-REIT, 1120-RIC, 1120-S (paper and electronic), and 1120-SF. Form 1120-A, U.S. Corporation Short-Form Income Tax Return, is obsolete and can no longer be filed for tax years beginning after December 31, 2006. As a result of the Foreign Sales Corporation (FSC) Repeal and Extraterritorial Income Act of 2000 which repeals provisions in the U.S. Internal Revenue Code relating to taxation of foreign sales corporations, the volume of Forms 1120-FSC is declining.

- “Form 1120-C” is the U.S. Income Tax Return for Cooperative Associations. This form replaced Form 990-C starting from CY 2007.

- “Form 2553” is the Election (to file Form 1120-S) by a Small Business Corporation.

- “Form 1066” is the U.S. Real Estate Mortgage Investment Conduit (REMIC) Income Tax Return.

- “Estate, Total” includes Forms 706, 706-NA, 706-GS(D), and 706-GS(T).

- “Gift, Form 709” is the United States Gift (and Generation-Skipping Transfer) Tax Return.

- “Employment, Total” includes paper, magnetic tape and electronic Forms 940, 940-EZ, 940-PR, 941, 941-PR, 941-SS, 943, 943-PR, 943-SS, 944, 945, and CT-1. Form CT-2 is not included in “Employment, Total.”

- “Form 1042” is the Annual Withholding Tax Return for U.S. Source Income of Foreign Persons. This form is assigned to the International area. It is sometimes considered an employment tax return, but listed separately here.

- “Exempt Organizations, Total” includes Forms 990 (paper and electronic), 990-EZ (paper and electronic), 990-N (only available electronically starting from CY 2008), 990-PF (paper and electronic), 990-T, 4720, and 5227.

- “Government Entities/Bonds, Total” includes Forms 8038, 8038-B, 8038-CP, 8038-G, 8038-GC, 8038-T, 8030-TC, and 8328.
