2.8.6.1.1
(01-01-2024)
Background

- (1) As a result of a study, it was concluded that Examination had a need for a new information management system. The study group recommended a terminal assisted Audit Information Management System (AIMS). A stand alone direct access terminal system was considered along with the enhancement of IDRS. Enhancement of IDRS was determined to be clearly the best choice for the Service.
- (2) This new system satisfied Examination Division's current needs for accurate and timely inventory controls, better control of assessments and up-to-date management reports. The system traces examination results through final determination of tax liability including Appeals and Tax Court.
- (3) After the successful implementation of AIMS for the Examination Division, control of returns in Appeals was added to AIMS. As of January 1, 1977 control of Exempt Organization returns was added and on October 1, 1977 control of Employee Plan returns was added.

2.8.6.1.2
(01-01-2024)
Authority

- (1) During the summer of 1973, the Deputy Commissioner established a Task Force to identify ADP requirements of Compliance functions, and to make appropriate recommendations to satisfy their needs.

Variable Fields

All item numbers described below represent variable (non-fixed) fields, which means that there is not a specific location on the screen where the input item must reside. The input is free-format and the individual item numbers are separated by commas.

Deleting Fields

Items on the TIF can be changed by the use of CC AMAXU; some items can also be deleted. To delete an item, a "D" should be entered instead of data. Those items which can be deleted are described in Exhibit 2.8.6-5.

Command Code AMAXU**Abstracts - Special Processing**

Item 404 consist of the Abstract Code, Disposal Code, Abstract Hours, Abstract Results and Abstract Claim Time all refer to one particular Abstract. There may be several of these groups on one record and each group will have a unique Abstract code. The entire Abstract (item 404) has to be present before CC AMAXU can make a change. If a match cannot be made between the Abstract input and a similar Abstract on the AIMS (for the TIN, MFT, Tax Period entered) then the system will assume that the Abstract input is new and it will be added to the record. If a match is made between the Abstract Code input and a similar abstract code on the TIF (for TIN, Tax Period entered) then the systems will change the Disposal Code, Abstract Hours, Abstract Results and Abstract Claim Time following the abstract referenced. If an incorrect Abstract (item 404) was entered it can be deleted by inputting the Abstract in 404 immediately followed by a "D" in item #409.
