REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, D. C., November 1, 1893.

SIR: In compliance with the instructions contained in your letter of September 9, 1893, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1893, and also certain additional information relating to the collections made and work performed during the first three months of the current fiscal year.

The titles of the tables found at the close of the bound volume of this report are as follows:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1893.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, and opium manufactured for smoking purposes; also the number of the different kinds of certificates of registry, with the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1893.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July 1, 1863, to June 30, 1893.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1893.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30, 1893.

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from July 1, 1863, to June 30, 1893.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1893; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1893.

Table H, showing the receipts from special taxes in the several States and Territories for the twelve months ended June 30, 1893.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1893.

Table K. Abstract of seizures of property for violation of internal-revenue laws during the fiscal year ended June 30, 1893.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal years ended June 30, 1892 and 1893.

COLLECTIONS FOR THE CURRENT FISCAL YEAR.

I estimate that the total receipts from all sources of internal revenue for the current fiscal year will be \$150,000,000.

RECEIPTS FOR THE PAST EIGHT FISCAL YEARS.

Fiscal year ended—	
June 30, 1893.....	\$161,004,989.67

June 30, 1888.....	124,326,475.32
June 30, 1887.....	118,837,301.04
June 30, 1886.....	116,902,869.46

COLLECTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1893.

In the last annual report of the Commissioner of Internal Revenue my predecessor estimated that the receipts of this bureau for the fiscal year ended June 30, 1893, would reach the sum of \$165,000,000. Owing to the general depression of business throughout the country I regret to say this estimate was not realized, the actual receipts from all sources for the fiscal year above named being \$161,004,989.67.

The following tables exhibit in detail the amount of internal revenue collected during the fiscal year ended June 30, 1893, the sources from which the revenue was derived, the total sum collected in each district, State, and Territory, the cost of collecting, etc.:

COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine, and the provisions of the act of October 1, 1891, relating to the payment of bounty on sugar	\$1,875,774.29
For salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses	2,101,992.40
For salaries and expenses of sugar inspectors	30,260.93
For paper for internal-revenue stamps	57,258.46
For expenses of detecting and punishing violations of internal-revenue laws	21,508.65
For salaries of officers, clerks, and employes in the office of Commissioner of Internal Revenue	271,530.90
Total expended	4,358,325.63
Deduct expenses relating exclusively to the payment of bounty on sugar, as follows:	
Additional deputies and clerks	\$97,890.33
Polariscopes and articles used in making analyses of sugar, etc.	1,265.01
Salary and expenses of sugar inspectors	30,260.93
Additional clerks in office of Commissioner	9,170.00
	138,586.27

Leaving the net cost of collection

The percentage of the cost of collection is 2.62 per cent. The expenses for the previous fiscal year were \$4,315,046.26, being 2.80 per cent of the collections, so that, while the collections during the fiscal year were in excess of those of the previous year, the percentage of cost of collection has decreased.

The amount appropriated for salaries and expenses of agents, gaugers, storekeepers, etc., was, including a deficiency appropriation, \$2,100,000.00, while owing to the increased number of distilleries in operation, resulting in an increase in the amount of taxes collected from spirits of nearly \$4,000,000 as compared with the previous year, as shown in this report, the actual expenses for this purpose were \$1,992.40 more than the amount appropriated, as shown by unpaid accounts now on file, and for which an additional appropriation will be needed.

MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ending June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Locks for use at distilleries	\$2,732.77
Hydrometers used in gauging spirits	7,019.97
Weighing beams for use in weighing spirits	3,395.75
Expenses of testing spirits weighed, labor, etc.	23.21
Steel letters for numbering stills	1.00
Saccharometers, polariscopes, stills, and chemicals for testing sweet-wine samples	843.15
Stationery for internal-revenue officers	358.75
The Internal Revenue Record supplied to internal revenue offices	2,200.02
The Federal Reporter for the office of the Commissioner of Internal Revenue	17.50
Compensation of United States attorneys in internal-revenue cases allowed under sections 827 and 838, Revised Statutes	1,710.00
Traveling expenses of clerks under special orders of the Department	237.15
Expenses of seizures and sales by collectors	570.48
Total	19,109.75

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the internal revenue service for the fiscal year ending June 30, 1895, as follows:

For salaries and expenses of collectors, including pay of deputy collectors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on the Government the expense of the inspection of tobacco exported, and the act of October 1, 1890, providing for payment of a bounty on sugar, including miscellaneous expenses incident to ascertaining and paying said bounty	\$1,900,000
For salaries and expenses of twenty revenue agents, for surveyors, for fees and expenses of gaugers, for salaries of storekeepers, and for miscellaneous expenses	2,150,000
For salaries and expenses of sugar inspectors	36,000
For paper for internal-revenue stamps	65,000
For detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, including payment for information and detection	75,000
For salaries of officers, clerks, and employes in the office of the Commissioner of Internal Revenue	272,580
Total	4,498,580

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1895, the sum of \$272,980 as salaries for the following officers, clerks, and employes in this Bureau:

One Commissioner, at	\$6,000
One deputy commissioner, at	3,600
One chemist, at	2,500
One microscopist, at	2,500
Two heads of division, at	2,500
Six heads of division, at	2,250
One superintendent of stamp vault, at	2,000

One stenographer, at	\$1,800
Twenty-five clerks, at	1,800
Twenty-five clerks, at	1,600
Thirty-five clerks, at	1,400
Twenty-five clerks, at	1,200
Fourteen clerks, at	1,000
Forty-one clerks, at	900
Three messengers, at	840
Fourteen assistant messengers, at	720
Thirteen laborers, at	660

An aggregate of 209 persons.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent at \$1,600 and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25,000 or less	\$2,000	\$375,001 to \$425,000	\$3,375
25,001 to \$37,500	2,125	425,001 to 475,000	3,500
37,501 to 50,000	2,250	475,001 to 550,000	3,625
50,001 to 75,000	2,375	550,001 to 625,000	3,750
75,001 to 100,000	2,500	625,001 to 700,000	3,875
100,001 to 125,000	2,625	700,001 to 775,000	4,000
125,001 to 175,000	2,750	775,001 to 850,000	4,125
175,001 to 225,000	2,875	850,001 to 925,000	4,250
225,001 to 275,000	3,000	925,001 to 1,000,000	4,375
275,001 to 325,000	3,125	1,000,001 and upward	4,500
325,001 to 375,000	3,250		

OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1893, in the various districts throughout the United States, as reorganized under the executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
37	\$4,500	1	\$3,750	1	\$3,000
1	4,250	3	3,625	1	2,875
1	4,125	5	3,500	6	2,750
1	4,000	2	3,250	2	2,625
1	3,875	1	3,125		

There were also employed 963 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
22.....	\$2,000	34.....	\$1,300	9.....	\$500
11.....	1,900	169.....	1,200	1.....	480

119.....	1,400	5.....	700	4.....	150
1.....	1,350	25.....	600	6.....	120

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1.....	\$1,800	8.....	\$1,150	9.....	\$700
2.....	1,600	6.....	1,100	2.....	650

1.....	1,250	5.....	750		
38.....	1,200	2.....	720		

Also 30 porters, messengers, or janitors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
6.....	\$600	1.....	\$360	1.....	\$180
3.....	500	4.....	300	2.....	120
5.....	480	1.....	280	3.....	100
3.....	400	1.....	200		

In addition to the foregoing there were also employed for limited periods 458 persons in duties solely connected with the execution of the provisions of the act of October 1, 1890, relating to the payment of bounty on sugar produced, as shown more in detail in that part of this report relating to that subject.

At the close of the year ended June 30, 1893, 211 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$271,530.90.

STOREKEEPERS, GAUGERS, ETC.

There were also employed 518 gaugers, who received fees not to exceed \$5 per day; 578 storekeepers, and 1,190 storekeepers, and gaugers, whose pay did not exceed \$4 per diem, and 6 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity of 100 bushels or more, and are paid such compen-

sation as may be prescribed by the Commissioner of Internal Revenue, not to exceed \$4 per day.

The pay of storekeeper and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries has been graded according to the following scale:

Compensation for storekeeper and gaugers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, \$4 per day.

GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

I take great pleasure in testifying to the fidelity, diligence, and accuracy of the officers, clerks, and employes of this Bureau during the passed and current fiscal years. The work of the office is in a most excellent condition, is practically up to date, and all business has been accurately and promptly disposed of.

During the past fiscal year the offices of the several collectors of internal revenue have been examined as often as was possible with the limited number of revenue agents employed.

Such examinations resulted in finding the offices of collectors and their subordinates, as a rule, in good condition.

REVENUE AGENTS' DIVISION.

Twenty revenue agents have been employed during the last fiscal year, one as chief of division in this office, twelve in charge of territorial divisions, three in the examination of the offices and accounts of collectors, and four in assisting agents in charge of divisions and on special duty.

EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	\$41,739.00
Aggregate amount of traveling expenses	27,440.20
Stationery furnished agents	358.75
Transportation over Pacific railroads	612.05
Total	70,150.00

WORK OF REVENUE AGENTS.

Two thousand one hundred and ninety-four violations of law have been reported by revenue agents during the year; 545 persons have been arrested on their information; property to the value of \$192,437.67 has been reported by them for seizure, and \$68,692.24 for assessment for unpaid taxes and penalties.

Amount expended by collectors	502.15
Amount expended for rewards	909.68
Amount expended for miscellaneous expenses	255.84
Total expended	21,508.65

The accounts for expenditures under this appropriation are rendered monthly, with an itemized statement, and in all cases supported by proper subvouchers duly sworn to. These accounts pass through all the accounting offices in the Treasury Department and are filed in the Register's office.

INTERNAL REVENUE INSPECTORS.

In accordance with the provisions of legislative act of March 3, 1891, authorizing the Commissioner of Internal Revenue to employ not to exceed twelve inspectors whose duty shall be to inspect sugar upon which a bounty is required to be paid, and to perform such other duties as may be required by the Commissioner, twelve inspectors have been employed during the past year at a compensation of \$5 per day while actually and necessarily employed and their necessary traveling expenses.

These inspectors have been employed most of the time in connection with the payment of bounty on domestic sugar, and have been assigned as follows:

District of Kansas	1
Districts of Nebraska and Montana	1
First district of California	1
Districts of Louisiana, Texas, and Florida	9

The duties which they have performed have been the inspection and classification of sugar upon which a bounty was claimed, making examinations and inspections at sugar factories, and other work incident to that branch of the service.

During the maple-sugar season inspectors were employed in connection with inspection and classification of maple sugar upon which bounty was claimed in the following districts:

Districts of New Hampshire and Massachusetts	2
Fourteenth, twenty-first, and twenty-eighth districts of New York	1
Twelfth and twenty-third districts of Pennsylvania	1
Tenth and eighteenth districts of Ohio and first and fourth Michigan	1

The services of inspectors are indispensable, in my opinion, to protect the interests of the Government in connection with the payment of bounties on domestic sugar. During the past year the duties imposed upon them were performed in a manner entirely satisfactory to this office, especially in the cane-sugar-producing districts, where it was found necessary to employ some of them during the entire year. In the beet and sorghum producing districts they were employed from three to five months, and in the districts where maple sugar is produced their services were required about three months.

When not occupied with duties as sugar inspectors they were employed with revenue agents on general duty in connection with the internal-revenue service.

EXPENSES OF REVENUE INSPECTORS.

The appropriation for the payment of salaries and expenses of inspectors was \$33,000. The following expenditures chargeable to that appropriation have been made during the year:

Aggregate salary of inspectors	\$17,880.00
Aggregate amount of traveling expenses	12,092.41
Transportation over Pacific railroads	288.52
Total	30,260.93

REDEMPTION OF CHECK AND PROPRIETARY STAMPS.

There have been received since July 1, 1892, and up to June 30, 1893, 83 applications for redemption of check and proprietary stamps in sums ranging from 8 cents to \$40, the various values stated amounting in the aggregate to \$235.73. The time allowed by law for the redemption of such stamps having expired June 30, 1886, the claims were rejected and the stamps forwarded therewith were returned.

At the close of the last fiscal year there were remaining 78 packages of check and proprietary stamps undisposed of. These packages are made up of cases incomplete as to data, some containing stamps without claims and others claims unaccompanied by stamps. None of the old claims have been disposed of and are chiefly those for which no clue to ownership can be obtained.

PRODUCTION OF STAMPS.

The Bureau of Engraving and Printing prints and supplies all of the internal-revenue stamps used, with the exception of stamps for tobacco imprinted upon foil wrappers, which have been printed and furnished by the John J. Croke Company, of New York, under a contract which provides that the imprinting of such stamps shall be without cost to the Government, the contractor receiving such remuneration from the

manufacturers of tobacco as may be agreed upon between them, and reimbursing to the Government the salaries of one stamp agent for the United States and one counter, amounting to \$2,500 per annum.

MANUFACTURE OF STAMP PAPER.

After due advertisement for proposals to furnish paper for the present fiscal year to be used in printing United States internal-revenue stamps, three bids were presented. The bids were opened March 8, 1893, and after proper consideration of the same, the customary and usual tests of the various samples of paper submitted with the bids having been made, the contract for supplying such paper was awarded on the 6th day of April, 1893, to Messrs. F. R. Walker & Son, of the city of New York, at the rate of 6 cents per pound, including expenses for its transportation and delivery at the Treasury Department. Under the contract for the previous fiscal year the price paid was 6.1 cents per pound. The advertisement for the proposals stated that the quantity of paper likely to be required for the present year would be about 800,000 pounds. It is now apparent by the regular annual increase of the demand for the several classes of stamps that the amount of paper required will be 900,000 pounds. The manufacture of paper under the present contract was commenced on the 7th day of August, 1893.

OFFICIAL COUNT OF STAMPS IN VAULT.

In accordance with instructions contained in Department letter of December 14, 1892, appointing a committee to make an inventory of the internal-revenue stamps in the vaults of the stamp division, the committee reported and took possession of the vaults at 9 o'clock on the morning of December 27, 1892, with a force of 3 clerks, 40 expert counters, and 20 packers and laborers, selected from different offices and bureaus of the Department, and proceeded at once with the count, completing the work at 12 o'clock on the 30th of the same month. They reported the balances found by actual count to agree in every respect with the balances reported by the superintendent of the vault and the statement of balances called for by the books of the office of the Secretary, all of which were verified by the count and found to be absolutely correct. The following summary of transactions illustrates the magnitude of the work performed in this branch of the Internal Revenue Bureau during the past year, as reported by the committee:

There were on hand December 28, 1891, when the previous count was made, 63,551,673 stamps, value, \$23,760,884.85; from that date to December 27, 1892, there were received from the Bureau of Engraving and Printing and from collectors for reissue, 999,496,182 stamps, value, \$176,874,082.05, making a total to be accounted for of 1,063,047,855 stamps, value, \$200,634,966.90.

There were delivered for issue, reissue, and destruction during the period named 998,230,011 stamps, value, \$178,030,506.55, leaving a balance to be accounted for on the morning of December 27, 1892, of 64,817,844 stamps, value, \$22,604,460.35, which by actual count were found to be in the vaults on that date.

A careful examination of the bookkeepers' accounts by money values was made, and they were found to strictly agree with the reports of the superintendent of the vault and with the books of the Secretary's Office.

The committee, in closing their report, state that they feel justified in emphasizing the fact that these extensive operations, involving the

receipt, custody, and issue of more than 1,000,000,000 of stamps, have been conducted without loss to the Government, a result which indicates the highest degree of efficiency on the part of the officials and employes charged with this responsible duty, and that the system of checks adopted by the Department to insure accuracy and proper accountability is well calculated to secure that result.

A second count, required in the transfer of the office by ex-Commissioner John W. Mason upon his retirement from office, was commenced on the morning of April 19, 1893, and completed at noon on Saturday, April 22, under the supervision of a committee appointed by the honorable Secretary of the Treasury for that purpose. The committee reported that all the stamps with which the Commissioner was charged were properly accounted for, the accounts of this office being verified and found to agree with those of the Secretary's Office in each particular and in the same manner as stated in the case of the previous count.

STOCK OF STAMPS IN VAULT.

The present stock of stamps in the vaults of this Bureau does not come up to the requirements of the statute and is inadequate to meet the demands of the service. It is estimated that the three months' supply which the statute requires to be in the vault should be 263,208,000 stamps of the various classes and denominations. The stock on hand in the vault at the present time is only 108,704,844 stamps of all denominations. The inability to maintain the stock at the statutory requirement is due to the failure of the Bureau of Engraving and Printing to fill the orders from this Bureau as called for. There are now due from the Bureau of Engraving and Printing on past orders 106,370,100 stamps, and orders for the November delivery amount to 76,940,000 stamps.

REGISTRATION OF CHINESE.

Under the provisions of the act of May 5, 1892, certificates of residence of Chinese laborers, and other than laborers entitled to remain in the United States after the date of said act, are required to be issued by this office. The total number of certificates so issued was 13,243. The following tabulated statement will show the number issued, respectively, by collectors in the States and Territories named:

TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was \$31,889,711.74. This amount includes internal-revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The net increase of collections for the last fiscal year, as compared with those for the previous fiscal year, was \$889,218.67. The increase from the following-named articles were:

Cigars and cheroots	\$796,193.10
Cigarettes	141,870.43
Snuff	44,912.55
Total	982,976.08
Deduct decrease chewing and smoking tobacco	93,757.41
Net increase of collections	889,218.67

The decrease in the amount collected from chewing and smoking tobacco is believed to be due to the large increase of sales of leaf tobacco to consumers both by farmers and retail dealers in leaf tobacco.

The increase in the number of cigars and cigarettes and in the quantity of snuff and the decrease in the quantity of smoking and chewing tobacco for the last fiscal year, as compared with those taxed for the previous fiscal year, were—

Cigars and cheroots	number	265,397,700
Cigarettes	do	283,715,860
Total	do	549,113,560
Snuff	pounds	748,543
Decrease, smoking and chewing tobacco	do	1,562,272
Net decrease, tobacco and snuff	do	813,729

The export account shows an increase in manufactured tobacco and snuff of 276,738 pounds; an increase in the number of cigars exported of 262,006; and an increase in the number of cigarettes exported of 76,982,240.

COMPARATIVE STATEMENT.

The following exhibit shows in detail the receipts for the fiscal year ended June 30, 1893, from each particular source of the tobacco tax, as compared with those for the previous fiscal year:

THE TABULAR STATEMENTS.

In the tables annexed will be found statements showing the manner in which the manufacturing is distributed among the different States and districts, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of materials used, and the quantity and kind of product manufactured. These tables are compiled from the reports received from the collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1892, a period of time differing from the fiscal year, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

There were in New York City thirty-two persons who qualified and kept books as tobacco manufacturers solely for the purpose of lawfully dealing in the refuse scraps, clippings, cuttings, and waste made by cigar manufacturers. They sort, sieve, and pack this material and export most of it to foreign countries. The rest they sell in bulk, under permits, to other manufacturers, who manipulate it and pack their product as smoking tobacco. During the year 1892 they purchased 1,626,556 pounds of such material, exported 911,319 pounds, and sold 567,155 pounds to other manufacturers. These purchases and sales are not included in the tabular statement, because they did not pack and sell any of this tobacco for use and consumption. Many cigar manufacturers who prepare for use and pack as smoking tobacco their refuse material have, during the year 1892, qualified as tobacco manufacturers in addition to those who qualified during the year 1891. The number of tobacco manufacturers who buy leaf and manufacture it is not over 1,000. The other persons who are reported as tobacco manufacturers are either scrap dealers or cigar manufacturers who have qualified as tobacco manufacturers to enable them to pack, stamp, and sell their refuse scraps, clippings, cuttings, and waste.

a Increase.

b Decrease.

NOTE 1.—Increase in "smoking" includes scraps, cuttings, and clippings put up by manufacturers of cigars who, under law and circular 361, qualified as manufacturers of tobacco.

NOTE 2.—Tax on tobacco and snuff, year 1890, was 8 cents per pound, and for the year 1891 was reduced to 6 cents per pound.

SMOKING OPIUM.

As an effective enforcement of section 36, act of October 1, 1890, imposing a tax of \$10 a pound upon all opium manufactured in the United States for smoking purposes is impossible, for the reasons set forth in detail in my predecessor's last annual report (1892, page 38), without additional legislation, I renew the recommendation therein made that the law be amended so as to provide that all smoking opium found unstamped shall be deemed to have been manufactured or imported since October 1, 1890, and shall be forfeited to the United States (following the precedents found in sections 3378 and 3403, Revised Statutes, as to tobacco, snuff, and cigars).

I also renew the recommendation that the provisions of sections 3373, 3374, 3375, and 3376, Revised Statutes, be adapted to the stamping of prepared smoking opium, and so drawn in detail and enacted.

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1893, was 1,798, of which number 1,617 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1892, were 1,663 and 1,457, respectively, showing an increase during the last fiscal year of 135 in the number registered and of 160 in the number operated.

The larger portion of the increase in the number registered and in the number operated occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been an increase of 118 in the number of distilleries of this class registered and an increase of 136 in the number operated.

In the class of larger distilleries there was an increase of 17 in the number registered and of 24 in the number operated.

During the fiscal year ended June 30, 1892, there were registered 1,414 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,223, or 85 per cent, were operated.

Of the larger distilleries, having daily grain capacities varying from 60 bushels to several thousand bushels each, 249 were registered and 234, or nearly 94 per cent, were operated.

During the fiscal year ended June 30, 1893, of the smallest distilleries 1,532 were registered and 1,359, or nearly 89 per cent, were operated.

Of the larger distilleries 266 were registered and 258, or 97 per cent, were operated.

There were 11 rum distilleries registered and 11 operated, an increase of 1 in the number reported for the previous fiscal year.

There were 3,180 fruit distilleries registered and 3,115 operated, a decrease of 1,301 in the number registered and of 1,343 in the number operated during the fiscal year.

The total number of grain, molasses, and fruit distilleries registered and operated during the year is 4,989 and 4,743, respectively.

There was a decrease of 1,165 in the number of all kinds of distilleries registered and of 1,182 in the number of all kinds operated during the fiscal year ended June 30, 1893, as compared with the fiscal year ended June 30, 1892; but this decrease occurs wholly in the class of fruit distilleries, there being, as shown above, a considerable increase in the number of grain distilleries.

The average yield per bushel of grain was $\frac{126,545,017}{29,030,409} = 4.35 +$ gallons of spirits.The average yield per gallon of molasses was $\frac{2,106,765}{22,775,752} = 7.58 +$ of a gallon of rum.

* Two million one hundred and eight thousand eight hundred and twenty-five gallons of molasses were used for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

The quantity of grain used for the production of spirits during the fiscal year ended June 30, 1893 (29,030,409 bushels, including 328,039 bushels, which is the estimated equivalent of 2,108,825 gallons of molasses used for the production of spirits), is an increase of 2,540,582 bushels over the amount used in the preceding fiscal year (26,489,827 bushels), and is 7,217,180 bushels more than the average (21,813,229 bushels) for the last ten years. The number of gallons of spirits produced from grain during the year (126,545,017 gallons) shows an increase of 13,732,294 gallons over the product (112,812,723 gallons) for the year ended June 30, 1892, and is 34,694,304 gallons more than the average produced (91,850,713 gallons) for the last ten years.

The yield of spirits from each bushel of grain is 4.35+ gallons.

The yield for the two preceding years was 4.32+ for 1891 and 4.24+ gallons for 1892.

The quantity of molasses used for the production of rum during the fiscal year (2,775,752 gallons) shows an increase of 224,993 gallons over the quantity used in the previous year (2,550,759 gallons), and is 367,784 gallons more than the average (2,407,968 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (2,106,765 gallons) shows an increase of 150,447 gallons over the product of the previous year (1,956,318 gallons), and is 275,065 gallons more than the average product (1,831,700 gallons) for the last ten years.

STATEMENT AS TO STAMP TAXES ASSESSED.

All taxes payable by stamps not paid at the time and in the manner required by law have been assessed and accounted for separately from those not payable by stamps. The amount of stamp taxes so assessed and accounted for is as follows:

Balance as per last report.....	\$614,324.12
Additional amount not heretofore reported.....	47.87
Stamp-tax spirits assessed.....	10,877,049.00
Special taxes assessed.....	56,384.18
Amount transferred from one district to another.....	435.92
Total.....	11,578,241.09
Amount collected during year.....	9,950,708.97
Amount abated during year.....	148,762.44
Amount transferred from one district to another.....	435.92
Balance on hand June 30, 1893.....	1,478,333.76
Total.....	11,578,241.09

The increase in the balance at the end of the year over that at the beginning of the year is due to the heavy assessments made on the lists for June, 1893.

* NOTE.—The term "taxable gallon," as used in these tables, signifies the gallon subject to tax at 90 cents. In the case of whisky, rum, and gin, this gallon is about equal by measure to the wine gallon of 231 cubic inches, which is the United States standard in measuring liquids. This is also true of most distilled spirits used as beverages, and is owing to the fact that such spirits are mixtures of alcohol and water, of about equal parts by volume, a wine gallon of such a mixture being substantially defined by the law to be the taxable gallon. If the liquor is more than half water, the full gallon measure is still a taxable gallon; but if the liquor is more than half alcohol, the taxable gallon does not fill the wine gallon measure, and if the liquor is all pure alcohol, the taxable gallon fills the measure just half full. For an exact definition of the gallon on which the tax is collected, see sections 3249 and 3251, Revised Statutes, as amended.

INCREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of tax-paid spirits (97,424,825 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1893, is more than the quantity (92,985,265 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1892, by 4,439,560 gallons, the increase being distributed among the different kinds known to the trade as follows:

Increase in withdrawals of—		Gallons.
Bourbon whisky.....		4,845,247
Rye whisky.....		1,427,463
Alcohol.....		361,827
Rum.....		86,591
Gin.....		47,046
Total increase.....		6,768,174
Decrease in withdrawals of—		Gallons.
High wines.....		185,077
Pure neutral or cologne spirits.....		1,722,095
Miscellaneous.....		421,442
Total decrease.....		2,328,614
Net increase.....		4,439,560

If the quantity, 744,442 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal-revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1893, is found to be 98,169,267 gallons, or 4,157,724 gallons more than during the year 1892, including the 1,026,278 gallons reimported and tax-paid during that year.

WITHDRAWAL OF PRODUCTS BY MONTHS.

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (5,072,164 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1830.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

Year.	Total quantity withdrawn.	Leakage allowed.	Percentage of withdrawals.

DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1893.

The quantity of distilled spirits in the United States, except what may be in customs bonded warehouses, on the 1st day of October, 1893, was 188,525,773 gallons, this quantity being distributed as follows:

	Gallons.
In distillery warehouses.....	134,288,665
In special bonded warehouses.....	2,263,057
In hands of wholesale liquor dealers.....	18,994,601
In hands of retail liquor dealers.....	32,979,450
Total.....	188,525,773

In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

The following table shows the quantity of distilled spirits in taxable gallons, at 90 cents tax, placed in distillery warehouses during the fiscal year ended June 30, 1893, the quantity withdrawn therefrom during the year, and the quantity remaining therein or remaining unaccounted for at the beginning and close of the year:

OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, comprise—

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1893; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30, 1893.

Second. A statement of the receipts from all classes of taxes imposed by the oleomargarine law for the year ended June 30, 1893.

Third. A statement by States and Territories showing the number of establishments for which special tax was paid to carry on during the fiscal year ended June 30, 1893, the business of manufacturing and dealing in oleomargarine; also in aggregate of all persons who paid oleomargarine special taxes for the twelve months ended June 30, 1892.

Fourth. A statement of the total production and of total receipts from all oleomargarine sources for each fiscal year since the oleomargarine law took effect.

It appears from the subjoined table that the average monthly production of oleomargarine under the operations of the law has been as follows:

	Pounds.
During the eight months ended June 30, 1887.....	2, 711, 828
During the fiscal year ended June 30, 1888.....	2, 860, 460
During the fiscal year ended June 30, 1889.....	2, 972, 002
During the fiscal year ended June 30, 1890.....	2, 693, 669
During the fiscal year ended June 30, 1891.....	3, 699, 367
During the fiscal year ended June 30, 1892.....	4, 030, 346
During the fiscal year ended June 30, 1893.....	5, 602, 024

It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

	Pounds.
During the eight months ended June 30, 1887.....	2, 592, 946
During the fiscal year ended June 30, 1888.....	2, 707, 430
During the fiscal year ended June 30, 1889.....	2, 821, 970
During the fiscal year ended June 30, 1890.....	2, 566, 494
During the fiscal year ended June 30, 1891.....	3, 601, 292
During the fiscal year ended June 30, 1892.....	3, 909, 625
During the fiscal year ended June 30, 1893.....	5, 371, 989

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

	Pounds.
During the eight months ended June 30, 1887.....	90, 566
During the fiscal year ended June 30, 1888.....	140, 516
During the fiscal year ended June 30, 1889.....	145, 746
During the fiscal year ended June 30, 1890.....	134, 866
During the fiscal year ended June 30, 1891.....	102, 426
During the fiscal year ended June 30, 1892.....	107, 981
During the fiscal year ended June 30, 1893.....	232, 124

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; in the fiscal year 1891, March; in the fiscal year 1892, March; while the greatest production during the fiscal year ended June 30, 1893, occurred in January. The quantity produced during these months was as follows:

	Pounds.
In March, 1887.....	3,568,254
In March, 1888.....	3,940,727
In December, 1888.....	4,181,317
In October, 1889.....	4,072,333
In March, 1891.....	6,723,224
In March, 1892.....	5,916,871
In January, 1893.....	7,824,657

The months in which the production fell below 2,000,000 pounds were as follows:

During the fiscal year ended June 30, 1887:	
May, 1887, produced.....	1,885,027
June, 1887, produced.....	1,375,423
During the fiscal year ended June 30, 1888:	
July, 1887, produced.....	1,208,638
During the fiscal year ended June 30, 1889:	
June, 1889, produced.....	1,575,362
During the fiscal year ended June 30, 1890:	
July, 1889, produced.....	1,404,749
August, 1889, produced.....	1,975,773
May, 1890, produced.....	1,864,746
During the fiscal year ended June 30, 1891:	
June, 1890, produced.....	1,364,826
July, 1890, produced.....	1,723,966
June, 1891, produced.....	1,988,633

There was an increase in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30, 1893, as well as an increase in the production of the article.

The following table shows the quantity of oleomargarine, in pounds, at 2 cents tax, produced at manufactories during the fiscal year ended June 30, 1893, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1893:

The following table of production and total receipts from all oleomargarine sources for each fiscal year since November 1, 1886, the date the oleomargarine law took effect, is interesting as showing the extent of operations in the country:

AMENDMENTS SUGGESTED TO PRESENT LAW.

Section 3 of the act of August 2, 1886, defines a retail dealer in oleomargarine to be "every person who sells oleomargarine in less quantities than 10 pounds at one time," whereas section 6 of this act provides that "retail dealers in oleomargarine must sell only from original stamped packages in quantities not exceeding 10 pounds."

To reconcile the two sections, section 6 should be amended by striking out the words "not exceeding," and inserting in lieu thereof the words "less than."

As a wholesale dealer in oleomargarine is defined to be a person who sells it "in the original manufacturer's packages" (section 3, act August 2, 1886); and it is further provided that "all sales made * * * by wholesale dealers in oleomargarine shall be in original stamped packages;" persons who sell more than 10 pounds, not in the original stamped packages, can not, as the law stands, be required to pay special tax as wholesale dealers; nor is there any criminal provision of the statutes directly reaching such cases.

If it be deemed unadvisable to change the law which confines a wholesale dealer in oleomargarine to selling only "original stamped packages," then the sale of 10 pounds or more, not in such packages, should be made a criminal offense by an amendment to section 6 of the act.

Section 41, act of October 1, 1890, requires wholesale dealers in oleomargarine to keep books and render returns in compliance with the regulations, but no penalty for violation of this section is provided for therein; and in view of recent decisions of the courts, it would seem that a penalty clause, directly accompanying the provisions of a statute requiring certain acts to be done, is essential to an effective enforcement of the law.

It is suggested that the last sentence of section 6, act of August 2, 1886, be stricken out and the following inserted:

"Every person who knowingly sells, or offers for sale, or delivers or offers to deliver, any oleomargarine, in quantities exceeding 10 pounds at one time, otherwise than in the original stamped packages, and every retail dealer in oleomargarine who sells or offers for sale, oleomargarine otherwise than as herein required, or delivers or offers to deliver oleomargarine in any other form than in new wooden or paper packages as above described, and every manufacturer, dealer, or other person, who packs in any package any oleomargarine in any manner contrary to law, or who falsely brands any package, or affixes a stamp on any pack-

age denoting a less amount of tax than that required by law, shall be fined for each offense not more than \$1,000 and be imprisoned not more than two years."

The third clause of section 3 should be amended by applying the provisions of that clause of section 3244 of the Revised Statutes relieving from liability to special tax persons selling oleomargarine as executors, administrators, or in any other fiduciary capacity.

Section 5 should require every manufacturer of oleomargarine to file with the collector of the district a description of the premises constituting his manufactory, and that no business shall be carried on on those premises except the manufacture of oleomargarine or of other substances necessary for and to be used exclusively in the manufacture of the oleomargarine produced thereon.

Section 6 should be amended by requiring that all oleomargarine intended for consumption or sale in this country should be packed as required by that section. The same section should provide that all oleomargarine intended for exportation to a foreign country should be packed in wooden or metallic tubs or other vessels, as prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury.

Section 16 should be amended by striking out the clause in the third and fourth lines "without affixing stamps thereto," thus giving the Commissioner, with the approval of the Secretary of the Treasury, authority to prescribe *export stamps* to be affixed to packages intended for exportation.

The last clause of the same section should be amended by substituting for the words "export oleomargarine" the words "remove from the place of manufacture oleomargarine for exportation," so as to require the package intended for export to be branded by the manufacturer before or at the time of removal.

I think there should be a penalty denounced in section 16 for failure to brand packages of oleomargarine intended for export as required in that section.

It will be observed that the increase in the production of oleomargarine during the last fiscal year over that of the preceding year was 16,860,143 pounds. The increase in special taxpayers during the last year over those of the previous year has been, manufacturers, 4; wholesale dealers, 26; retail dealers, 609. The increase in receipts for tax paid upon oleomargarine manufactured during the last fiscal year and for special taxes paid during that period over that of the year previous was \$404,317.50. During the year ended June 30, 1888, there were produced 34,325,527 pounds of oleomargarine. During the fiscal year ended June 30, 1893, there were produced 67,224,298 pounds, the production of this article having nearly doubled within the period of five years.

This product has become a recognized article of food, and its manufacture one of the established industries of the country. There is in nearly all the States an increasing demand for it under its proper name and by persons fully informed as to the nature of the substance. While it is used as a substitute for butter, for which it is intended, and comes into competition with the lower grades of that article, its production and sale have not, as shown by commercial reports and statistics, reduced the price of the higher grades of butter. The most reliable writers in this country on food products, and those who have given the subject careful study, state that oleomargarine, carefully and properly prepared, is a healthful article of diet and a wholesome substitute

for butter and can be furnished at less cost. To prevent its sale as butter, which in appearance it so closely resembles, and to compel its exposure for sale as oleomargarine, the laws enacted for the control of the manufacture of and traffic in it should be rigidly enforced. This is no less due to the producers than to the consumers of butter, and to the public.

It is believed that very little of the oleomargarine manufactured in the country is placed upon the market without the payment of the tax. There are, however, many evasions of the laws by wholesale and retail dealers who have paid special taxes as such, and in some parts of the country produce dealers who sell oleomargarine seek to evade the payment of the special tax. Both authorized and unauthorized dealers sell and offer it for sale as butter, resorting to various methods to deceive the purchasers or to avoid the penalties imposed by State laws prohibiting its sale. It is sold in unstamped packages, or in packages on which the marks and brands are illegible, or which are carefully concealed from the purchaser and can only be discovered by very close inspection. The laws and regulations governing the traffic in this article are not unreasonable or oppressive. Their requirements are only such as it is believed are necessary to compel the dealers to sell the article for what it really is and under its proper name. The demand for it as a food product has become so universal that, in my opinion, opportunity should be offered for its legitimate sale in any community where it is wanted by consumers.

The special taxes imposed upon wholesale dealers (\$480), and retail dealers (\$48), are exorbitant compared with the special taxes imposed upon other occupations, and I respectfully submit for your consideration the propriety of a reduction of the special tax imposed upon wholesale dealers in oleomargarine to \$120, and the tax imposed upon retail dealers to \$12 per year. I am satisfied that the reduction of the taxes to the sums above named would not result in a loss of revenue.

The existing laws imposing the tax and regulating the manufacture, sale, and exportation of oleomargarine are deficient in many respects. A reenactment of the laws would, no doubt, be the wisest and most effective way of correcting the existing defects; but, if that is not practicable, I recommend that the amendments which are regarded as of most importance and which were suggested by my predecessor in his annual report for the year ended June 30, 1892, be enacted.

BOUNTY ON SUGAR.

The bounty on sugar is authorized by the tariff act of October 1, 1890, commonly known as the McKinley Bill. The law provides—

That on and after July first, eighteen hundred and ninety-one, and until July first, nineteen hundred and five, there shall be paid from any moneys in the Treasury not otherwise appropriated, under the provisions of section three thousand six hundred and eighty-nine of the Revised Statutes, to the producer of sugar, testing not less than ninety degrees by the polariscope, from beets, sorghum, or sugar cane grown within the United States, or from maple sap produced within the United States, a bounty of two cents per pound; and upon such sugar testing less than ninety degrees by the polariscope, and not less than eighty degrees, a bounty of one and three-fourths cents per pound, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe.

The first requirement necessary to be taken by a sugar producer who intends to apply for the bounty is to file, prior to July 1 of each year, with the Commissioner of Internal Revenue, a notice of the place of production, with a general description of the machinery and methods to be employed by him, with an estimate of the amount of sugar proposed to be produced in the current or next ensuing year, including the number of maple trees to be tapped, and make an application for a license, which notice and application must be accompanied by a bond in the prescribed amount. Upon receiving the papers, if the same are satisfactory and approved, a license is issued by the Commissioner.

After the sugar has been produced and placed in the required packages it is weighed by deputy collectors appointed by the collectors of the respective districts, either at the place of production or at designated central stations, and samples are taken for the inspection of the officer whose duty it is to determine the classification.

It is necessary under the law to classify the sugar for payment of the bounty according to the polariscopic test. The utmost care is required in the use of the polariscope and other apparatus connected with it to secure accuracy.

All weights, flasks, polariscope tubes, and quartz control plates used in the work of testing sugar by the polariscope are standardized and their accuracy tested by the Office of Weights and Measures, U. S. Coast and Geodetic Survey.

The law had been in operation two years July 1, 1893, and during that time the sum of \$16,717,208.67 has been distributed, most of which has gone to the producers of cane sugar, mainly in Louisiana. The distribution of such a large amount of money has devolved upon this office much work, requiring thoroughness and system for its successful performance.

There were 6,753 sugar producers licensed to manufacture sugar during the fiscal year ended June 30, 1893, and the sum of \$9,375,130.88 was paid as bounty upon 482,125,081 pounds of sugar.

The work of weighing, sampling, and testing so large a quantity of sugar, examining the books and returns of weighers and sugar producers, inspecting the factories, and performing the duties necessary

to carry out the law and regulations requires a large number of employes during the sugar-making season.

The number of deputy collectors, clerks, messengers, and laborers employed last year in the different collection districts was, besides the 12 inspectors appointed by the Commissioner, as follows:

First district California.....	10
Florida.....	3
Kansas.....	2
Louisiana.....	241
Maryland (includes District of Columbia).....	4
Third district Massachusetts.....	1
Montana.....	2
Nebraska.....	4
New Hampshire (includes Maine and Vermont).....	115
Fourteenth district New York.....	2
Twenty-first district New York.....	23
Twenty-eighth district New York.....	10
Tenth district Ohio.....	1
Eighteenth district Ohio.....	24
Twenty-third district Pennsylvania.....	3
Third district Texas.....	7
Fourth district Michigan.....	6

Total employed..... 458

Most of these were temporary appointments.

The expense of paying the bounty last year was, as nearly as can be estimated, as follows:

Additional deputies, clerks, and employes.....	\$97,890.33
Laboratory supplies, etc.....	1,265.01
Sugar inspectors.....	30,260.93
Salaries of clerks, etc., in office of Commissioner of Internal Revenue.....	9,170.00

Total..... 138,586.27

being \$9,245.34 less than the previous year.

Certain expenses can not always be exactly proportioned between the sugar-bounty work and the general work of the Internal Revenue Service.

NUMBER OF SUGAR PRODUCERS LICENSED 1891-'92.

The number of producers of sugar licensed during the fiscal year ended June 30, 1892, was as follows:

Producers of sugar from sugar cane.....	727
Producers of sugar from beets.....	7
Producers of sugar from sorghum.....	6
Producers of sugar from maple sap.....	4,240

Total..... 4,980

NUMBER OF SUGAR PRODUCERS LICENSED 1892-'93.

The number of producers of sugar licensed during fiscal year ended June 30, 1893, was as follows:

Producers of sugar from sugar cane.....	650
Producers of sugar from beets.....	6
Producers of sugar from sorghum.....	2
Producers of sugar from maple sap.....	6,095

Total..... 6,753

NUMBER OF SUGAR PRODUCERS WHO HAVE APPLIED FOR LICENSE FOR THE YEAR ENDING JUNE 30, 1894.

The quantity of cane sugar included in bounty claims allowed but not paid July 1, 1893, exceeded by 2,197,437 pounds the quantity of cane sugar covered by bounty claims allowed but not paid July 1, 1892. This accounts for the excess in the quantity of sugar upon which bounty was allowed over the quantity upon which bounty was paid.

SUGAR PRODUCTION 1892-'93.

The production for the year 1892-'93 of sugar of all kinds was, according to reports and estimates, as follows:

Cane sugar:	Pounds.	
Louisiana	445,854,797	
Mississippi	3,043	
Texas	9,068,077	
Florida	215,461	Pounds.

Beet sugar:		
California	21,801,288	
Nebraska	3,808,500	
Utah	1,473,500	
		27,083,288
Sorghum sugar:		
Kansas	1,026,100	
Maple sugar (estimated)	32,000,000	
Total production in the United States		515,250,769

The estimate of the maple-sugar production is based on the census returns of 1890.

The quantity of sugar reported as produced during the year does not correspond with that upon which bounty was paid. Some of the sugar produced tested below 80°, as stated; bounty was also paid upon some sugar produced during the previous year, and a considerable number of claims for bounty on sugar produced last year were not received prior to July 1 and will be included in the accounts for the current fiscal year.

No bounty at all was paid during the last fiscal year on maple sugar produced during that year, the payments reported covering exclusively the production of 1891-'92.

The quantity of sugar in process of manufacture July 1, 1893, according to estimates, was as follows:

State or Territory.	Material.	Estimated number of pounds.
Louisiana	Cane	2,816,008
Texas	do	16,500
Florida	do	16,800
Kansas	Sorghum	10,000

SUGAR FROM SUGAR CANE.

There were 618 producers of sugar from cane licensed in the district of Louisiana (including 1 in the State of Mississippi) during the past year, 16 in Florida, and 16 in Texas; total, 650.

The total quantity of acres of cane ground and made into sugar, according to figures furnished this office, was as follows:

District of Louisiana	180,645
Third district of Texas	4,652
District of Florida	68
Total	185,365
Quantity reserved for seed	44,287
Quantity under cultivation	229,652

The acreage of cane under cultivation for the coming crop, as reported by applicants for license, is as follows:

District of Louisiana	281,667½
Third district of Texas	7,060
Florida	1,213
Total	289,940½
Quantity to be reserved for seed	36,112
Quantity to be utilized for sugar production	253,828½

There is also a quantity of cane under cultivation by persons who take out no license to produce sugar but sell cane or sirup produced therefrom to licensed sugar producers not included in the above statement, making probably 10,000 acres additional.

The operation of the law in relation to the bounty on sugar has had the effect so far as cane sugar is concerned to increase the production and to lessen the number of sugar factories or licensed producers.

In the district of Louisiana, where cane sugar is principally made, there were during the first season in which the law was in operation, that of 1891-'92, 697 producers licensed to manufacture sugar, and the product of that period aggregated 357,875,557 pounds.

The number of producers licensed during the season of 1892-'93 was 618, and the amount of sugar produced aggregated 445,857,840 pounds, an increase of 87,982,283 pounds, notwithstanding a reduction of over 11 per cent in the number of licensed producers.

The number licensed to manufacture sugar in that district during the present fiscal year is 552. There will undoubtedly be a large increase in production over that of last year, probably 20 per cent, unless some unusual accident, such as an early frost, should supervene.

The average price paid for cane purchased for sugar manufacture in Louisiana is said to be \$4 per ton delivered at the nearest railroad station as against \$2.50 and \$3 per ton in former years delivered at the factory. In some instances contracts are made on the basis of the amount of sugar that the cane will produce, one-half the product in sugar being allotted to the factory and one-half to the cane cultivator. In some localities it is the custom, in addition to a specific price per ton, to allow a certain per cent increase in the event that the extraction exceeds a certain limit.

It is estimated that \$2,000,000 have been invested in Louisiana in improved machinery for making sugar since the beginning of the present year, the full effect of which will not be seen and appreciated until the conclusion of the coming season. These changes in the machinery of sugar factories result in a more economical manufacture of sugar and indicate a gradual departure from the primitive and more wasteful methods formerly in use.

Although there were 618 licensed sugar producers in the district of Louisiana during the season of 1892-'93, only 569 made sugar, of which 295 used the vacuum-pan process of manufacture, 272 the open-kettle process, and 2 used both methods.

Of the 552 sugar producers licensed in the district of Louisiana for the current year 299 gave notice that they intend to use the vacuum-pan process of manufacture either at the home factories or at factories not owned or operated by themselves, and 250 intend to use the open-kettle process or open steam train. Three intend to use both methods, making part of their sugar by open-kettle process and part by the vacuum pan and centrifugals.

The methods of evaporation are as follows: First, by the use of open kettles, over a direct fire, from two to six kettles being used. Starting from the mill the juice is carried from the first kettle into a second, and then into a third kettle as it increases in density through evaporation until it becomes sirup of about 25° Beaumé before it reaches the last kettle or strike pan, where it is further boiled until it shows signs of crystallization, when it is removed to cooling troughs for granulation and afterward to hogsheads with purging holes for drainage. When sufficiently purged of molasses the product enters the market as open-kettle sugar. Second, with the process of steam train, open metal tanks with steam coils are used instead of kettles and direct heat (seldom more than three tanks are used with separate strike pans). The juice leaving the clarifiers enters the first evaporator and as it increases in density is carried into the second, and then into the third evaporator, from which it is pumped into the strike pan at about 25° Beaumé and boiled by further use of the coils until it shows signs of crystallization, when it is removed to coolers and treated as open-kettle sugars. Many producers using steam trains granulate their sugar by vacuum pans and centrifugals and make first and second instead of open-kettle sugar; again, many open-kettle producers have separate strike pans with steam coils, and certain others boil to sirup of 25° Beaumé and granulate by vacuum pan and centrifugals.

The third and last method of evaporation by vacuum, single, double, and triple effect, is alike in some respects to the steam train except that the receptacles or evaporators are covered and air-tight with vacuum produced through pumps, causing the juice to boil and evaporation to take place at a lower temperature, 140° to 170° F. against 212° F. or over in open pans. Steam coils are also used here. The vapor of the first effect becomes the heating power of the second and so continues through the several evaporators. This method also brings sirup to the density of 25° or 26° Beaumé when it enters the vacuum pan for granulation.

In the classification of the sugar producers, for office purposes, there are two kinds of vacuum pan and open-kettle sugar producers, namely, those who make their sugar at factories owned and operated by themselves and those who have their sugar made at factories not owned or operated by themselves. Some producers make sirup at one factory which they own and have it granulated at another factory, often a central factory.

22,986 samples of sugar were received at the classification room at New Orleans during the year ended September 30, 1893, of which number, including those forwarded to the laboratory at this office after the closing of the laboratory at New Orleans, June 1, 1893, 8,364 samples were subjected to polariscopic test.

There were weighed in the district of Louisiana last season 22,987 lots of sugar, averaging 50 packages to the lot.

BEET-SUGAR FACTORIES.

The sugar-producing season of 1892-'93 commenced July 31 with beets. The Chino Valley Beet Sugar Company, Chino, Cal., commenced on that date.

Six beet-sugar factories were in operation during the past year, as follows: The Utah Sugar Company, Lehi, Utah; Alameda Sugar Company, Alvarado, Cal.; Western Beet Sugar Company, Watsonville, Cal.; Chino Valley Beet Sugar Company, Chino, Cal.; Oxnard Beet Sugar Company, Grand Island, Neb., and Norfolk Beet Sugar Company, Norfolk, Neb.

The same companies have been licensed for the year 1893-'94, and also the firm of O. K. Lapham & Co., Staunton, Va.

The amount of beet sugar produced in the United States during the season of 1892-'93 was 27,083,288 pounds.

Sugar produced testing 90° or over by the polariscope.....	pounds.....	22,962,516
Sugar produced testing 80° to 90°.....	do.....	4,120,772

Total.....do..... 27,083,288

Total bounty paid.....\$531,363.81

A comparison of the production with that of the previous year by localities shows that the greatest increase in production was in California, as follows:

Place of production.	Production.	
	1891-'92.	1892-'93.
	Pounds.	Pounds.
Utah.....	1,094,900	1,474,509
California.....	8,175,438	21,861,288
Nebraska.....	2,734,500	3,808,500
Total.....	12,004,838	27,083,288
Increase of production of 1892 over 1891.....		15,078,450

The three beet-sugar factories in California consumed 9,070 acres of beets, making 2,403.7 pounds of sugar per acre of beets.

The two Nebraska factories consumed 2,968 acres of beets, making 1,283.2 pounds of sugar per acre.

The Utah factory consumed 1,090 acres of beets, making 1,351.8 pounds of sugar per acre.

The tons of beets consumed in the production of sugar was as follows:

California.....	95,703.9
Nebraska.....	23,367.5
Utah.....	9,816
Total.....	128,887.4

The beet-sugar factories reported 24,793 acres of beets under cultivation for this year's crop and estimated the amount of sugar to be produced at 57,200,000 pounds.

H. Ex. 4—13

The following is a statement of the acres under cultivation in each State and the estimated production:

BEET SUGAR, 1893-'94.

	Acres of beets under cultivation.	Sugar pro- posed to be produced.
		<i>Pounds.</i>
Utah	3,500	6,000,000
California	15,993	43,500,000
Nebraska	4,900	7,000,000
Virginia	400	700,000
Total	24,793	57,200,000

The estimate of production made by the producers at the date of application for license is always in excess of the actual result. It is what they hope to make if all conditions are favorable. The quantity of beets consumed in manufacture does not equal that under cultivation. There is a loss on account of improper cultivation, from insects or the elements—frost, excessive rains, winds, etc.—so that all the beets cultivated will not be used for making sugar. There were 17,314 acres cultivated last year and the factories proposed to make 48,500,000 pounds of sugar. The result showed 13,128 acres consumed and 27,083,288 pounds of sugar produced. The per cent of sugar contained in the beets can not be determined in advance. The condition of the beets now being harvested for this year's crop is for the most part good. The actual production of sugar will probably reach 40,000,000 or 45,000,000 pounds judging from the present outlook.

SUGAR MADE FROM SORGHUM.

There were only two sorghum-sugar factories in operation during the past year: the Medicine Lodge Sugar Company, Limited, Medicine Lodge, Kan., and the Parkinson Sugar Company, Fort Scott, Kan. They were in operation an average of forty-nine and one-half days, produced 1,026,100 pounds of sugar, and received \$19,798 as bounty.* They have been licensed for the current year and report 3,953 acres of cane under cultivation.

* Besides this the sum of \$19 was paid to a producer in Minnesota, licensed last year.

The following is a summary of their operations last year:

SUMMARY STATEMENT OF OPERATIONS OF LICENSED SORGHUM-SUGAR FACTORIES DURING THE YEAR ENDED JUNE 30, 1893.

Total sorghum cane ground:	
Acres	2,161.6
Tons	10,318.2
Average yield of sorghum per acre	4.8
Bags of sugar made	5,070
Sugar produced:	
Testing 90° and over	837,300
Testing not less than 80° but less than 90°	188,800
Total	1,026,100
Quantity of sugar produced per acre	474.8
Quantity of sugar produced per ton of cane	99.4
Molasses made	141,918
Average number of days in operation	49.5
Total number of employes	125
Sugar in process of manufacture carried over until next season, estimated pounds	10,000

The production of sugar for the current year will not be as large as last year on account of the unfavorable season. The dry weather operated adversely and the cane was damaged by "chinch bugs."

SUMMARY STATEMENT RELATIVE TO MAPLE SUGAR PRODUCTION FOR THE SEASON OF 1892.

Number of licensed producers of sugar from maple sap	4,240
Number who made claims for bounty	3,046
Number receiving bounty	2,817
Total bounty paid	\$62,585.06
Number of maple trees tapped by producers receiving bounty	2,197,716

Sugar produced upon which bounty was paid:	
Testing 90° and over, at 2 cents per pound	299,865
Testing 80° to 90°, at 1½ cents per pound	3,233,737
Sugar made by producers receiving bounty testing less than 80° not entitled to bounty	137,819

Total sugar made by producers receiving bounty	3,671,421
Sirup not made into sugar by producers receiving bounty	61,871
Average amount of sugar made per tree tapped	1.67+

NOTE.—The sirup not made into sugar is equivalent to 494,968 pounds of sugar, reckoning 8 pounds of sugar to 1 gallon of sirup. Adding this to the sugar produced by parties receiving bounty makes a total of 4,166,389 pounds, and the average amount of sugar per tree 1.89+ pounds.

VI.—QUANTITIES OF CANE SUGAR PRODUCED IN THE UNITED STATES DURING THE PAST TEN YEARS, FROM 1884 TO 1893, INCLUSIVE.

[From Statistical Abstract of the United States, 1892, p. 221, except for the year 1892-'93. The figures for that year are from reports made to the Commissioner of Internal Revenue.]

Year.	Pounds.	Tons of 2,240 pounds.
1883-'84.....	302,044,230	135,243
1884-'85.....	225,062,903	100,876
1885-'86.....	302,754,486	135,158
1886-'87.....	191,282,272	85,394
1887-'88.....	375,904,197	167,814
1888-'89.....	344,756,221	153,909
1889-'90.....	305,766,271	136,503
1890-'91.....	497,169,856	221,951
1891-'92.....	370,579,307	165,437
1892-'93.....	455,141,381	203,188

The year 1890-'91 was an exceptional year, if not altogether unprecedented, in its phenomenal yield of sugar per acre. The aggregate of the crop was the largest ever made except in 1861 (Bouchereau's report).

The shortness of the crop of 1891-'92 was due to inferiority of seed, unfavorable weather, and extra quantity of seed put down for the next

year's crop (Bouchereau's report). The figures for that year as given in the Statistical Abstract are somewhat larger than those reported to the Commissioner of Internal Revenue. The Commissioner's report (1892) stated the reported production as 367,752,306 pounds. Bounty was paid on 364,829,411 pounds.

DIVISION OF CHEMISTRY.

The chemical work in connection with internal revenue laws and regulations, was carried out essentially in the same way as in the preceding fiscal year. The testing of sugar was performed mainly at laboratories located in the sugar-producing districts under the control of the collectors of such districts, and partly at the central laboratory in Washington. All the samples of maple sugar produced outside of the New England States were tested this year at Washington, the laboratory at Syracuse, N. Y., having been discontinued.

SUGAR WORK.

The following table shows the number of samples of sugar tested, and the number of tests made in the different laboratories:

NOTE.—The following example is given as an illustration of the use that can be made of Table C in connection with Table E in ascertaining the collections, approximately, for each State and Territory, on spirits, tobacco, fermented liquors, etc., for any year from 1884 to 1893, when such information is desired and a report for that year is not at hand. In the calculation of the percentages there is always a remainder. Hence, in reversing the process and multiplying the per cent (quotient) by the divisor the product will not equal the dividend exactly, but it will be so near to it as to answer most practical purposes.

The per cent of spirits for Illinois in 1885 was .304346. (See p. 246, Rep. 1890.) The total collections on spirits in the United States that year were \$67,511,208.63. (See p. 333, Rep. 1890.) \$67,511,208.63 × .304346 = \$20,546,766.30. The actual collections were \$20,546,765.19 (see p. 27, Rep. 1885), showing a difference of only \$1.11 between the actual collections and the collections as obtained by calculation.

* Balance of collections not reported prior to final settlement of the collector's account.

D.—APPENDIX NO. 1, SHOWING THE DIFFERENCES BETWEEN THE INTERNAL-REVENUE COLLECTIONS IN THE DISTRICTS, STATES, TERRITORIES, AND YEARS BELOW NAMED, AS REPORTED BY COLLECTORS AND PUBLISHED IN THE SEVERAL ANNUAL REPORTS OF THE COMMISSIONER, AND THE TRUE COLLECTIONS.

[NOTE.—These differences were mostly discovered at the final settlement of the accounts of such collectors as have retired from office after the reports for the years in which they occurred had been printed. Hence their appearance in this form.

To ascertain the exact amount collected in any one of the following-named districts, States, or Territories prior to July 1, 1892, add to or subtract from, as the case may be, the collections for that district, State, or Territory in the "total" column in Table D, the sum or sums entered opposite the same district, State, or Territory in this appendix. The result will be the aggregate amount collected.

On pages 330-333 the signs (+) and (−) are used to denote the amounts to be added and subtracted, respectively.]

*A part of the first proviso of section 59, act of July 20, 1863, reads as follows: "A tax of \$4 on each barrel, counting 40 gallons of proof spirits to the barrel, shall be assessed and collected from the owner of any distilled spirits which may be in bonded warehouse at the date of the taking effect of this act, to be paid whenever the same shall be withdrawn from such warehouse." This proviso, in effect, makes the tax 60 cents per gallon on 24,383,951 gallons in warehouse at the time of the passage of that act.

Section 56 of act approved July 20, 1863, provided that all distilled spirits in bonded warehouse at the time of the passage of that act not withdrawn within nine months should be forfeited to the United States. The act of April 10, 1869, extended the time of the withdrawal of such spirits to June 30, 1869, but imposed a tax of 1 cent per gallon for each month after April 20, 1869. The receipts on account of this additional tax were \$51,695.27.

NOTE.—The act of July 1, 1862, went into operation September 1, 1862. The act of March 3, 1863, provided that the tax on fermented liquors should be 60 cents per barrel from the date of the passage of that act to April 1, 1864. Hence the tax of 60 cents per barrel having expired by limitation April 1, 1864, the tax of \$1 per barrel under act of July 1, 1862, was again revived, and this rate, under different acts, has continued in force from and including that date.
