2.2.4.1
(10-18-2022)
Program Scope and Objectives

- (1) The Partnership Control System (PCS) is used to create, monitor and update information related to Partnership and Investor examinations.
- (2) **Purpose:** This IRM provides instructions on how to use IDRS command code TSINQ.
- (3) **Audience:** Campus Revenue Agents (RAs), Tax Compliance Officers (TCOs), Tax Examiners (TEs) and Clerks working pass-through entities and/or their investors linked on the PCS.
- (4) **Policy Owner:** Chief Information Officer
- (5) **Program Owner:** Information Technology/Application Development
- (6) **Primary Stakeholders:** SB/SE, Large Business and Industry (LBI), and Appeals
- (7) **Program Goals:** PCS is a database used to create an electronic linkage between pass-through entities and their underlying partners. Linking in some instances is mandatory. Linkage allows for the proper control of statutes and ensures all relevant partners are processed.

2.2.4.1.1
(01-01-2023)
Background

- (1) PCS was created to monitor and control pass-through entity investors. Pass-through entities can have many partners and many levels of tiering. Tiering occurs when an investor in a pass-through entity is also a pass-through entity. This complexity can make it difficult to keep track of statutes and monitor all the investors.

2.2.4.1.2
(01-01-2023)
Authority

- (1) PCS control is a policy that was established in response to the partnership provisions of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982. It has been expanded to cover other pass-through entities that fall outside of TEFRA.

2.2.4.1.3
(01-01-2023)
Responsibilities

- (1) The Director, SB/SE, Headquarters, Examination Field and Campus Policy is responsible for:
 - Coordinating and Implementing PCS enhancements; and
 - Coordinating resolutions for PCS Systemic problems
- (2) The SB/SE Program Manager, Examination Field and Campus Policy, Campus Exam & Field Support is responsible for:
 - Ensuring that PCS procedural changes and computer program changes are implemented and coordinated with area office and campus examination personnel; and
 - Monitoring and evaluating area office and campus examination PCS quality control procedures
- (3) The campus PCS Coordinator is responsible for:
 - Identifying and resolving technical problems; and
 - Identifying and coordinating the resolution of PCS systemic problems

2.2.4.1.4
(01-01-2023)
**Program Management
and Review**

- (1) **Program Reports:** PCS generates a variety of reports used to monitor the inventory and related statutes. The data source for the reports is the Partnership Information Control File located in Martinsburg, WV.
- (2) **Program Effectiveness:** PCS is used to help identify the effectiveness of the Campus Pass-Through Function program. PCS shows the number of investors linked within a pass-through structure. Failing to link partner returns timely can result in barred statutes or the need to follow burdensome procedures such as manual assessments or untimely notice procedures.

2.2.4.1.5
(01-01-2023)
Program Controls

- (1) IRS will implement access control measures that will provide protection from unauthorized alteration, loss, unavailability, or disclosure of information.
- (2) SACS controls all the IDRS user accesses and permissions.
