NOTES

* Indicates estimate is subject to high sampling variability and should therefore be used with caution.

** In order to avoid showing estimates based on too few sample returns, these data have been combined with the data in the next lower asset size class.

*** In order to avoid showing estimates based on too few sample returns, the estimate has been suppressed. Data are included in the appropriate totals.

✓ Includes data from the next higher size class(es)

(-0)Less than $500 per return.

1. Income year 1972 covers corporation accounting periods ended July 1972 through June 1973.

2. Constructive taxable income from related foreign corporations includes "Includable income of Controlled Foreign Corporations" and "Foreign dividend gross-up" (the equivalent of foreign taxes deemed paid by related foreign corporations in developed countries on the profits from which dividends were distributed).

3. Net income (less deficit) equals Total receipts less total deductions less Interest on State and local Government obligations plus Constructive taxable income from related foreign corporations.

4. Income subject to tax

For most corporations, income subject to tax consisted of net income less statutory special deductions. However, certain of these deductions (a) could exceed net income resulting in no income subject to tax and (b) could occur on returns without net income and therefore without income subject to tax. Other exceptions applied to life insurance companies, regulated investment companies, real estate investment trusts, and to Small Business Corporations electing to have net income taxed through shareholders. See "Income subject to tax" in Explanation of Terms, STATISTICS OF INCOME--1972, CORPORATION INCOME TAX RETURNS.

5. Cost of property used for investment credit and Investment qualified for credit include, respectively, $558.9 million and $447.2 million reported on Form 1120S, Small Business Corporation Income Tax Returns. These amounts were allocated by Small Business Corporations to their shareholders for use in computing their investment credit.

6. For 1972, statistics for Offices of dentists and dental surgeons, formerly included in Other medical services, are shown separately.

7. See the report STATISTICS OF INCOME--1972, CORPORATION INCOME TAX RETURNS, for a discussion of these statistics including:

Changes in law
Description of the sample and limitations of the data
Explanation of terms
Facsimiles of corporation incom. tax return forms, 1972

8. The report may be obtained from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

NOTES

* Indicates estimate is subject to high sampling variability and should therefore be used with caution.

** In order to avoid showing estimates based on too few sample returns, these data have been combined with the data in the next lower asset size class.

*** In order to avoid showing estimates based on too few sample returns, the estimate has been suppressed. Data are included in the appropriate totals.

✓ Includes data from the next higher size class(es)

(-0) Less than $500 per return.

1. Income year 1972 covers corporation accounting periods ended July 1972 through June 1973.

2. Constructive taxable income from related foreign corporations includes "Includable income of Controlled Foreign Corporations" and "Foreign dividend gross-up" (the equivalent of foreign taxes deemed paid by related foreign corporations in developed countries on the profits from which dividends were distributed).

3. Net income (less deficit) equals Total receipts less total deductions less Interest on State and local Government obligations plus Constructive taxable income from related foreign corporations.

4. Income subject to tax

For most corporations, income subject to tax consisted of net income less statutory special deductions. However, certain of these deductions (a) could exceed net income resulting in no income subject to tax and (b) could occur on returns without net income and therefore without income subject to tax. Other exceptions applied to life insurance companies, regulated investment companies, real estate investment trusts, and to Small Business Corporations electing to have net income taxed through shareholders. See "Income subject to tax" in Explanation of Terms, STATISTICS OF INCOME--1972, CORPORATION INCOME TAX RETURNS.

5. Cost of property used for investment credit and Investment qualified for credit include, respectively, $558.9 million and $447.2 million reported on Form 1120S, Small Business Corporation Income Tax Returns. These amounts were allocated by Small Business Corporations to their shareholders for use in computing their investment credit.

6. For 1972, statistics for Offices of dentists and dental surgeons, formerly included in Other medical services, are shown separately.

7. See the report STATISTICS OF INCOME--1972, CORPORATION INCOME TAX RETURNS, for a discussion of these statistics including:

Changes in law
Description of the sample and limitations of the data
Explanation of terms
Facsimiles of corporation income tax return forms, 1972

8. The report may be obtained from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.
