WASHINGTON : 1957

LETTER OF TRANSMITTAL

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., October 22, 1957.

SIR: In compliance with the provisions of section 6108 of the Internal Revenue Code of 1954, which states that statistics shall be published annually with respect to the operation of income tax laws, I have the honor to submit this report for *Statistics of Income—1954, Individual Income Tax Returns for 1954*. Information relative to sources of income, items of deductions, exemptions, tax credits, and tax liability is tabulated by various classifications of income and taxpayers.

Emphasis has been given to several new features of the 1954 Code, such as exclusions from gross income for sick pay and dividends, retirement income and medical costs for significant age groups, contributions in excess of 20 percent of adjusted gross income, and the marital status for a surviving spouse. As the amount of taxable income was either reported or computed for each type of individual return, it was possible for the first time to classify the returns by the size of the tax base and to group them according to the applicable tax rate.

Respectfully,

RUSSELL C. HARRINGTON,
Commissioner of Internal Revenue.

HONORABLE ROBERT B. ANDERSON,
Secretary of the Treasury.

OTHER STATISTICS OF INCOME PUBLICATIONS FOR 1954

Corporations	<i>Preliminary Statistics of Income, 1954—Corporation Income Tax Returns</i>
	Income statements, balance sheets, tax, dividends paid; classified by major industry groups. Historical summary of total compiled receipts, profit or loss, taxes, dividends paid by net income status, 1950-54. (39 pp., 30¢)
	<i>Statistics of Income, 1954—Corporation Income Tax Returns</i>
	Income statements, balance sheets, taxes, dividends paid, tax credit. Classifications by industry groups, size of net income, size of total assets, accounting periods, accounting and inventory valuation methods. Special tables on beginning and ending inventories of manufacturing and trade corporations, cash dividends paid, corporations filing first returns, returns with foreign tax credits, Western Hemisphere trade corporations, personal holding companies. Historical summary 1945-54.
Individuals	<i>Preliminary Statistics of Income, 1954—Individual Income Tax Returns</i>
	Adjusted gross income, taxable income, income tax liability, sources of income, exemptions, tax credits, itemized nonbusiness deductions; classified by size of adjusted gross income. Selected sources of income by States and Territories. (20 pp., 20¢)
Fiduciaries	<i>Statistics of Income, 1954—Fiduciary Income Tax Returns</i>
	Total income, taxable income, income tax, sources of income, deductions, exemptions; classified by size of total income. Selected sources of income by States and Territories. Taxable income and income tax by size of taxable income.
Estates	<i>Statistics of Income, 1954—Estate Tax Returns</i>
	Gross estate, deductions, net estate, taxes, and tax credits. Classifications by size of gross estate, size of net estate before specific exemptions. Selected estate tax data by States and Territories. (26 pp., 25¢)

FOR 1953

(Subjects not included for 1954)

Sole proprietorships	<i>Statistics of Income for 1953, Part 1, Individual Income Tax Returns, Estate Tax Returns, Gift Tax Returns</i>
	Sole proprietorship income, business receipts, net profit or loss. Classifications by size of total receipts, industry groups. (138 pp., 75¢)
Partnerships	<i>Statistics of Income, 1953—Partnership Returns</i>
	Partnership receipts, deductions, profit and loss, assets, liabilities. Classifications by industry groups, size of ordinary net income or deficit, size of total receipts. Frequency of returns by year of organization, new or successor business. Self-employment income and family partnership data. (62 pp., 45¢)
Farmers' cooperatives	<i>Statistics of Income, 1953—Farmers' Cooperative Income Tax Returns</i>
	Receipts, deductions, net income or deficit, tax, assets, liabilities, special deductions and adjustments. Classifications by size of business receipts, size of total assets, net income status, States and Territories, type of service performed, exemption status. (42 pp., 40¢)
Gifts	<i>Statistics of Income for 1953, Part 1, Individual Income Tax Returns, Estate Tax Returns, Gift Tax Returns</i>
	Total gifts, exclusions, deductions, net gifts, tax. Classifications by size of net gifts, size of total gifts plus gift tax, tax status, type of property. (138 pp., 75¢)

INTRODUCTION

This is one of several reports issued for *Statistics of Income—1954* in which data for Individual Income Tax Returns are published in a separate volume. Formerly, statistical data for individual income tax returns were included in the annual report, *Statistics of Income, Part 1*.

Information in this report was taken from individual income tax returns filed for the income year 1954 on Forms 1040, whether long- or short-forms, and on Form 1040A, the new card-form for income under \$5,000. Although these three types of returns varied in form and content, it was possible to integrate the data reported on each, so that the tabulations are a complete coverage for all individual returns.

Many new items resulted from changes in the law under the 1954 Code. Several of the text tables are devoted to such features. In addition, there are sixteen basic tables giving comprehensive data distributed by significant classifications. No data were compiled this year from the business schedule C or the farm schedule 1040F attached to the return of a sole proprietor. Following the basic tables, there are six historical tables with important information assembled for the most recent 10-year period.

A brief synopsis of the tax law, relating to individual income under recent acts, covering filing requirements, exemptions, income tax and self-employment tax rates, follows the statistical tables.

Facsimiles of Individual Income Tax Returns, Form 1040 and Form 1040A, for 1954 are inserted at the end of the report.

On August 21, 1957, a *Preliminary Report, Statistics of Income—1954, Individual Income Tax Returns* was issued containing four tables which are included in this report without change as tables 1, 4, 5, and 13.

INDIVIDUAL INCOME TAX RETURNS FOR 1954

CHARACTERISTICS OF THE YEAR

The total number of individual income tax returns filed for the income year 1954 was 56.7 million, a decrease of over one million from the all-time high filed for 1953. There were 42.6 million returns with income tax after credits and 14.1 million with no income tax liability for 1954.

Adjusted gross income of \$230.2 billion, reported on 56.3 million returns, was larger than for any previous year. This adjusted gross income exceeded that for 1953 by nearly \$400 million, even though there were 1.1 million fewer 1954 returns with adjusted gross income. An adjusted gross deficit of \$1 billion was reported on over 400 thousand 1954 returns with no adjusted gross income. This deficit was 12 percent less than that for the previous year although there was a 4 percent increase in the number of deficit returns for 1954. The net amount of adjusted gross income for the 56.7 million 1954 returns was \$229.2 billion, which was about \$500 million above the corresponding amount for 1953.

Taxable income, the tax base under the 1954 Code, was \$115.3 billion on 42.8 million returns, some of which had no income tax liability after credits. Unlike 1953, the tax base was either reported on or computed for each 1954 return.

Table A.—NUMBER OF RETURNS, INCOME, DEFICIT, AND TAXES: 1954 AND 1953

Items	1954	1953 (adjusted)	Increase or decrease	
			Number or amount	Percent
All returns:				
Number of returns.....	56,747,008	57,838,184	-1,091,176	-1.9
Adjusted gross income thousand dollars..	230,235,855	229,863,409	+372,446	+.2
Adjusted gross deficit thousand dollars..	1,014,480	1,155,153	-140,673	-12.2
Self-employment tax thousand dollars..	301,498	226,614	+74,884	+33.0
Taxable returns:				
Number of returns.....	42,633,060	44,159,622	-1,526,562	-3.5
Adjusted gross income thousand dollars..	209,668,830	210,483,602	-814,772	-.4
Income tax.....thousand dollars..	26,665,753	29,430,659	-2,764,906	-9.4
Nontaxable returns:				
Total number of returns.....	14,113,948	13,678,562	+435,386	+3.2
With adjusted gross income:				
Number of returns.....	13,673,644	13,256,263	+417,381	+3.1
Adjusted gross income thousand dollars..	20,567,025	19,379,807	+1,187,218	+6.1
With no adjusted gross income:				
Number of returns.....	440,304	422,299	+18,005	+4.3
Adjusted gross deficit thousand dollars..	1,014,480	1,155,153	-140,673	-12.2

Income tax liability for 1954, reported on 42.6 million taxable returns, was \$26.7 billion after the tax credits were deducted. The income tax after credits was 9 percent, or \$2.8 billion, below that for 1953. Several reasons contribute to the decrease. Direct causes were 1.5 million fewer returns with income tax for 1954, lower

income tax rates than for 1953, and two new tax credits granted under the 1954 Code. Other contributing causes were liberalized nonbusiness deductions and exemptions for dependents, and the broadened scope of taxpayers entitled to use split-income or the head of household rate.

The total tax credits claimed amounted to \$208 million, 11 percent of which occurred on returns with no income tax liability after credits, that is, nontaxable returns. The tax credit for dividends received of \$118 million was reported on 2.5 million returns. This was more than two-thirds of the returns showing an amount of dividends in adjusted gross income. Retirement income credit, reported on less than one-half million returns, amounted to \$71.2 million, of which 29 percent was on nontaxable returns. The remaining tax credits of \$18.8 million for foreign tax paid, tax paid at source, and for partially tax-exempt interest were practically all on taxable returns.

Self-employment tax imposed on self-employment income of individuals was reported on 4.2 million returns for 1954. The self-employment tax amounted to \$301.5 million, which is about \$75 million greater than the self-employment tax for 1953. The rate for 1954 was 3 percent, three-fourths of 1 percent higher than last year.

In text table A above, there is a comparison of 1954 and 1953 data for the number of returns, adjusted gross income and deficit, income tax, and self-employment tax, stating the increase or decrease over 1953. The classification of taxable and nontaxable returns was based on the presence or absence of an income tax liability after credits. The 1953 data in this comparison have been adjusted, since this classification for the 1953 tabulations, as published originally, related to total tax liability, i. e., income tax and self-employment tax.

The alternative income tax for 1954, reported on returns in the higher income classes which had a net long-term capital gain in excess of the net short-term capital loss, was \$2.4 billion. The number of returns with this tax for 1954 was nearly 5,000 greater than the number for 1953, and the tax was \$400 million greater, reflecting the increase in long-term capital gain for 1954.

The optional tax table was used to determine the income tax on 33 million returns with adjusted gross income under \$5,000 for 1954.

Part or all of the income tax on 1954 returns was paid under the current taxpayment method by tax withheld from wages or by payments on declaration of estimated tax. These payments amounted to \$27.7 billion; however, there were tax overpayments to the extent of \$3.7 billion on approximately 35 million returns. Self-

employment tax was not paid currently but, if the income tax was overpaid, no refund was available until the self-employment tax was satisfied. Refunds requested were \$3 billion and credit on 1955 estimated tax was \$700 million.

Adjusted gross income is a legally defined term and the amount may be less than the total of all income received by the taxpayer throughout the year. Three major reasons were responsible for this occurrence for 1954: (1) certain types of income, such as interest received on State and municipal bonds, are tax-exempt, (2) specific sources of income, such as salaries and wages, dividends received, and long-term capital gain, have certain legal limitations which can reduce the amounts received when they are included in adjusted gross income, and (3) most sources which result in a loss, instead of a gain or profit, can be subtracted when computing the composite adjusted gross income. Some of the outstanding features of the components of the 1954 adjusted gross income follow.

Salaries and wages reported in adjusted gross income for 1954 amounted to \$186 billion. These salaries and wages were exclusive of the wages received under wage continuation plans for sickness or injury which, under the new Code, are excludable from gross income. Salaries and wages included in adjusted gross income for 1954 were \$1.8 billion below the amount reported for 1953, and there were nearly 1 million less returns with salaries and wages than there were in the 1953 report. The amount of wages excluded from gross income on account of sick pay is tabulated in text table E and discussed under Salary Exclusions for Sick Pay, page 12.

Dividends received from corporate stock and included in adjusted gross income for 1954 amounted to \$7 billion. This amount, reported on Form 1040, was exclusive of dividends that qualified for the exclusion from gross income of dividends up to \$50, allowed under the new Code to each individual taxpayer (on joint returns, up to \$100 if both spouses received such dividends). The increase of \$1.2 billion of dividends in adjusted gross income for 1954 over the amount reported for 1953 was, to a large degree, the result of a change in method of reporting dividends received by beneficiaries from estates and trusts and by partners from their partnerships. For 1953, dividends received through partnerships and fiduciaries were reported as income from these entities, but for 1954, income that was accorded special treatment, such as dividends, retained its character and was reported separately.

Among the 1954 returns under \$5,000 adjusted gross income, 1 return in 28 had dividends in adjusted gross income, while 1 in every 7 returns with adjusted gross income of \$5,000 or more had dividends. In each case, the occurrence is less frequent than in 1953. The reduced frequency of dividend occurrence in 1954 was, to some extent, a result of the fact that receipt of dividends totaling less than the allowable dividend exclusion did not enter into the composition of adjusted gross

income. Additional information relating to dividends will be found under the section for Dividends Received, on pages 12-15.

The decrease of \$1 billion in the income from estates and trusts for 1954 resulted principally from the separation of dividends received by beneficiaries from the other fiduciary income received.

Interest received during 1954 income year was \$2.4 billion, an increase of 16 percent over that reported for 1953. Annuities and pensions for 1954 showed an increase of \$135 million, or 20 percent.

In determining the income received from businesses, partnerships, rents and royalties, sales of capital assets, and sales of property other than capital assets, both the income and loss from each type of transaction should be considered. Combining these positive and negative amounts resulted, for 1954, in a business profit, partnership profit, rent and royalty income, gain from sale of capital assets, and a loss from sales of property other than capital assets. Both business and partnership profits increased for 1954, but the rent and royalty income showed a slight decrease, as compared with 1953. Gain on the sale of all types of capital assets showed an exceptionally large increase of 62 percent over 1953. The loss from sales of property other than capital assets was smaller than for 1953. The net operating loss deduction was 28 percent less than that reported for 1953.

Standard deduction was elected by taxpayers on 41 million returns for 1954, or 72 percent of all returns filed. However, the proportion of standard deduction returns has been decreasing steadily for several years.

More than two-thirds of the itemized deduction returns for 1954 had interest paid and 93 percent showed a deduction for State and local taxes paid.

The deduction for contributions amounted to \$3.9 billion which was an increase of more than 9 percent over the deduction for 1953. This increase may be attributable to the increased allowance under the 1954 Code for contributions and gifts to hospitals, churches, and educational institutions, and to the contributions deducted by 1.1 million more persons claiming contributions on 1954 returns. A deduction was claimed on 93 percent of the itemized returns. The allowable deduction for contributions in excess of 20 percent of adjusted gross income is tabulated in text table H; and other features regarding the extra deduction are stated in the text under Contributions, page 15.

Medical expenses were deducted on 8.6 million, or 55 percent, of the 1954 returns with itemized deductions. There were 1.4 million more returns with this deduction than in the previous year. The medical deduction for 1954 amounted to nearly \$3 billion, which was an increase of \$600 million, or 24 percent, above the 1953 deduction. The increase was the result of the liberalized medical deduction under the 1954 Code which raised the amount of maximum deduction and lowered the excluded amount of such expenses from 5 to 3 percent of adjusted gross income. The latter enabled more tax-

payers to claim the deduction. The average medical deduction per return was \$344 for the 1954 returns, as compared with \$330 for the 1953 returns. The entire medical costs reported on the 1954 returns are set forth later in the text under the section for Drug and Medical Costs, together with its accompanying text table I, pages 16 and 17.

The new allowance for child care was claimed on 272,737 returns and the deduction amounted to \$88.7 million. Casualty losses showed an increase of 13 percent over the 1953 losses.

In connection with the claim for retirement income credit against the income tax, data relating to the income of retired persons are available on the 1954 returns. Of the 493,418 persons with this tax credit, more than 433,000 were 65 or more years of age. Further information about retired taxpayers is given in the section of the text on Retirement Income and text tables J and K, pages 17-19.

In chart 1, data from returns with adjusted gross income for 1954 illustrate the proportion of total returns, total adjusted gross income, and total income tax which was contributed by each of the three following adjusted gross income groups: Under \$5,000, \$5,000 under \$10,000, and \$10,000 or more.

The lowest income group, adjusted gross income under \$5,000, had 74 percent of all the returns with adjusted gross income, which is one-half of 1 percent less than for 1953. Adjusted gross income was 46 percent of the total adjusted gross income, or 1 percent less than

for 1953. Income tax was 28 percent of the total income tax, or 2 percent less than for 1953.

The middle income group, adjusted gross income \$5,000 under \$10,000, contributed 22 percent of the returns with adjusted gross income. Although this is a slight increase over the proportion contributed by this group for 1953, the number of returns for 1954 actually decreased by 120,652. The adjusted gross income was 35.5 percent of the total, a proportion slightly smaller than for the previous year. Income tax was 34.6 percent of the total income tax, but it is about 1 percent below the corresponding tax reported for 1953.

The highest income group, adjusted gross income \$10,000 or more, contributed nearly 4 percent of the returns with adjusted gross income. This group has had a steady, though small, increase annually since 1949 in the proportion of returns contributed. There was an increase of 127,463 returns for 1954 over 1953. This income group accounted for more than 18 percent of the adjusted gross income, as compared with less than 17 percent for 1953. The dollar increase in adjusted gross income for 1954 was \$3.3 billion. The proportion of adjusted gross income contributed by this group is the largest since 1949. Of the total income tax, this group reported over 37 percent, which is nearly 3 percent more than the 1953 proportion. However, there was a decrease in the 1954 amount of income tax, which was also a characteristic of the other two groups.

For the past few years, the lowest income group, adjusted gross income under \$5,000, has continued to show a decline in the proportion contributed toward the total

Chart 1.—RETURNS WITH ADJUSTED GROSS INCOME, BY INCOME GROUPS, 1954

of each item compared. However, the trend in the proportion contributed by each of the two higher income groups has changed somewhat for 1954. The middle income group, adjusted gross income \$5,000 under \$10,000, shows, for the first time since 1949, a decrease in the proportion of adjusted gross income and of income tax. The highest income group, adjusted gross income \$10,000 or more, shows an increase in the proportion of adjusted gross income and of tax for the first time since 1950.

COMPOSITION OF ADJUSTED GROSS INCOME

The principal sources of income comprising adjusted gross income for 1954 are shown in chart 2 by their percentage relationship to adjusted gross income. The four largest sources—salaries and wages, business, partnership, and dividends—are allotted separate areas. The remaining income, which is grouped together, includes interest, annuities and pensions, income and loss from estates and trusts, net income and net loss from rents and royalties, net gain and the deductible loss from sales of capital assets and other property, net operating loss deduction, and the other sources as reported in adjusted gross income.

Eighty-one percent of adjusted gross income consists of salaries and wages. Business and partnership enterprises together form 11 percent of adjusted gross income and dividends contribute 3 percent. The components of adjusted gross income for 1954 changed very little percentagewise when compared with their respective proportion of the 1953 adjusted gross income.

Chart 2.—COMPOSITION OF ADJUSTED GROSS INCOME, 1954

INDIVIDUAL INCOME TAX PROVISIONS FOR 1954

The Internal Revenue Code of 1954 revised the internal revenue laws relating to the individual income

tax in many respects. Several of these changes affect the inclusion and exclusion of income items comprising gross income and consequently the amount of adjusted gross income to be reported. Nonbusiness deductions are altered in some cases and a new deduction is allowed. Tax credits in addition to those formerly permitted are provided. Definitions of some of the basic concepts are revised including that for dependents and a new marital status is created. It is not possible to state all of the numerous changes, but there are specified below some of the important revisions which affect statistical data tabulated from individual income tax returns for 1954.

Income tax provisions of the 1954 Code apply to income of individuals only with respect to tax years beginning after December 31, 1953, and ended after the date of enactment, August 16, 1954.

The amount of gross income for which a return of income must be filed by an individual 65 years of age or over, unless self-employed, is raised from \$600 to \$1,200.

The income tax rates applicable to 1954 income are lower than those applicable to 1953 income. For years beginning after December 31, 1953, two legislative actions are effective: (1) The graduated surtax rates were reduced slightly by an amendment to the 1939 Code, and (2) in the 1954 Code, the 3 percent normal tax and the reduced surtax are combined into a single comprehensive rate schedule. For 1953 income, the normal tax was 3 percent and the graduated surtax ranged from 19.2 percent to 89 percent. For 1954 income, according to the amendment to the 1939 Code, the normal tax was 3 percent and the graduated surtax rates were reduced so that they ranged from 17 percent to 88 percent. However, in the 1954 Code, the two latter sets of rates are combined into a single rate schedule, applicable to taxable income, ranging from 20 percent to 91 percent.

Three new credits against the income tax liability are permitted under the new Code. The retirement income credit is equal to 20 percent of the amount of retirement income up to \$1,200, but cannot exceed the tax otherwise due. Credit for dividends received is allowed on returns with tax year ended after July 31, 1954, in an amount equal to 4 percent of the domestic dividends (after exclusion) received subsequent to that date; however, the credit may not exceed the lesser of the total tax reduced by the foreign tax credit or an amount equal to 2 percent of taxable income for 1954 (4 percent in subsequent years). Tax credit for partially tax-exempt interest (allowed only if deductions are itemized) in the amount of 3 percent of such interest replaces the prior deduction from net income for normal tax purposes.

The new law eliminates the concept of net income, of normal tax net income, and of surtax net income and in place of these substitutes taxable income which means adjusted gross income less deductions, standard or itemized, and personal exemptions which are now a deduction in computing taxable income.

The new legislation makes changes which affect the

inclusion in gross income of amounts received from dividends, annuities, prizes and awards, alimony and separate maintenance payments, proceeds of life insurance, employee's death benefits, and income earned over a period of years.

Items specifically excluded from gross income are a partial exclusion of qualifying domestic dividends received, amounts received by employees under a wage continuation plan for loss of wages due to illness or personal injury to the extent of \$100 per week, and scholarship and fellowship grants with certain limitations.

The definition of adjusted gross income is modified in the case of employees to allow deduction from gross income of expenses as outside salesmen and non-reimbursed transportation expenses for local travel in connection with one's employment.

A new itemized deduction is granted for a working woman or widower for the care of a dependent child or stepchild under 12 years of age or of a dependent physically or mentally incapable of caring for himself. The care must be for the purpose of enabling the taxpayer to be employed. The deduction is limited to \$600. In case of a working wife, the deduction is allowed only if she files a joint return with her husband and the \$600 limitation is reduced by the amount by which their combined adjusted gross income exceeds \$4,500, except where the husband is incapable of self-support.

The limit on the amount of deduction allowed for charitable contributions and gifts is raised under the new law by allowing an additional amount equal to 10 percent of adjusted gross income, if the excess contributions represent contributions to churches or tax-exempt hospitals and educational institutions.

The new law allows deduction for medical expenses that are in excess of 3 percent (formerly 5 percent) of adjusted gross income, but permits the inclusion of drugs and medicines only to the extent that they exceed one percent of adjusted gross income. Also, the limitation on the maximum deduction for medical expenses is raised to \$2,500 per exemption other than age or blindness, with a maximum deduction of \$5,000 in the case of a single person or a married person filing a separate return, and a maximum deduction of \$10,000 in the case of married persons filing a joint return, or of a head of household, or of a surviving spouse.

The qualifications for head of household status are broadened to include any taxpayer who supports a dependent parent even though not living in the taxpayer's home, if the taxpayer provides over one-half the cost of the household which is the parent's principal abode.

The new Code allows a surviving spouse the full benefit of income splitting for 2 years following the death of a spouse, provided he has not remarried and maintains a household as his home which is also the principal abode for a child or stepchild for whom the taxpayer is entitled to the \$600 deduction for personal exemption.

The concept of dependent is liberalized in several re-

spects. The \$600 gross income test is eliminated for a child or a stepchild who is under 19 years of age or who, regardless of age, is a student at an educational institution. In addition, the new law adds to the list of those who may qualify as a dependent, any person supported by the taxpayer whose principal abode is the home of the taxpayer and who is a member of the taxpayer's household. Also, residents of Panama or the Canal Zone may be dependents if they otherwise qualify. Two changes in the support test for determining dependency are introduced. First, in cases where a group of taxpayers support a dependent, no one of whom contributes over one-half of the support, the dependency may be assigned to any one of the group who contributes over 10 percent of the support, if all other persons who contributed more than 10 percent agree in writing that they will not claim the dependent for that year. Second, in case of a child or stepchild of the taxpayer, amounts received as scholarships will not be taken into account in determining whether the taxpayer provided over half of the child's support.

The measurement of business income is modified by the more liberalized provisions relating to business deductions for depreciation, research and experimental expenses, soil and water conservation expenditures made by farmers, loss carryovers, and organizational expenses. Also, depletion and related allowances for mining and natural resource industries are revised.

The business enterprise of a sole proprietor may be taxed as if it were a corporation when the owner elects the option to be so taxed.

The self-employment tax rate of 3 percent on the 1954 self-employment income subject to this tax was carried into the new Code from the 1939 Code without change; however, this is an increase over the $2\frac{1}{4}$ percent rate applicable to 1953 self-employment income.

RETURNS FROM WHICH DATA WERE TABULATED

Individual income tax returns used to compile data for this report were unaudited returns and, therefore, do not reflect increases nor decreases in tax liability, income, deductions, or other items reported by the taxpayer, that resulted from official audit of returns by the Internal Revenue Service.

Data were taken from all returns filed by citizens and resident aliens, except those with no information regarding income and tax data. Returns from which data were tabulated included returns of adults and of dependent children earning less than \$600 who were nontaxable but who filed a return to claim refund of income tax withheld, although they did not meet the income requirement for the filing of a return. Also, data were taken from returns of dependent children under 19 years of age and dependent students who reported \$600 or more of income, whether taxable or nontaxable, which met the requirement for filing.

The individual income tax returns used were Forms 1040 and 1040A for the 1954 income year covering calendar year returns, fiscal year returns ended within the period July 1954 through June 1955, and part year returns with the greater number of months falling in 1954. The majority of returns was for the calendar year 1954. Tentative returns were not used and amended returns were used only if the original returns were excluded. Fiscal year and part year returns beginning in 1953, and part year returns beginning in 1954 and ending before August 17, 1954, were subject to the 1939 Code. The 1954 Code applies to returns beginning after December 31, 1953 and ending after August 16, 1954.

Form 1040A, the new card-form return for 1954, was used by employees with less than \$5,000 total income consisting of wages reported on the Withholding Tax Statement, Form W-2, and not more than \$100 total of other wages, dividends, and interest. Husband and wife could file on this form if their combined incomes did not exceed these limits. Form 1040A could not be used as a separate return of a married person if one spouse itemized deductions or if divided community income was to be reported. Neither could this return form be used by an individual claiming status as head of household or as surviving widow or widower. Although exclusion for sick pay was reported on this card-form, no other deduction from salaries and wages could be made, such as deductions for transportation and out-of-town expenses, reimbursed expenses, or expenses of outside salesmen. In reporting other income on this form, dividends received from domestic corporations up to \$50 (\$100 on joint returns) were excluded but no provision was made to report the amount of the exclusion. The income tax liability of taxpayers filing on this form was determined by the district director of internal revenue, on the basis of income reported, from the optional tax table applying to 1954 income. The tax in this table made allowance for exemptions and the standard deduction which takes the place of nonbusiness deductions and tax credits.

Form 1040 for 1954, either the long-form or the short-form, was used by individuals who, by reason of the size or source of their income, were not permitted to use Form 1040A and by individuals who, although eligible to use Form 1040A, found it to their advantage to use Form 1040. To claim the new tax credit for dividends received or for retirement income, it was necessary to use Form 1040.

Individuals with adjusted gross income under \$5,000 from whatever source could elect to use the short-form return on which nonbusiness deductions were not reported, but on which allowable expenses in connection with the employer's business were deducted from salaries and wages. The income tax liability on this short-form was determined by the taxpayer from the optional tax table on the basis of adjusted gross income. The tax table made allowance for the standard deduction, ex-

emptions, and tax credits other than for dividends received and for retirement income, both of which could be claimed on the short-form return. Individuals with adjusted gross income under \$5,000 who wished to claim nonbusiness deductions in excess of the standard deduction or to claim tax credits other than dividends received and retirement income used the long-form return and itemized their deductions, deducted their exemptions, and computed the taxable income.

Individuals with adjusted gross income of \$5,000 or more used the long-form return, claimed their exemptions, and computed their taxable income. In computing the taxable income, the taxpayer could elect to use the standard deduction rather than to itemize nonbusiness deductions. If he so elected, the standard deduction was the smaller of \$1,000 or an amount equal to 10 percent of the adjusted gross income, except that, in the case of a married person filing a separate return, the standard deduction was \$500. The standard deduction was not allowed on a separate return of husband or wife if the taxable income of the other spouse was computed by using itemized deductions. When the standard deduction was used, only the two tax credits for dividends received and retirement income could be claimed.

Individuals who used the long-form return, regardless of the amount of adjusted gross income, computed their income tax liability based on taxable income, by using the income tax rates from the tax rate schedule applicable to their marital status and claiming the relevant tax credits.

Facsimiles of the 1954 individual income tax returns, Forms 1040 and 1040A, are placed at the close of this report, pages 95-127.

In text table B below, the number of individual returns for 1954 is tabulated to show the volume of returns filed on the different forms, whether they had standard deduction or itemized deductions, and the division between taxable and nontaxable returns. Of the 56.7 million returns filed, 41 million, or 72.3 percent, had the standard deduction and the remainder itemized nonbusiness deductions. Compared with 1953, the number with standard deduction decreased approximately 3 percent and the number with itemized deductions increased about 3 percent.

The total number of long-form returns was 23.6 million. On these the taxpayer computed the income tax on the basis of his taxable income. Among these returns, 7.9 million showed that the taxpayer elected to use the standard deduction in computing his taxable income.

The optional tax table applicable to total income under \$5,000 was used to determine the income tax on 13.2 million returns, Form 1040A, and on 19.9 million short-form returns, Form 1040, making a total of 33.1 million returns, or 58.4 percent of all returns filed for 1954. The optional tax was used on a smaller percentage of returns than last year.

INDIVIDUAL INCOME RETURNS FOR 1954

11

Table B.—NUMBER OF RETURNS BY FORM OF RETURN AND BY TAXABLE AND NONTAXABLE RETURNS

Form of return	Total	Taxable	Nontaxable
Total number of returns.....	56,747,008	42,633,060	14,113,948
Standard deduction:			
Form 1040A with adjusted gross income.....	13,248,741	8,796,301	4,452,440
Short-form 1040 with adjusted gross income.....	19,889,855	12,263,724	7,626,131
Long-form 1040 with adjusted gross income \$5,000 or more.....	7,906,817	7,861,205	45,612
Total.....	41,045,413	28,921,230	12,124,183
Itemized deductions (long-form):			
Returns with adjusted gross income under \$5,000.....	9,013,125	7,091,244	1,921,881
Returns with adjusted gross income \$5,000 or more.....	6,688,470	6,620,586	67,884
Total.....	15,701,595	13,711,830	1,989,765

MARITAL STATUS OF TAXPAYER

Among the individual returns for 1954, there were 34.6 million returns filed jointly by husband and wife. This group formed nearly 61 percent of all the returns. Also, there were 2.3 million returns filed by married persons who reported their respective income and claimed their own exemptions on a return separate from that of the other spouse. This marital group formed only 4 percent of the total returns.

Single persons who did not claim status as head of household or surviving spouse filed 18.7 million returns for 1954, which was 33 percent of all returns. This was the second largest group of returns among the five marital groups. The remaining 2 percent of returns for 1954 were filed by unmarried individuals, 1.1 million of whom claimed head of household status and nearly 64,000 others who claimed status as surviving widow or widower.

Seventy-seven percent of the total adjusted gross income (net) was reported on joint returns, and another 18 percent was reported on returns of single persons not claiming head of household or surviving spouse status. The joint returns showed the taxable income (tax base) to be slightly less than half of the adjusted gross income reported on them, while in all other marital groups, the tax base was more than one-half of the adjusted gross income. The taxable income is all inclusive inasmuch as this item was computed for returns where it was not reported.

Text table C shows the number of returns, amount of adjusted gross income, and taxable income for each marital status group. These data were taken from Part I of basic table 10. For tabulating purposes, the classification of marital status of taxpayer was determined with regard to such items as the listing of a spouse's name, exemption claimed for taxpayer and/or wife, signatures of husband and wife, and particularly the check mark for head of household or surviving widow or widower, along with any other pertinent data supplied by the taxpayer. Each of the five classifications for marital status of taxpayer is described under Marital Status Classification on pages 23-24.

The marital classification was used in the distribution of data in basic tables 4, 8, 10, and 11, the last two of

Table C.—NUMBER OF RETURNS, ADJUSTED GROSS INCOME, AND TAXABLE INCOME BY MARITAL STATUS OF TAXPAYER

Marital status of taxpayer	Returns		Taxable income (Thousand dollars)
	Number	Percent of total	
Joint returns of husbands and wives...	34,568,482	60.9	176,477,817
Separate returns of husbands and wives	2,298,981	4.1	6,203,322
Returns of heads of household.....	1,089,440	1.9	4,344,178
Returns of surviving spouse.....	63,920	.1	270,242
Returns of single persons not heads of household or surviving spouse.....	18,726,185	33.0	41,925,806
Total.....	56,747,008	100.0	229,221,375

which show all five marital groups separately. Table 8 shows certain of the marital groups combined according to the applicable income tax rate.

Both basic tables 10 and 11 show that there were nearly 64,000 persons who claimed status as surviving spouse. However, examination of data for returns of surviving spouse in table 11, relative to the distribution of returns by number of exemptions other than age or blindness, reveals that among the individuals who claimed marital status as surviving spouse, there are 27,513 persons who had only one exemption other than age and blindness. This would indicate that during the first year in which the surviving spouse status was allowed, a considerable number of individuals misunderstood the requirement that, to qualify there must be at least one child or stepchild dependent for whom the taxpayer is entitled to a deduction for personal exemption of \$600. None of these 27,513 persons had a dependent according to their return. It is problematical whether these individuals could have qualified for head of household status and its special tax rate, or whether they were single persons not entitled to any special tax rate. Since the 27,513 persons claimed surviving spouse status and computed their income tax by the split-income method allowed for that status, data for them are tabulated among data for returns having the split-income tax rate along with others claiming this marital status, in Part I of basic table 8.

PERSONAL EXEMPTIONS

A total of 155.5 million personal exemptions were claimed on the 56.7 million individual income tax returns for 1954. These personal exemptions were exemptions for the taxpayer and, on joint returns, his spouse, exemptions for dependents, and the additional exemptions for age and blindness. A résumé of exemptions is given on pages 27-28. Below in text table D, the number of each type of exemption claimed is presented by the five classifications for marital status of taxpayer.

There were 91.3 million exemptions for the taxpayer and, on joint returns, his wife who is generally considered a taxpayer; 58.2 million exemptions for dependents; and 6 million additional exemptions for age and blindness of taxpayer, including those for the spouse on joint returns.

Of the 58.2 million exemptions for dependents, 50 million, or 87 percent, were claimed on joint returns of

INDIVIDUAL INCOME RETURNS FOR 1954

husbands and wives. Other married persons filing separate returns claimed 1.6 million dependents.

Among the unmarried taxpayers, heads of households claimed 1.1 million dependents, surviving widows and widowers claimed 62,263, and other single persons claimed nearly 5 million dependents. Although exemptions for 27,513 individuals who claimed surviving spouse status without a dependent are tabulated in that marital group (as previously explained), it has no effect on the number of dependents in this or any other group, since they did not have a dependent.

As compared with the 1953 report, the number of dependents increased by 1.7 million in 1954. However, exemptions for age and blindness decreased, as did the taxpayer exemptions.

Table D.—NUMBER OF EXEMPTIONS BY MARITAL STATUS OF TAXPAYER AND BY TYPE OF EXEMPTION

Marital status of taxpayer	Total number of exemptions	Number of exemptions for—		
		Taxpayer	Age and blindness	Dependents
Joint returns of husbands and wives	123,675,873	69,136,964	4,104,404	50,434,505
Separate returns of husbands and wives	4,011,966	2,298,981	79,590	1,633,395
Returns of heads of household	2,253,758	1,089,440	58,497	1,105,821
Returns of surviving spouse	148,616	63,920	22,433	62,263
Returns of single persons not heads of household or surviving spouse	25,404,216	18,726,185	1,719,631	4,958,400
Total	155,494,429	91,315,490	5,984,555	58,194,384

SALARY EXCLUSIONS FOR SICK PAY

The 1954 Code specifically exempts from the income tax amounts received, as wages or in place of wages, under a continuation plan for the period during which an employee was absent from work on account of personal injury or sickness. The tax-exempt amount could not exceed a weekly rate of \$100, unless the plan was one to which the employee had contributed, then amounts received which were attributable to his contribution were excluded without limit. In case of sickness, a special rule disallowed tax exemption of amounts received for the first 7 days of illness unless the employee was hospitalized at least 1 day any time during the period of absence from work on account of sickness.

Each taxpayer was required to report his gross salary and wages and to give sufficient information to substantiate his claim for the sick-pay exclusion deducted from gross wages. The exclusion could be claimed on either Form 1040 or 1040A.

In order to register the amount of sick pay excluded on account of this new provision, it was necessary to use an item not included in adjusted gross income. The excludable portion of wages received as sick pay was tabulated especially for this purpose. Table E shows the amount of salary exclusion for sick pay in connection with the amount of salaries and wages entering into the composition of adjusted gross income, and the total salaries and wages received. This table, by adjusted gross income classes corresponding to those in basic tables, also shows the number of taxable and nontaxable returns on which a sick-pay exclusion was claimed.

There are 928,628 returns with sick-pay exclusions amounting to \$352 million deducted from gross salaries and wages. The exclusion was about two-tenths of 1 percent of gross salaries and wages. Over one-half of the sick-pay exclusion was reported on returns with adjusted gross income under \$5,000.

Table E.—SALARY EXCLUSIONS FOR SICK PAY BY ADJUSTED GROSS INCOME CLASSES

Adjusted gross income classes	Total salaries and wages received (<i>Thousand dollars</i>)	Salary exclusions for sick pay		Salaries and wages (after exclusions) (<i>Thousand dollars</i>)
		Number of returns	Amount (<i>Thousand dollars</i>)	
Taxable returns:				
\$600 under \$1,000.....	996,636	3,524	1,086	995,550
\$1,000 under \$1,500.....	2,794,266	11,520	2,087	2,792,179

See text for "Description of Sample and Limitations of Data."

¹Sample variability of this item is too large to warrant showing it separately. However, this value is included in each total.

DIVIDENDS RECEIVED

Two special tabulations were prepared to show the details concerning dividends reported on individual returns, Form 1040, for 1954. The new features, provided under the 1954 Code for a partial exclusion of dividends and for a tax credit for dividends received, necessitated the reporting of information not required in previous years.

The new Code provides that, for any tax year ended after July 31, 1954, gross income does not include amounts received by an individual as dividends from domestic corporations to the extent that the dividends do not exceed \$50. In case the dividends exceed \$50, the exclusion applies to the dividends first received in the tax year. The exclusion, however, does not apply to div-

idends received from domestic corporations whose earnings are not fully taxable.

Although dividend exclusions could be taken regardless of the return form used, the amount of exclusion was not reported on Form 1040A. If husband and wife filed a joint return of income, the exclusion applied separately to the dividends received by each as an individual taxpayer.

A credit against the income tax for dividends received is also allowed under the new law. The tax credit is allowed only for tax years ended after July 31, 1954, and only with respect to qualifying dividends received from domestic corporations after that date and included in gross income. Credit was allowed to the extent of 4 percent of such dividends, provided this credit did not exceed the lesser of the total income tax reduced by foreign tax credit, or 2 percent of taxable income. It was obligatory to file Form 1040, either long- or short-form, to claim benefit of this tax credit.

Taxpayers filing Form 1040 were required to report domestic dividends qualifying for the exclusion in two categories: those received before August 1, 1954, and those received after July 31, 1954. Qualifying dividends received through fiduciaries and partnerships were included, a new feature of dividend reporting. The dividend exclusion of \$50, or \$100 for joint income of husband and wife, was first applied to the early receipts and, if such dividends were insufficient, the remaining exclusion was then applied to the late receipts. If the taxpayer's dividend receipts totaled less than the maximum exclusion, they were nevertheless reported and the exclusion applied to that extent. Domestic dividends received after July 31, 1954, reduced by the applicable exclusions were eligible for the tax credit for dividends received. Foreign dividends and certain domestic dividends did not qualify for the exclusion nor for the tax credit. These were reported independently and combined with the dividends after exclusions to obtain the amount of dividends reported in adjusted gross income.

Table F.—DIVIDENDS ELIGIBLE FOR EXCLUSIONS AND TAX CREDIT FOR DIVIDENDS RECEIVED, BY ADJUSTED GROSS INCOME CLASSES

Adjusted gross income classes	Total dividends eligible for exclusions			Received before Aug. 1, 1954			Received after July 31, 1954 (eligible for tax credit)

See text for "Description of Sample and Limitations of Data."

*Sample variability of this item is too large to warrant showing it separately. However, this value is included in each total.

Tabulated data pertaining to dividends had to be limited to information reported on returns, Form 1040. On the Form 1040A, the amount of dividends after the exclusion was included in "other income," and the amount of the exclusion was not reported.

In text table F, the number of returns, amount of dividends eligible for exclusions, and the amount of exclusions, are tabulated for all dividends eligible for the exclusion, as well as for dividends received before August 1, 1954, and for those received after July 31, 1954. Since dividends received after July 31, 1954, less the exclusions are the only dividends eligible for the tax credit, the tax credit claimed in regard to such dividends is tabulated here. All these data are distributed by adjusted gross income classes, taxable and nontaxable, similar to those in basic tables.

Text table G shows the total amount received by individuals from domestic and foreign dividends without regard to the exclusions. It also shows the amount of dividends included in adjusted gross income and the two components of dividends actually entering into this

amount, that is, (a) dividends eligible for exclusion together with the total exclusions claimed against these dividends, and (b) dividends not eligible for exclusion or credit. These items and their frequency are presented by size of adjusted gross income separately for taxable and nontaxable returns, as in text table F.

Data in table G reveal that the total dividend receipts reported for the income year 1954 was \$7.3 billion, of which \$7 billion qualified for the exclusion and \$0.2 billion were foreign and domestic dividends ineligible for exclusion or credit. Tax-exempt dividend exclusions of \$0.2 billion reduced qualifying dividends to \$6.8 billion which together with the nonqualifying dividends of \$0.2 billion were included in adjusted gross income. Receipt of dividends was reported on 4.1 million returns, but only 3.7 million returns showed dividends in adjusted gross income.

Nearly one-half of the \$7 billion of dividends qualifying for the exclusion were also eligible for the tax credit. These dividends, amounting to \$3.4 billion (text table F), although eligible for the tax credit, did not termi-

nate in a tax credit on each of the 3.4 million returns showing eligible dividends. In some cases, small dividend receipts may have been eliminated by the applicable exclusion. Returns without an income tax before credits naturally had no credit. On other returns where the taxpayer had taxable income and income tax, he failed to take advantage of the credit benefit even though he was entitled to do so. There are 2.5 million returns that had a tax credit for dividends received, amounting to \$118 million.

CONTRIBUTIONS

Individuals who itemized their nonbusiness deductions were allowed a deduction for charitable contributions and gifts. A new provision under the 1954 Code allows a special additional deduction of up to 10 percent of adjusted gross income for contributions made to churches, associations of churches, tax-exempt educational institutions, and tax-exempt hospitals. In case all contributions are made to such organizations, a deduction up to 30 percent of adjusted gross income may be claimed. Contributions to organizations other than the above are still limited to 20 percent of adjusted gross income unless the taxpayer qualified for the unlimited deduction, retained under the new Code.

In computing the deduction for contributions the taxpayer must first figure his contributions to the special institutions to the extent of 10 percent of adjusted gross income, then any amount in excess of 10 percent can be added to the other contributions to which the 20-percent limitation applies. In reality, the deduction consists of two parts: one a deduction under the 10-percent limitation, the other a deduction under the 20-percent limitation. Both limitations apply to the combined adjusted gross income on joint returns as well as the adjusted gross income on separate returns. A description of contributions is given on pages 26-27.

Text table H was prepared to show the number of returns that had a deduction for contributions in excess of 20 percent of adjusted gross income and the amount of such excess. This was accomplished by a comparison of the amount deducted on each return with 20 percent of the reported adjusted gross income. If the deduction was found to be over 20 percent of the adjusted gross income, the number of returns with an excess and the amount of the excess were tabulated in this table along with the total number of returns with contributions and the amount deducted. These data are by classes for taxable and nontaxable returns similar to those in basic tables.

This table shows the total deduction on account of charitable contributions to be \$3.9 billion claimed on 14.6 million returns. There were 132,073 returns on which the deduction exceeded 20 percent of adjusted gross income. On these returns, the additional deduction allowed under the new provision amounted to \$67.6

Table H.—DEDUCTIBLE CONTRIBUTIONS IN EXCESS OF 20 PERCENT OF ADJUSTED GROSS INCOME BY ADJUSTED GROSS INCOME CLASSES

Adjusted gross income classes	Number of returns with contributions (Thousand dollars)	Deduction for contributions (Thousand dollars)	Returns with deduction for contributions exceeding 20 percent of adjusted gross income	
			Number of returns	Amount in excess of 20 percent (Thousand dollars)

See text for "Description of Sample and Limitations of Data."

⁽¹⁾Sample variability of this item is too large to warrant showing it separately. However, this value is included in each total.

million. However, this does not signify the entire amount contributed to the special institutions, because in those instances where the special contributions exceeded the 10-percent limitation, the excess was mingled with the other contributions to which the 20-percent limitation applied, and in cases where the contributions did not exceed the 20-percent limitation, the deduction may have included contributions to the special organizations.

Less than 1 percent of the returns with a deduction for contributions showed the deduction to be in excess of 20 percent of adjusted gross income. Of the 132,073 returns with charitable deduction exceeding the 20-percent limitation, 82 percent were returns under \$5,000 adjusted gross income, but only one-fifth of the additional deduction occurred on these returns. The reverse situation was shown on returns over \$5,000 adjusted gross income, where 18 percent of the returns had 80 percent of the additional charitable deduction.

Table I.—DEDUCTIBLE MEDICAL EXPENSE AND MEDICAL COST, BY AGE GROUPS AND BY ADJUSTED GROSS INCOME CLASSES

Adjusted gross income classes	Number of returns with medical deduction	Deduction for medical expenses	Under 65 years of age									Age 65 years or over

DRUG AND MEDICAL COSTS

Information relating to medical cost was tabulated from the schedule for itemized deductions on long-form returns, Form 1040, for 1954, if the taxpayer claimed a deduction on account of medical and dental expenses. These data are presented in text table I on page 16.

Three major changes regarding the medical and dental expenses and the allowable deduction were made by the 1954 Code. First, medical expenses in excess of 3 percent of adjusted gross income may be deducted. Second, outlays for drugs and medicines may be included in medical expenses only to the extent that they exceed 1 percent of adjusted gross income. Third, the limitations on the maximum deduction are raised to \$2,500 per exemption and to \$5,000 per return except that it is \$10,000 on a joint return, a head of household return, or a surviving spouse return.

When claiming a deduction for medical expenses, the taxpayer was required to report the cost of drugs and medicines separately from other medical and dental cost. Each of these two amounts was reported in its entirety as net, that is, they did not contain any expenses compensated by insurance or otherwise. These reported costs, however, were before any of the limitations applicable to the deduction had been applied. Drugs were reported without regard to an amount equal to one percent of adjusted gross income to be excluded later, and medical costs were reported without regard to an amount equal to 3 percent of adjusted gross income whether or not it was later excluded.

In text table I, the entire expense of both drugs and medical costs, as reported by the taxpayer, are shown for each of two age groups: under 65 years and 65 years or over. Data taken from joint returns where only one spouse was 65 years of age or over were tabulated with age group 65 years or over, because on such returns, the medical deduction was allowed as though both spouses were 65 or over. In addition to the drug and medical costs, there are tabulated also the actual medical deduction claimed, the related adjusted gross income, and number of returns involved. All of these items are shown for taxable and nontaxable returns, each by adjusted gross income classes used in the basic tables.

A description of medical expenses to be considered for this deduction and the limitations on the amount to be deducted, whether under 65 or 65 or more years of age, whether joint or separate return, are given on page 27 in the description of Medical and Dental Expenses.

There were 8.6 million returns which had a deduction for medical expenses; 7.6 million of these returns showed age under 65 years and 1.1 million showed age 65 years or over.

The cost of drugs was reported as \$0.9 billion and other medical cost reported as \$3.5 billion. Of the combined drug and medical costs amounting to \$4.5 billion, \$3 billion was claimed as a deduction from adjusted

gross income. Thus two-thirds of the entire cost was taken as a deduction. However, there was a wide variation in the percentage of cost claimed between the returns with age under 65 and returns with age 65 or over. The combined drug and medical costs reported on returns with age under 65 were \$3.8 billion of which \$2.4 billion, or 63.3 percent, was claimed as a medical deduction. On returns with age 65 or over, the combined drug and medical costs were \$0.7 billion of which \$0.6 billion, or 84.8 percent, was claimed as a deduction. While both age groups show that there were disallowed medical expenses, the special provision for age 65 years or over permitted this group to claim 21.5 percent more of their expenses than could be claimed by the group under 65 years of age.

Of the total deduction for medical and dental expenses, \$1.6 billion was claimed on returns with adjusted gross income under \$5,000. This deduction represented 72 percent of the combined drug and medical costs reported on this category of returns. The remaining medical deduction of \$1.4 billion, reported on returns with \$5,000 or more adjusted gross income, was 58 percent of the combined drug and medical costs reported on these returns. By coincidence, the two categories of returns each reported \$2.2 billion combined drug and medical costs before the limitations.

RETIREMENT INCOME

The new provisions relating to retirement income allow an individual a credit against the income tax for retirement income, if certain conditions are met. To qualify, an individual must have received earned income in excess of \$600 in each of 10 calendar years (not necessarily consecutive) before the beginning of the current year. Widows and widowers whose spouse had received such prior earnings are considered to have received such earned income. If husband and wife both qualify and have retirement income, each is entitled to the credit as individuals, even though filing jointly.

For the purpose of tax credit, retirement income in the case of individuals under 65 years of age differs from retirement income of individuals 65 years of age or over. If the individual has not attained the age of 65 before the close of the tax year, retirement income means only amounts received from pensions or annuities under a public retirement system. For individuals who are 65 years of age or over before the close of the tax year, retirement income means amounts received as pensions, annuities, interest, dividends, and gross rents. To be considered retirement income, such amounts must be included in adjusted gross income. Regardless of age, the maximum amount of retirement income allowed for computation of tax credit is \$1,200. However, the amount of retirement income allowed as the base of tax credit is the smaller of (a) the retirement income received, or (b) \$1,200 reduced by amounts received and excluded from gross income as pensions or annuities

INDIVIDUAL INCOME RETURNS FOR 1954

under social security and railroad retirement, or tax-exempt pensions and annuities, and, in the case of an individual who is not 75 years of age before the end of the year, reduced by the amount of earned income in excess of \$900 received during the tax year.

The tax credit, computed at 20 percent on the base for tax credit, is limited in that it may not exceed the income tax reduced by credits for dividends received, partially tax-exempt interest, foreign tax paid, and tax paid at source on tax-free covenant bonds. In order to secure this tax credit, an individual must file Form 1040, either long- or short-form.

Data relating to retirement income reported in schedule K, Credit for Retirement Income, on returns that had a tax credit for retirement income, are tabulated in two text tables. In both tables, data are distributed by adjusted gross income classes for the taxable and the nontaxable returns, corresponding to those in the basic tables.

Text table J shows the number of returns with a tax credit for retirement income, the total amount of retirement income that met the specified definition, the two deductions from the \$1,200 limit, the base for credit, and the tax credit for retirement income. Frequencies in this tabulation are on a return-count basis.

In text table K, the number of persons with a tax credit for retirement income, the amount of retirement income conforming to the definition, and the base for credit are shown for two groups: persons under 65 years and persons 65 years or over. In addition, there are the total number of persons with a tax credit and the two deductions from the \$1,200 limit, but the deductions are without the division as to age groups. Frequencies for items in this table are on a per capita basis.

There were 473,243 returns with a tax credit for retirement income. A total of \$2.3 billion of retirement income was reported on these returns. However, only a portion of this retirement income was used as the base for credit, because of the limitation on the amount of

See text for "Description of Sample and Limitations of Data."

¹Sample variability of this item is too large to warrant showing it separately. However, this value is included in each total.

retirement income that could be used in the computation of retirement credit. The tabulations show that the base for credit was \$0.4 billion. This is only 18 percent of the reported retirement income. The maximum retirement income allowed for computing the credit was \$1,200 for each retired person, but this maximum was reduced by the amount of nontaxable pensions and annuities and by the earnings in excess of \$900. Moreover, this diminished limitation was allowed as the base for credit only where it was less than the retirement income received. There were many instances in which retirement income was smaller than the diminished limitation and, therefore, became the base for credit.

Deductions from the \$1,200 limit were \$103.5 million for nontaxable pensions and annuities and \$44.1 million for the excess earned income.

Text table K shows that there were 493,418 persons who claimed the tax credit for retirement income. Approximately 20,000 of these individuals were the spouse of a retired person who also claimed a retirement income tax credit, both being reported on a joint return

of husband and wife. Of the 493,418 persons with retirement credit, 12 percent were under 65 years of age. Their retirement income was \$0.1 billion, less than 5 percent of the total reported. Eighty-eight percent of the individuals were 65 years of age or over and they had \$2.2 billion of retirement income. However, persons under 65 years, as a group, were able to use 52 percent of their retirement income as the base for credit, while those 65 years or over were able to use only 17 percent of theirs.

TABULATED DATA

In addition to the specific data tabulated in the text tables, financial data reported on individual income tax returns for 1954, relating to income, deductions, and taxes are tabulated in sixteen basic tables. The first 12 tables and table 15 present information on a national basis, while tables 13, 14, and 16 present information on a State basis. Data are distributed by size of adjusted gross income in 12 of these basic tables, 6 of which show

the taxable and nontaxable returns separately and in the remaining 6 they are combined. In one basic table, data are tabulated by size of taxable income, a new classification. In tables where data from taxable and nontaxable returns are tabulated together, the data from nontaxable returns are in the class indicated by the amount of adjusted gross income reported.

Table 1 shows the number of returns with adjusted gross income, amounts of adjusted gross income, taxable income, and income tax liability after credits, tabulated by adjusted gross income classes, as well as cumulations at every income class level from the lowest class and from the highest class, together with corresponding percentages of the total. In these distributions, taxable and nontaxable returns with adjusted gross income are combined, but nontaxable returns with no adjusted gross income are shown in aggregate, apart from the returns with income.

In table 2, the amounts of income and loss from each of the sources comprising adjusted gross income are shown as reported on returns with standard deduction and with itemized deductions. For returns with itemized deductions, these items are subdivided between returns with adjusted gross income and returns with no adjusted gross income, and the amount of each nonbusiness deduction is given for both categories of returns. These items include the combined taxable and nontaxable data.

Table 3 contains the sources of income and loss comprising adjusted gross income for all returns and the nonbusiness deductions reported on returns with itemized deductions. These items are combined for taxable and nontaxable returns and are distributed by adjusted gross income classes, the intervals of which are broader in some instances than in other basic tables.

Table 4 presents, by adjusted gross income classes, the amount of each source of income and loss comprising adjusted gross income, as well as exemptions, taxable income, income tax before credits, tax credits, income tax liability after credits, and items pertaining to taxpayments. In addition to the amounts, there are frequencies for these items where pertinent. Part I of this table includes data for all returns; Part II shows these data for joint returns only; and Part III has similar data for returns other than joint returns. Throughout the table, taxable and nontaxable returns are shown independently.

Table 5 includes data for returns with itemized nonbusiness deduction only, tabulated separately for taxable and nontaxable returns, each by adjusted gross income classes. These data embrace the number of returns, amount of adjusted gross income, the various itemized deductions, exemptions, taxable income, income tax before credits, tax credits, and income tax liability after credits, together with appropriate frequencies.

In table 6, there is a distribution of the number of returns by adjusted gross income classes, cross classified by size of a specified source of income or loss reported

in adjusted gross income. Most of the sources are included in this cross classification, however, frequencies for net operating loss deduction and fiduciary loss are not available. Taxable and nontaxable returns are combined and certain of the adjusted gross income classes are merged.

Table 7 has a distribution of the number of returns by adjusted gross income classes, cross classified by the size of specified itemized deductions. Only four deductions—contributions, interest paid, taxes, and medical expenses—are included in this tabulation. Taxable and nontaxable returns are combined and the adjusted gross income classes are the same as those in table 6.

Table 8 shows data tabulated by a new classification based on the amount of taxable income. In this table, there are the number of returns with taxable income, the amount of taxable income, total tax credits, dividend received credit, retirement income credit, normal tax and surtax, and alternative tax, both taxes being after credits. Because different tax rates, depending on the marital status of taxpayer, are applied to taxable income, the tabulation of these data are set in three parts, each signifying an applicable tax rate. Part I is for joint returns and returns of surviving spouse, both of which are entitled to split-income. The taxable income class intervals correspond to the brackets of the graduated rate schedule used for such returns. Part II is for separate returns of husbands and wives and returns of single persons not head of household or surviving spouse, both of which use the regular tax rates. The taxable income class intervals correspond to the brackets of that graduated rate schedule. Part III is for returns of heads of household entitled to use the rates provided for this status. The taxable income class intervals in this part correspond to the bracket of that graduated rate schedule. In each part, taxable and nontaxable returns are shown separately. Taxable income was mechanically computed for short-form returns, Form 1040, and for returns, Form 1040A, so that all returns with a positive amount of taxable income were included in this table whether or not the amount was reported by the taxpayer.

Table 9 contains data from taxable returns only and shows the number of returns with income tax, amount of adjusted gross income, taxable income, income tax liability after credits, average income tax per return, and effective income tax rate based on taxable income. All these data are distributed by adjusted gross income classes for all taxable returns, for returns with normal tax and surtax, and for returns with alternative tax.

In table 10, the number of returns, amount of adjusted gross income, exemptions, taxable income, and income tax liability after credits are shown for all returns and for returns in each of the five categories in the classification for marital status of taxpayer. These items are tabulated by adjusted gross income classes for taxable returns and for nontaxable returns.

Table 11 gives an analysis of the personal exemptions claimed by the taxpayer. Here are the total number of exemptions claimed, the number of additional exemptions claimed for age and blindness, and the number of exemptions other than age and blindness, that is, the per capita exemption for the taxpayer, his spouse on a joint return, and his dependents. In addition, there is a frequency distribution of returns by specified numbers of exemptions other than age or blindness (per capita). These data are distributed by size of adjusted gross income, separately for taxable and nontaxable returns, for each of the five categories in the classification for marital status of taxpayer.

Data in table 12 pertain to the details making up the net gain and net loss from sales of capital assets included in adjusted gross income. Because of the different treatment for capital gain and for capital loss, details from returns with a deduction on account of a capital loss are shown apart from details from returns with a capital gain. Returns with a capital loss are subject to normal tax and surtax, but returns with a capital gain are subject to the alternative tax under certain circumstances. Therefore, the latter returns are segregated in the tabulation to show details for capital gain subject to normal tax and surtax apart from details for capital gain subject to alternative tax. In each breakdown, there are the amounts of net short-term capital gain and loss (after carryover), net long-term capital gain and loss, and capital loss carryover from the 5 preceding years. Other data include capital loss before statutory limitation regarding the deductible loss, amount of capital loss deducted from gross income, capital gain included in adjusted gross income, and the entire excess of net long-term capital gain over net short-term capital loss which was taxed at the special rate of 25 percent. All these data are shown separately for taxable and nontaxable returns, by adjusted gross income classes.

Table 13 presents in aggregate for each State and Territory certain sources of income, adjusted gross income, and income tax liability after credits reported on returns with adjusted gross income. These data are for taxable and nontaxable returns combined. For the first time, Puerto Rico is a separate entity in the State and Territory classification. The sources of income tabulated by States have been expanded this year to include the combined business net profit and loss, the combined partnership net profit and loss, the combined net gain and loss from sales of capital assets, and the combined rents and royalties net income and loss, in addition to the amounts of salaries and wages, dividends, and interest, which were the only items of income formerly tabulated. A frequency of the number of returns for each source presented is also shown.

In table 14, the number of returns, amount of adjusted gross income, and income tax liability after credits, reported on returns with adjusted gross income, are tabulated for each State and Territory, by adjusted gross income classes established especially for this table,

which differ somewhat from those used elsewhere for national distributions. Taxable and nontaxable returns are combined in this tabulation.

Table 15 shows information taken from returns, Form 1040, that had a self-employment tax reported by the taxpayer. This information is presented on a national basis by adjusted gross income classes without regard to the income tax status. The number of returns with self-employment tax, amount of adjusted gross income on these returns, and the self-employment tax are shown for all returns with this tax. In addition, the returns which had self-employment tax without an income tax, although included in the distribution for all returns with self-employment tax, are also shown by themselves.

Table 16 presents data from returns, Form 1040, with adjusted gross income and with self-employment tax. These data include the number of returns with self-employment tax, amount of adjusted gross income, and self-employment tax, distributed on a State basis. No self-employment tax was reported on returns filed by citizens residing in Puerto Rico. Returns, Form 1040 P. R., filed by Puerto Ricans for self-employment tax purposes were not processed for statistics.

DESCRIPTION OF THE SAMPLE AND LIMITATIONS OF DATA

The data presented for individual income tax returns for 1954 are based on a stratified systematic sample consisting of 100 percent of returns showing adjusted gross income of \$150,000 or more and of various lesser percentages of returns showing adjusted gross income under \$150,000. More than 240,000 returns were selected in 64 district directors' offices. These represented about 0.4 percent of the total population of 56.8 million individual returns filed throughout the country.

Description of the sample.—Table L shows the number of returns processed, the number of returns in the sample, the prescribed sampling ratio, and the achieved sampling ratio, by estimating strata. The difference between the prescribed sampling ratio, and the achieved sampling ratio arises from three sources: incomplete numbering series, nonresponse, and the normal variation between expected sample size and actual sample size.

In addition to the stratification imposed by selecting returns from each internal revenue district, the sample selection was adapted to the regular return sorting procedures which are employed in the district offices to fa-

Table L.—NUMBER OF INDIVIDUAL INCOME TAX RETURNS PROCESSED FOR 1954, NUMBER OF RETURNS IN SAMPLE, AND SAMPLE RATIOS, BY ESTIMATING STRATUM

Form	Sample stratum		Number of returns processed	Number of returns in sample	Sample ratios	
	Adjusted gross income	Type of return			Prescribed	Achieved
1040A	13,278,525	26,204	1/500	1/507
	Under \$10,000.....	All.....	41,456,390	82,663	1/489	1/502
	\$10,000 under \$30,000.....	Business.....	1,914,376	79,304	1/23	1/24
	\$10,000 under \$50,000.....	Nonbusiness.....				
1040	\$30,000 under \$150,000.....	Business.....	161,777	45,175	9/30	9/32
	\$50,000 under \$150,000.....	Nonbusiness.....				
	\$150,000 and over.....	All.....	7,130	7,130	1/1	1/1
	Grand total, all returns.....		56,818,198	240,476	-	-

cilitate collection and audit requirements. Returns are sorted on the basis of type of form, kind of schedules attached, size of adjusted gross income, and taxpayment status, as reported by the taxpayer. These sorts constituted effective sampling strata because the characteristics on which the strata are based correlate highly with income and tax characteristics.

Inflating sample values to population size.—The sample values were extended to the returns they represented by multiplying them by "weighting factors." These weighting factors were derived for each class of return by dividing the number of sample returns into the total number of returns filed. For instance, the weighting factor of 507 for Form 1040A returns was obtained by dividing the number of returns in the sample, 26,204, into the total number of returns filed, 13,278,525. The primary sources of population data were counts made and submitted by the district offices showing the numbers of Form 1040A and Form 1040 returns processed.

In comparing the weighted sample numbers of returns with the figures presented as national totals for similar classes of returns, slight discrepancies will be noted. As shown in table M, the discrepancies result from the elimination of certain returns and the reclassification of others in preparing the tables.

Table M.—SOURCES OF DEVIATION BETWEEN WEIGHTED SAMPLE NUMBER OF RETURNS AND NUMBER OF RETURNS APPEARING IN TABLES FOR 1954

Adjusted gross income class	Number of returns		Deviation from weighted sample	Source of deviation	
	National totals	Weighted sample		Returns with no information ¹	Misclassified returns
Under \$10,000.....	54,617,989	54,734,915	-116,926	-70,701	-46,225
\$10,000 under \$150,000.....	2,121,937	2,076,153	+45,784	-489	+46,273
\$150,000 and over.....	7,082	7,130	-48	0	-48
All classes.....	56,747,008	56,818,198	-71,190	-71,190	0

¹These figures are estimated from sample returns filed with the Internal Revenue Service but which contain no information on income. They are in the population of returns sampled but are excluded from tabulations.

Separate systems of weighting were used for the national tabulations and for the State tabulations. The weights for the national tabulations were derived from nationwide populations obtained by adding the populations reported by the district directors' offices. The separate district office populations were used to derive the independent district office weights for the State tabulations. Achieved sampling rates varied sufficiently among districts to warrant using two separate systems of weights.

As a result of using two weighting systems and rounded weighting factors, there exist slight discrepancies between items in tables showing distributions by States and corresponding items shown in the national tables.

Sampling variability.—The data from returns with adjusted gross income of \$150,000 or more are not subject to sampling variability since all such returns were included in the sample. However, the estimates which include data from returns with adjusted gross income

of less than \$150,000 are subject to sampling variability. Table N below shows the range within which we would expect to find 19 out of 20 estimates prepared from samples similarly selected. In the preparation of this table, it was assumed that systematic selection within strata would yield results equivalent to simple random sampling. For instance, if data from returns showing adjusted gross income of under \$10,000 reveal 500,000 returns having a certain characteristic, the chances are 19 out of 20 that the difference between this figure and the one that would have been obtained from a complete count is less than 31,530.

Table N.—SAMPLING VARIABILITY OF ESTIMATED NUMBER OF RETURNS

If the estimated number of returns is—	And if the adjusted gross income class of returns to which the estimate refers is—		
	Under \$10,000	\$10,000 under \$50,000	\$50,000 under \$150,000
Then the chances are about 19 out of 20 that the difference between this estimated number of returns and the figure that would be obtained from a count of all returns is less than—			
1,000.....	(¹)	280	100
5,000.....	3,160	630	230
25,000.....	7,080	1,410	460
50,000.....	10,010	1,980	560
100,000.....	14,150	2,770	410
500,000.....	31,530	5,480	-
1,000,000.....	44,390	6,280	-
5,000,000.....	95,490	-	-

¹Sample is not large enough to give reliable estimate of the sampling variability for this item.

A general table of sampling variability for estimates that are based on returns from the several strata is not practical to prepare because of the large number of entries in the tables. The sampling variability for the value in each such cell must be estimated individually.

It is reasonable to assume that the estimates of adjusted gross income by class are subject to less relative sampling variability than are the associated frequencies. Since other money amounts are closely related to or dependent on adjusted gross income, it may be confidently assumed that these too are subject to less sampling variability. Presented in table O are selected aggregate money amounts together with the range in percent that would include 19 out of 20 estimates prepared from similarly selected samples.

Table O.—RELATIVE SAMPLING VARIABILITY OF ESTIMATED ADJUSTED GROSS INCOME AGGREGATES FOR SELECTED CLASSES OF RETURNS

Adjusted gross income class	Estimated adjusted gross income aggregate (Thousand dollars)	Estimated relative sampling variability in percent
Under \$10,000.....	188,190,533	0.35
\$10,000 under \$50,000.....	33,829,629	0.19
\$50,000 under \$150,000.....	6,047,527	0.25
\$150,000 and over.....	2,168,166	0.00
All classes.....	230,235,855	0.29

Deletion of certain entries.—Throughout the tables the policy has been followed of deleting where possible those entries where the estimated relative error traceable to sampling variability was judged to be excessive. These cells are appropriately noted in each instance where this deletion has occurred.

all types of returns. Total salaries and wages, that is before exclusions for sick pay, included bonuses, tips, commissions, and other kinds of compensation received by the employee for services rendered. Amounts paid to the employee by his employer to cover expenses incurred in connection with the employer's business were included as income from wages. On Form 1040, travel and lodging expenses incurred while away from home overnight and transportation expenses were deducted

Compensation of the sole proprietor was not allowed as a business deduction and the net operating loss deduction was not reported among the business deductions.

Partnership net profit or net loss was reported by individuals who were members of a partnership, syndicate, joint venture, or the like. If the taxpayer was a member of more than one partnership during the year, the single amount of partnership net profit or net loss reported in adjusted gross income represented a combi-

INDIVIDUAL INCOME RETURNS FOR 1954

Other limitations of the data.—In addition to sampling variability, the data are subject to certain other limitations. The data do not reflect changes that resulted from the audit program affecting Form 1040 and 1040A for 1954. In addition, controls maintained over the selection and processing of the returns used in compiling the data do not completely eliminate the possibility of error. Practical operating considerations necessitate allowance of reasonable tolerances in processing controls.

EXPLANATION OF CLASSIFICATIONS AND TERMS

Classifications for Individual Returns

For the tabulations in this report, individual returns were classified by size of adjusted gross income, by size of taxable income, by size of certain sources of income and deductions, as standard or itemized deductions returns, as taxable or nontaxable for income tax, by types of tax, by marital status of taxpayer, by number of exemptions other than age and blindness, and by States and Territories.

Adjusted gross income classes.—The amount of adjusted gross income reported by the taxpayer was the basis for this classification. With one exception, the class intervals remain the same as last year. This year, the class \$100,000 under \$200,000 was subdivided into two classes: \$100,000 under \$150,000, and \$150,000 under \$200,000. Returns with an adjusted gross deficit, whatever the amount, and returns with a breakeven in adjusted gross income are designated "No adjusted gross income" and appear as a separate class. Returns with no information on them were not used for statistics. In tables where the taxable and nontaxable returns are combined, the nontaxable returns are included in the adjusted gross income class corresponding to the amount of adjusted gross income reported, without regard to the class interval into which nontaxable returns are grouped when shown separately.

Taxable and nontaxable returns.—This classification was based on the presence or absence of an income tax liability after credits. This is a departure from the tax status classification for the years 1951 through 1953 in that the current basis included only the income tax, and disregarded the self-employment tax.

Taxable returns are those which showed an income tax liability remaining after the five tax credits allowed for dividends received, for retirement income, for foreign taxes paid, for tax paid at source, and for partially tax-exempt interest. The last three tax credits were allowed only to taxpayers who itemized their nonbusiness deductions.

Nontaxable returns are returns with no income tax liability after credits. Nontaxable returns may have had an income tax before credits, in which case the tax credits were sufficient to eliminate the original tax.

Returns with standard deduction or with itemized deductions.—Returns classified as returns with standard deduction were card-form returns, Form 1040A, and short-form returns, Form 1040, on both of which the adjusted gross income was less than \$5,000 and standard deduction was automatically allowed through use of the optional tax table; and the long-form returns, Form 1040, with adjusted gross income of \$5,000 or more on which the optional standard deduction was elected by the taxpayer.

Returns classified as returns with itemized deductions were long-form returns, Form 1040, on which nonbusiness deductions allowed against adjusted gross income were reported in detail by the taxpayer, or on which no deductions (standard or itemized) were taken, and all returns with a deficit or a breakeven in adjusted gross income whether long-form or short-form returns.

Size of income or deduction.—For the purpose of a frequency distribution of significant items, the returns were segregated according to the size of specified sources of income or loss comprising adjusted gross income and the size of certain itemized deductions. The class intervals are narrow providing adequate classifications of small items of income or deduction.

Taxable income classes.—The amount of taxable income, which is the tax base, supplied the basis for this size classification. Taxable income was reported by the taxpayer on long-form returns, Form 1040, but was mechanically computed for returns, Form 1040A, and for short-form returns, Form 1040, on which the taxable income was not reported. This made it possible to classify all individual returns by taxable income classes. Returns with no taxable income are so designated. The class intervals coincide with the taxable income brackets of the three income tax rate schedules applying to (1) joint returns and returns of surviving spouse, (2) separate returns of husbands and wives and of single persons not head of household or surviving spouse, and (3) heads of household. There are 24 income brackets in the first two groups and 26 brackets in the third group, each group having its distinct class intervals.

Marital status.—Classification of returns for marital status of taxpayer was based on the marital status indicated by the taxpayer. The Code provides that the marital status be determined at the close of the tax year or on the date of the death of a spouse. The five classifications are: joint returns of husbands and wives, separate returns of husbands and wives, returns of heads of household, returns of surviving spouse, and returns of other single persons. When using data tabulated by marital status, the user should first read the discussion under Marital Status of Taxpayer, on page 11.

Joint returns of husbands and wives are those on which a married couple reported their combined income, or returns of a married person whose spouse had no income but who, nevertheless, was entitled to claim exemption for the spouse. This group includes joint returns filed on Form 1040A even though the district

from fiduciaries was not included. The excess capital loss not deductible in the current year may be carried into each of 5 succeeding years as a short-term capital loss until it has been eliminated by capital gains or through the capital loss deduction allowed in computing adjusted gross income.

Short term applies to gains and losses from sales of capital assets held 6 months or less. Such gains and losses, together with the capital loss carryover, are merged to obtain the net short-term capital gain or loss. In this merger, the net short-term capital gain or loss from partnerships and the net short-term capital gain from fiduciaries are also included.

Long term applies to gains and losses from sales of property treated as capital assets but held more than 6 months. These gains and losses are taken into account at 100 percent. Long-term capital gains and losses together with net long-term capital gain or loss received through partnerships and net long-term capital gain received from fiduciaries are merged to determine the net long-term capital gain or loss.

Capital loss carryover from 1949-53 is the remaining portion of net capital loss sustained in those years but which the taxpayer had not yet been able to eliminate through his capital gains or the \$1,000 deduction allowed for capital losses in computing his adjusted gross income, in years subsequent to the year in which the capital loss arose. This carryover was reported with and treated as a current year, short-term capital loss by the taxpayer.

Net loss from sales of capital assets before limitation is the entire net loss from sales or exchanges of property treated as capital assets and reported on returns showing a capital loss deduction from gross income on account of this loss. It is a combination of the net short-term capital gain or loss including the capital loss carryover and the net long-term capital gain or loss, without regard to the statutory limitation on the allowable deduction.

Net long-term capital gain in excess of net short-term capital loss is the entire amount of this excess occurring on returns with the alternative tax; it is not the amount included in adjusted gross income. This excess long-term capital gain is the amount to which the special rate of 25 percent is applied in computing the alternative tax.

Net gain or loss from property other than capital assets is that from sales or exchanges of property which was not treated as a capital asset. Unlike the excess net long-term capital gain above, all of this type of net gain was included in adjusted gross income. Also, a net loss of this type was wholly deducted in computing adjusted gross income.

Annuities and pensions included in adjusted gross income are only the taxable portion of amounts received within the tax year. The full amount of a pension or annuity received by a retired employee who contributed nothing toward the cost was taxable. In cases where

the annuitant contributed to the cost, new methods were provided for computing the taxable amount to be reported, each depending upon the type of pension or annuity but, in general, provision was made to exclude a portion of the receipts as recovery of cost.

Rents and royalties were reported in a single schedule on the income tax return. Therefore, the annual net income or net loss which was available represented a combination of the net income and net loss from both types of investment. Rents included not only rents from real estate but also amounts received from renting any kind of property, and included the fair market value of crops received as rent from farm property. Royalties included revenue from copyrights, patents, trademarks, formulas, natural resources under lease, and the like. Deductions against the gross income received from these investments were claimed for maintenance, insurance, repairs, interest, taxes, depreciation, depletion, and other expenses pertaining to the respective income.

Income or loss from estates and trusts is the taxpayer's share of fiduciary income from an estate or trust under which he was a beneficiary. Fiduciary income includes amounts required to be distributed, and amounts credited to the beneficiary's account whether actually received or not, as well as amounts paid to the beneficiary. Income from estates and trusts was reduced by the taxpayer's share of depreciation. Capital gain, dividends qualifying for the exclusion, and partially tax-exempt interests were excluded and reported in their respective source. A loss from estates and trusts was distributed to a beneficiary only upon termination of a trust or an estate which had a net operating loss carryover, or a capital loss carryover, or for its last tax year had deductions (other than exemption and charitable deduction) in excess of gross income.

Other sources of income include alimony received, prizes, awards, sweepstakes winnings, gambling profits, recovery of bad debts and taxes deducted in a prior year, insurance received as reimbursement of medical expenses previously deducted, and any other item of income not separately reported. Also there was included a total of \$22,912,000 which consisted of wages not subject to income tax withholding, dividends after exclusions, and interest, not exceeding \$100 per return, reported in one sum as other income on 431,819 returns, Form 1040A.

Itemized Nonbusiness Deductions

The descriptions of itemized deductions which follow are confined to the nonbusiness deductions permitted under the 1954 Code as a deduction from adjusted gross income.

Contributions consist of gifts to organizations created in the United States or its possessions, or under our laws and operated for religious, charitable, scientific, literary, or educational purposes exclusively, or for the prevention of cruelty to children or animals; and gifts

Types of tax.—Returns were recognized as having two kinds of income tax, that is, the combined normal tax and surtax or the alternative tax, and as having an unrelated self-employment tax.

Normal tax and surtax was computed at the regular rates and occurred on all types of returns. This tax includes the optional tax paid in lieu thereof. Normal

amounts of compensation included in adjusted gross income, except wages reported in other income on Form 1040A. Salaries and wages after exclusions are exclusive of amounts received as wages or, in place of wages, under a wage continuation plan for the period during which the employee was absent from work on account of sickness or personal injury. Generally, the exclusion was limited to \$100 per week, but was reported on

made to veterans' organizations or to governmental agencies which use the gifts for public purposes. Persons who were members of a partnership included their pro rata share of contributions made by their partnership. In general, the deduction may not exceed 20 percent of adjusted gross income, but under the new Code, there is allowed an additional deduction up to 10 percent of adjusted gross income for contributions made to churches, tax-exempt hospitals and tax-exempt educational institutions. So it was possible to have a deduction equal to 30 percent of adjusted gross income. Also, there is an unlimited deduction if, in the current year and in 8 of the 10 preceding years, the amount of contributions plus the amount of income tax paid during such year (in respect to such year or preceding years) exceeds 90 percent of taxable income for the respective year, computed with modifications.

Interest paid is that paid on personal debts, mortgages, bank loans, and installment purchases of real or personal property, but does not include interest on money borrowed to buy tax-exempt securities or single-premium life insurance and endowment contracts; neither does it include interest relating to rents, royalty, or business income which was reported in those schedules.

Taxes paid include personal property taxes, State income taxes, certain State and local retail sales taxes, State gasoline taxes and automobile license fees, taxes paid to a foreign country or possession of the United States unless a foreign tax credit was claimed, and real estate taxes except those levied for improvements that tended to increase the value of the property. Federal taxes were not deductible. Taxes paid on business property were reported in the rent and business schedules.

Medical and dental expenses are allowed as a deduction from adjusted gross income with limitations. Expenditures considered for this deduction were the actual amounts paid during the tax year for the care of the taxpayer, his spouse, and any dependent who received over one-half of his support from the taxpayer regardless of the dependent's gross income. Such expenses included payments to physicians, surgeons, dentists, nurses, hospitals, oculists, chiropractors, and osteopaths, as well as X-rays, therapy treatments, dentures, crutches, hearing aids, and the like. Amounts paid for medicines and drugs could be included only to the extent of 1 percent of adjusted gross income under the new law. However, the allowable deduction was liberalized in that medical costs in excess of 3 percent (formerly 5 percent) of adjusted gross income were allowed. Any sick and health insurance or hospital coverage received was subtracted from the total medical expenses, after which the deduction was allowed if within the limitations. If neither the taxpayer nor his spouse had attained the age of 65, the deductible medical expenses for both, including those for their dependents, were that portion of such expenses which exceeded an amount equal to 3 percent of adjusted gross income. If either the taxpayer or his spouse was 65 years of age or over before the close of the tax year,

the deductible expenses for both were not restricted to the excess over 3 percent of adjusted gross income; and the entire medical expenses for both together with medical expenses for their dependents in excess of 3 percent of the adjusted gross income constituted their deductible expenses. However, the maximum deduction allowed in any case was limited to \$2,500 multiplied by the number of allowable exemptions other than age and blindness, but could not exceed \$10,000 for husband and wife filing jointly, for a head of household, or for a surviving spouse, nor could it exceed \$5,000 for a single person, or for married persons filing separate returns.

Child care is a deduction provided under the new Code, for working women and widowers. The deduction was allowed on account of expenses for the care of a dependent child or stepchild under 12 years of age, or of any dependent who was physically or mentally incapable of caring for himself, while the taxpayer was employed. The deduction was limited to \$600, regardless of the amount of expense incurred. In the case of a working wife, the deduction was allowed only if (1) she filed a joint return with her husband, and (2) their combined adjusted gross income was less than \$5,100 (unless the husband was incapable of self-support.) This second limitation for a working wife resulted from the provision that the maximum allowable deduction of \$600 is reduced by the amount of adjusted gross income in excess of \$4,500.

Losses from fire, storm, or other casualty, or theft reported as a deduction are the net losses on nonbusiness property resulting from destruction by fire, storm, automobile accident, shipwreck, flood, or other natural physical forces, and from losses due to theft. The deduction was limited to the net loss sustained, that is, the value of property just before the loss less salvage value and insurance or other reimbursement received.

Other deductions include all other authorized non-business deductions not separately reported, such as alimony and separate maintenance payments, expenses incurred in the collection of taxable income or for the management, conservation, or maintenance of property held for the production of taxable income, taxpayer's share of interest and taxes paid by a cooperative apartment corporation, gambling losses not in excess of winnings reported in income, and expenses in connection with the taxpayer's job, for example, dues to unions or professional societies, cost of tools and supplies, fees to employment agencies, and any allowable expense in connection with his employer's business which was in excess of reimbursed amounts.

Exemptions

In computing taxable income for the tax year 1954, a deduction of \$600 was allowed for each exemption to which an individual was entitled. A per capita exemption of \$600 was allowed for the taxpayer and, on a joint return, his spouse, and for each child (including a step-

child or an adopted child) who received more than one-half of his support from the taxpayer and who was under 19 years of age or was a student. If the child was 19 or over and not a student, exemption was allowed only if the child met the support test and had gross income under \$600. Also, an exemption was allowed for each other dependent (specified below) with less than \$600 gross income who received over one-half of his support from the taxpayer. To qualify as a dependent, the child or other dependent must have been a citizen or resident of the United States, or a resident of Canada, Mexico, Republic of Panama, or the Canal Zone.

Additional exemptions of \$600 for age 65 or over and \$600 for blindness were allowed the taxpayer and, if a joint return was filed, the taxpayer's spouse.

If the dependency qualifications were met, exemption was claimed for parent, grandparent, grandchild, brother, sister, stepbrother, stepsister, stepmother, step-father, mother-in-law, father-in-law, brother-in-law, sister-in-law, son-in-law, and daughter-in-law; for uncle, aunt, nephew, or niece if related by blood; and for any person who lived in the taxpayer's home and who was a member of his household, whether or not related to the taxpayer.

The new law made an exception to the support test for a dependent who was supported by several persons none of whom contributed more than one-half. Under this provision, any one of the group who had contributed more than 10 percent of the support could claim the exemption if each of the others who contributed more than 10 percent of the support filed a declaration that he would not claim the exemption.

The number of exemptions and the amount claimed, as tabulated in this report, include exemptions from every return filed. There is some duplication of exemptions inasmuch as dependents with less than \$600 of gross income from wages subject to income tax withholding filed a return to claim refund of tax; and children dependents under 19 years of age and children dependents over 19 years who were students, with gross income of \$600 or more, filed a return because their income met the requirement for filing. Exemptions claimed on returns filed by these dependents were tabulated, as well as the exemptions for these dependents reported on the return of the taxpayer rightfully claiming the dependent.

Measures of Individual Income

Items explained here are in accordance with the definitions under the new provisions of the 1954 Code.

Adjusted gross income is defined as gross income minus (a) allowable expenses attributable to the taxpayer's trade or business, (b) expenses paid or incurred in connection with services as an employee under a reimbursement or other expense allowance arrangement with the employer, (c) expenses of travel, meals, and lodging while away from home incurred by the taxpayer in connection with services rendered as an em-

ployee, (d) expenses of transportation paid by the taxpayer in connection with the performance of services as an employee, (e) expenses of outside salesmen attributable to business carried on by the taxpayer if such business consists of the performance of services as an employee and if the business is to solicit, away from the employer's place of business, business for the employer, (f) deductions attributable to rents and royalties, (g) deductions for depreciation and depletion allowable to a life tenant or an income beneficiary of property held in trust, (h) allowable losses from sales of capital assets and other property, and (i) a deduction equal to 50 percent of the excess of net long-term capital gain over net short-term capital loss.

Adjusted gross deficit occurred in the event that the deductions allowed for the computation of adjusted gross income, stated above, exceeded the gross income.

Taxable income tabulated for individual returns is adjusted gross income minus deductions, itemized or standard, and personal exemptions. The amount of taxable income, shown throughout this report, includes both the taxable income reported by taxpayers on the long-form return, Form 1040, and a mechanically computed amount of taxable income for taxpayers who used the short-form return, Form 1040, or the return, Form 1040A, wherein the amount of taxable income was not a factor because the optional tax table was used for tax purposes. Taxable income for the latter taxpayers was computed by (a) using the midpoint of the adjusted gross income bracket of the tax table into which the income fell as the amount of adjusted gross income, and (b) providing a 10-percent standard deduction based on the midpoint, and (c) allowing \$600 for each exemption claimed. This formula resulted in the actual amount of taxable income upon which the tax was based. This is the only instance in which an item, not reported on the individual income tax return, was supplied for the tabulations.

The concept of taxable income may be considered similar to the concept of surtax net income of former years, if the other changes in the new law are ignored.

Tax Items

The reduced tax rates, previously enacted as applicable to individual income on and after January 1, 1954, were carried from the 1939 Code into the 1954 Code. However, in the 1954 Code, the normal tax rate and the graduated surtax rates were consolidated into a single comprehensive rate schedule.

The income tax rates for 1954 income were 20 percent of the first \$2,000 of taxable income, increasing to 91 percent of taxable income in excess of \$200,000 for all persons except heads of household, and in excess of \$300,000 for heads of household. However, under the split-income provision, the 91-percent rate was operative only on taxable income in excess of \$400,000 on joint returns and returns of surviving spouse. The maximum tax was limited to 87 percent of taxable in-

come. These rates are somewhat lower than those on 1953 income.

Fiscal-year and part-year returns covering a period that embraced January 1, 1954, showed a proration of tax to give effect to the change in tax rates on January 1, 1954.

The descriptions of tax items are given in terms of the 1954 tax provisions.

Income tax before credits is the tax based on taxable income and calculated at the prescribed rates. It may be the optional tax, the regular income tax, or the alternative tax and it is without regard to tax credits allowed as a reduction thereof.

Normal tax and surtax is the regular income tax which includes the optional tax. The normal tax and surtax was computed on taxable income at the rates stated above and reported by taxpayers who filed the long-form return, Form 1040. Optional tax was reported by taxpayers who used the short-form return, Form 1040, while the optional tax was determined by the district director for taxpayers who filed the card-form return, Form 1040A. The optional tax table stated the tax for the various adjusted gross income brackets and numbers of exemptions, for taxpayers with adjusted gross income under \$5,000 from whatever source.

Alternative tax applied only in case the taxpayer had an excess of net long-term capital gain over net short-term capital loss and only if the alternative tax was less than the regular income tax. Alternative tax was the sum of (a) a partial tax computed at the regular income tax rates on taxable income reduced by 50 percent of the excess net long-term capital gain over the net short-term capital loss, and (b) an amount equal to 25 percent of the entire excess. The alternative tax is not effective on taxable income under \$18,000.

Tax credit for dividends received is a new income tax credit, allowed on returns with tax year ended after July 31, 1954, for domestic dividends received after that date. This credit is equal to 4 percent of the qualifying dividends in excess of the dividends excluded from gross income. However, the credit could not exceed the lesser of (a) the income tax reduced by foreign tax credit, or (b) 2 percent of the taxable income.

Tax credit for retirement income, under the new law, is allowed against the income tax, if the taxpayer qualified with regard to earned income in prior years. The credit is 20 percent of the retirement income, as defined by statute, with a maximum limit of \$240 for each individual. The credit, however, could not exceed the income tax reduced by the other four tax credits.

Tax credit for foreign tax paid was allowed against the income tax only to taxpayers who itemized deductions but who did not deduct this tax among those deductions. The credit pertains to income and profits taxes paid to a foreign country or possession of the United States, including the taxpayer's share of such taxes paid through partnerships and fiduciaries. The credit could not exceed the same proportion of the tax

against which the credit was taken which the taxable income from sources in such foreign country bore to the entire taxable income computed without personal exemption.

Tax credit for tax paid at source relates to income tax withheld and paid, by the debtor corporation, on interest from tax-free covenant bonds. Credit for the amount of tax paid including the taxpayer's share of such tax paid through partnerships and fiduciaries was allowed against the income tax but only if deductions were itemized.

Tax credit for partially tax-exempt interest replaces the former deduction from net income and was allowed against the income tax only if deductions were itemized. The tax credit is 3 percent of the partially tax-exempt interest included in gross income, but was limited to the lesser of (a) 3 percent of taxable income, or (b) the income tax reduced by the credit for foreign tax paid and the credit for dividends received.

Income tax liability after credits is the remaining tax after the subtraction of all tax credits, but prior to adjustments for tax withheld and the payments on declaration.

Self-employment tax was reported by an individual who had net earnings from self-employment derived from a trade or business carried on by him, or from his share of self-employment net earnings from a partnership of which he was a member. However, farmers and most professional services were excluded from the definition of self-employment earnings, and certain types of income and deductions were excluded, such as rents, interest, dividends, capital gains and losses, net operating loss deduction, and casualty losses. If such net earnings were \$400 or more, they were considered self-employment income. In determining the amount of self-employment income to be taxed, three factors were considered: first, the amount of net earnings from self-employment must be \$400 or more; second, the maximum amount of self-employment income to be taxed is \$3,600; and third, the amount of wages received on which social security tax had been withheld by an employer. If social security tax was withheld from wages, the amount of such wages was subtracted from the maximum amount of \$3,600 to determine the limit on self-employment income to be taxed. The amount of self-employment income subject to tax was the smaller of (a) the amount of the limit on self-employment income to be taxed, determined as stated, or (b) the amount of net earnings from self-employment. No exemption was allowed against the self-employment income for purpose of computing the self-employment tax at 3 percent.

Tax withheld is the income tax withheld at source on wages together with the over withholding of social security employee tax. The amount of income tax to be withheld by employers was stated in wage bracket withholding tables or was determined by applying the pre-

scribed 18 percent withholding tax rate to the amount of wages in excess of withholding exemptions. The over withheld social security tax, that is, the excess over the maximum tax of \$72, occurred because the employer received wages from more than one employer.

Payments on 1954 declaration of estimated income tax were reported on returns, Form 1040 only. These payments, made on account of the 1954 Declaration of Estimated Income Tax, Form 1040-ES, also included any credit which was applied against the estimated tax for 1954 by reason of an overpayment of the 1953 tax liability.

Tax due at time of filing is the amount of tax that remained after the tax withheld and payments on 1954

declaration had been applied against the total tax liability for the year which included both the self-employment tax and the income tax liability after credits.

Overpayment of tax occurred when the tax withheld and payments on 1954 declaration exceeded the combined self-employment tax and income tax liability after credits. Overpayment of tax gave rise to a refund or to a credit on the subsequent year's estimated income tax.

Refund of tax overpayment is the amount indicated by the taxpayers who requested a refund.

Credit on 1955 tax is the amount of 1954 tax overpayment which the taxpayers specified be credited on 1955 estimated income tax.

See text for individual returns for "Explanation of Classifications and Terms" and for "Description of Sample and Limitations of Data."

¹Excludes returns, Form 1040A, in adjusted gross income classes under \$5,000.²Sample variability of this item is too large to warrant showing it separately. However, this value is included in each total.³Adjusted gross deficit.⁴Adjusted gross income less adjusted gross deficit.⁵Includes returns with income tax withheld, or with excess social security tax withheld, or with both.⁶Includes returns with payments on declaration, or with credit for overpayment of prior year's tax, or with both.⁷Less than \$500.

See text for individual returns for "Explanation of Classifications and Terms" and for "Description of Sample and Limitations of Data."

¹Excludes returns, Form 1040A, in adjusted gross income classes under \$5,000.

²Sample variability of this item is too large to warrant showing it separately. However, this value is included in each grand total.

³Adjusted gross deficit.

⁴Adjusted gross income less adjusted gross deficit.

⁵Includes returns with income tax withheld, or with excess social security tax withheld, or with both.

⁶Includes returns with payments on declaration, or with credit for overpayment of prior year's tax, or with both.

⁷Less than \$500.

Table 5.—ITEMIZED NONBUSINESS DEDUCTIONS, EXEMPTIONS, AND TAX ITEMS, BY ADJUSTED GROSS INCOME CLASSES—RETURNS WITH ITEMIZED DEDUCTIONS

Adjusted gross income classes	Number of returns with itemized deductions	Adjusted gross income (Thousand dollars)	Deduction for—												Total deductions		
			Contributions		Interest paid		Taxes		Medical and dental expenses		Child care		Losses from fire, storm, or other casualty, or theft		Other deductions	Number of returns	Amount (Thousand dollars)

See text for individual returns for "Explanation of Classifications and Terms" and for "Description of Sample and Limitations of Data."

¹Includes Canal Zone.²Sample variability of this item is too large to warrant showing it separately. However, this value is included in each total.³The average amount of adjusted gross income per return exceeds the upper limit of the adjusted gross income class in which it is shown. This results from using a rounded weighting factor to inflate the sample.⁴Includes Alaska.

¹Excludes wages of less than \$100 per return from which no income tax was withheld, reported on Form 1040A or W-2 as other income.

²Excludes dividends reported on Form 1040A or W-2, and for 1945-53 dividends received through partnerships and fiduciaries.

³Excludes interest of less than \$100 per return reported on Form 1040A or W-2.

⁴Includes wages not subject to income tax withholding, dividends, and interest, not exceeding \$100 per return, reported in one sum as other income on Form 1040A or W-2.

⁵Not available prior to 1951.

⁶Sample variability of this item is too large to warrant showing it separately. However, this value is included in each total.

INDIVIDUAL INCOME TAX RETURNS FOR 1945-1954

Individual Income Tax Act of 1944 (May 29, 1944)...										

¹This table relates only to citizens and resident aliens of the United States. For income years prior to 1945, see *Statistics of Income for 1950, Part 1*, pages 308-309.

²Returns are permitted for fiscal years also except on Form W-2 for 1945-47 or on Form 1040A for 1948 and subsequent years.

³Gross income includes all gains, profits, and income, derived from whatever source except income that is specifically exempt from income tax.

The amount of income for which married persons are required to file a return is the separate gross income of husband or wife. Husband and wife file separate returns unless they elect to combine their income and file a joint return. A joint return may be filed even though one spouse has no income. For 1948 and thereafter, a joint return is permitted if one spouse dies during the year and the survivor does not remarry. A joint return is not allowed if either spouse is a nonresident alien or if husband and wife have different tax years. The marital status is determined as of the last day of the income year or as of the date of death if one spouse dies during the year.

A person with less than the required amount of gross income, which includes wages subject to withholding of income tax, should file a return to claim refund of tax withheld unless such income is included in a joint return. Also, an individual with less than the indicated amount of gross income should file to claim refund of any payments made on declaration of estimated tax.

For filing requirement of individuals having net earnings of \$400 or more from self-employment after Dec. 31, 1950, see table C.

⁴Exemption for the taxpayer and additional exemptions for age and blindness are determined from the marital status at the close of the year (or at death of a spouse), but exemption for dependents is determined from tests regarding gross income, support, and other qualifications. No proration of exemption is required because of death during the year of a taxpayer, his spouse, or a dependent.

Exemptions are termed "normal-tax exemption" and "surtax exemption" for 1945 and "exemption" for 1946 and thereafter.

Exemptions are allowed as a credit against net income for both normal tax and surtax prior to 1954, except as stated in notes 9 and 10 for the year 1945. For 1954, exemptions are allowed as a deduction in computing taxable income.

⁵A citizen whose gross income is principally from sources within a possession of the United States, even though filing a joint return, is allowed only one exemption of \$500 for 1945-47 and \$600 for 1948 and thereafter.

⁶Head of household status applicable for tax years beginning after Oct. 31, 1951 and surviving spouse status applicable for tax years beginning after Dec. 31, 1953.

⁷An exemption for a dependent is allowed each closely related dependent specified by law, over half of whose support was received from the taxpayer and whose gross income for the tax year was less than \$500 for 1945-50, or less than \$600 for 1951-53.

For 1954, exemption is allowed for a dependent over half of whose support was provided by the taxpayer and whose gross income was less than \$600, except that the gross income test is disregarded in the case of a child who is under 19 years or who was a student. If the dependency tests are otherwise met, certain specified related dependents may live outside the taxpayer's household, but any other dependent must live in the taxpayer's home. An exception to the support test for a dependent is made under the multiple support agreement provision.

Dependents must be either a citizen of the United States or a resident of the United States, Mexico, Canada, or for 1954 a resident of Panama or Canal Zone, or a resident of the Republic of the Philippines who was born to or adopted by a serviceman before July 5, 1946.

Credit for dependent is not allowable to citizens whose gross income is principally from sources within a possession of the United States.

⁸Additional exemptions are allowed only to the taxpayer and, if a joint return is filed, his spouse.

⁹Each spouse is allowed \$500 "surtax exemption" and \$500 "normal-tax exemption," except that for 1945 where the adjusted gross income of one spouse was less than \$500, the combined "normal-tax exemption" was the sum of the adjusted gross income of such spouse and the \$500 exemption of the other spouse.

¹⁰Exemption for each dependent is a "surtax exemption" for 1945 and allowed against net income for surtax purposes only.

SYNOPSIS OF LAWS

Table B.—MINIMUM AND MAXIMUM INCOME TAX RATES UNDER INDIVIDUAL INCOME TAX LAW, 1945-54¹

		3.0	20.0	91.0	23.0	94.0	90.0		

¹This table relates only to rates for citizens and residents of the United States. It does not cover the optional tax although the same rates are used to produce the optional tax as are otherwise used (for 1954 optional tax table, see page 114). For tax rates prior to 1945, see *Statistics of Income for 1950, Part 1*, pages 308-309 and 318-321.

²In case of a change in tax rates during a fiscal year other than those listed, the total tax is prorated according to the portion of time in the tax year under each rate.

³For 1946 through calendar year 1950, the normal tax and surtax rates produced a tentative tax which was subject to reduction as described in note 9.

On joint returns of married persons for 1945-47, normal tax and surtax rates were applied to the combined income. For 1948-53, both rates were applied to one-half of the net income reduced by one-half of the applicable credits against net income and the result multiplied by two. For 1954, on joint returns and returns of surviving spouse, the single combined tax rate is applied to one-half of the taxable income and the result multiplied by two.

⁴The normal tax rate applies to normal tax net income which is net income less the credit for partially tax-exempt interest and the exemption allowed for normal tax.

⁵Surtax rates apply to surtax net income which is net income less the exemptions allowed for surtax.

⁶Head of household status is applicable for tax years beginning after Oct. 31, 1951.

⁷Prior to 1948, the lowest bracket of surtax income for a married couple filing jointly is \$2,000 and the highest bracket is \$200,000.

⁸Surviving spouse status is applicable for tax years beginning after Dec. 31, 1953 and ending after Aug. 16, 1954.

⁹For 1946 through calendar year 1950, the combined rates shown are after tax reductions and the rates so computed are rounded. For 1946 and 1947 the tentative normal tax and surtax are reduced by 5 percent thereof. For tax years beginning after Dec. 31, 1947 and ending before Oct. 1, 1950, the combined tentative normal tax and surtax is reduced by 17 percent of the first \$400, plus 12 percent of the next \$99,600, plus 9.75 percent of the excess over \$100,000. For calendar year 1950, the tentative normal tax and surtax are reduced by 13 percent of the first \$400, plus 9 percent of the next \$99,600, plus 7.3 percent of the excess over \$100,000.

¹⁰The combined normal tax and surtax shall not exceed the indicated percent of net income for 1945-53, or taxable income for 1954.

Table C.—REQUIREMENT FOR FILING RETURN AND TAX RATE UNDER THE SELF-EMPLOYMENT TAX LAW, 1951-54

Federal self-employment tax law (date of enactment)	Income year ¹	Self-employment net earnings ² requirement for filing return ³	Maximum self- employment income	Tax rate on self- employment income subject to tax ⁴
Internal Revenue Code of 1954 amended by— Social Security Amendment of 1954 (Sept. 1, 1954).....	Fiscal years ending after 1954	400	4,200	3
Internal Revenue Code of 1954 (Aug. 16, 1954).....	1954.....	400	3,600	3
Internal Revenue Code of 1939 amended by— Social Security Act Amendment of 1950 (Aug. 28, 1950)....	1951-53.....	400	3,600	2 1/4

¹Returns are permitted for taxable years other than a calendar year.

²If net earnings from self-employment are less than \$400, they are disregarded.

For the calendar year 1954 and prior years, net earnings from self-employment are the gross income derived from trade or business reduced by allowable deductions attributable thereto, plus shares of partnership income or loss, but exclude income from services as a public official, employee, railroad worker, minister, or member of religious order, and income from farming, certain professions, dividends, interest, real estate rentals except those of dealers, and gain or loss from sales of capital assets or other property neither inventoriable nor held primarily for business sales.

For a fiscal year ending in 1955, self-employment earnings were extended to include income of farmers, architects, accountants, funeral directors, and professional engineers. Ministers and members of religious orders who had not taken the vow of poverty, and Christian Science practitioners may elect coverage as self-employed persons.

Casualty losses on business property, net operating losses for other years, and personal exemption are not allowable deductions for the computation of self-employment earnings in any year.

³A citizen or resident of the United States, or a resident of Puerto Rico or the Virgin Islands having net earnings from self-employment of \$400 or more is required to file a return.

If husband and wife both have self-employment earnings, each must report his net earnings independently, even though a joint return is filed.

⁴Self-employment income subject to tax is the smaller of (a) self-employment net earnings, or (b) the maximum self-employment income indicated in the table reduced by any wages received from which social security tax was withheld by the employer.

On a joint return where both spouses are self-employed, the tax rate is applied separately to the amount of self-employment income subject to tax reported by each spouse.

HELPFUL INFORMATION ON

*How to
prepare your
income tax
return*

ON FORM 1040 FOR 1954

You can save money for yourself and the Government, if you—

File your return early

Make sure the figures are right

Under the new law, the final date for filing is April 15, but taxpayers who wait until the last minute often make costly mistakes.

Give yourself time to double check every figure on your return—this will save time and money in the long run.

If you need help or more forms (including Form 1040-ES for declaration of 1955 estimated tax), go to the nearest Internal Revenue Service Office.

T. Coleman Andrews
Commissioner.

HOW TO USE THIS PAMPHLET

The information contained in this pamphlet has been selected to help the average taxpayer in preparing his return. You need only read those items that concern you. Use the following checklist in deciding which items you wish to read.

WHERE TO FILE YOUR RETURN

Mail your return to the "District Director of Internal Revenue" for the district in which you live

ALABAMA—Birmingham 3, Ala.
ALASKA—Tacoma 2, Wash.
ARIZONA—Phoenix, Ariz.

ARKANSAS—Little Rock, Ark.

CALIFORNIA:

Counties of Imperial, Kern, Los Angeles, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, and Ventura—Los Angeles 12, Calif.
All other counties—San Francisco 2, Calif.

CANAL ZONE—Jacksonville, Fla.

COLORADO—Denver 2, Colo.

CONNECTICUT—Hartford, Conn.

DELAWARE—Wilmington 99, Del.

DISTRICT OF COLUMBIA—Baltimore 2, Md.

FLORIDA—Jacksonville, Fla.

GEORGIA—Atlanta 3, Ga.

HAWAII—Honolulu 13, T. H.

IDAHO—Boise, Idaho

ILLINOIS:

Counties of Boone, Bureau, Carroll, Cook, De Kalb, Du Page, Grundy, Henry, Jo Daviess, Kane, Kankakee, Kendall, Lake, La Salle, Lee, McHenry, Marshall, Mercer, Ogle, Putnam, Rock Island, Stark, Stephenson, Whiteside, Will, and Winnebago—Chicago 2, Ill.
All other counties—Springfield, Ill.

INDIANA—Indianapolis 6, Ind.

IOWA—Des Moines 8, Iowa

KANSAS—Wichita 21, Kans.

KENTUCKY—Louisville 1, Ky.

LOUISIANA—New Orleans 16, La.

MAINE—Augusta, Maine

MARYLAND—Baltimore 2, Md.

MASSACHUSETTS—Boston 15, Mass.

MICHIGAN—Detroit 31, Mich.

MINNESOTA—St. Paul 1, Minn.

MISSISSIPPI—Jackson 5, Miss.

MISSOURI:

Counties of Adair, Audrain, Bollinger, Boone, Butler, Callaway, Cape Girardeau, Carter, Clark, Crawford, Dent, Dunklin, Franklin, Gasconade, Howard, Iron, Jefferson, Knox, Lewis, Lincoln, Linn, Macon, Madison, Maries, Marion, Mississippi, Monroe, Montgomery, New Madrid, Oregon, Osage, Pemiscot, Perry, Phelps, Pike, Pulaski, Ralls, Randolph, Reynolds, Ripley, St. Charles, St. Francois, Ste.

Genevieve, St. Louis, Schuyler, Scott, Shannon, Shelby, Stoddard, Warren, Washington, and Wayne—St. Louis 1, Mo.

All other counties—Kansas City 6, Mo.

MONTANA—Helena, Mont.

NEBRASKA—Omaha 2, Nebr.

NEVADA—Reno, Nev.

NEW HAMPSHIRE—Portsmouth, N. H.

NEW JERSEY:

Counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Morris, Passaic, Somerset, Sussex, Union and Warren—Newark 2, N. J.

All other counties—7th and Cooper Sts., Camden 1, N. J.

NEW MEXICO—Albuquerque, N. Mex.

NEW YORK:

Brooklyn: Counties of Kings, Nassau, Queens, and Suffolk—Brooklyn 1, N. Y.

Lower Manhattan: All that part of Manhattan Island south of 34th Street (this includes both sides of 34th Street) and Richmond County—Customhouse Bldg., New York 4, N. Y.

Upper Manhattan: That part of Manhattan Island north of 34th Street (this includes Welfare Island, Randall's Island, and Ward's Island) and counties of Bronx, Rockland, and Westchester—484 Lexington Ave., New York 17, N. Y.

Eastern New York State: Counties of Albany, Clinton, Columbia, Dutchess, Essex, Fulton, Greene, Hamilton, Montgomery, Orange, Putnam, Rensselaer, Saratoga, Schenectady, Schoharie, Sullivan, Ulster, Warren, and Washington—Albany 1, N. Y.

Central New York State: Counties of Broome, Cayuga, Chenango, Cortland, Delaware, Franklin, Herkimer, Jefferson, Lewis, Madison, Oneida, Onondaga, Oswego, Oneida, St. Lawrence, Schuyler, Seneca, Tioga, Tompkins, and Wayne—Syracuse 2, N. Y.

Western New York State: Counties of Allegany, Cattaraugus, Chautauqua, Chemung, Erie, Genesee, Livingston, Monroe, Niagara, Ontario, Orleans, Steuben, Wyoming, and Yates—Buffalo 2, N. Y.

NORTH CAROLINA—Greensboro, N. C.
NORTH DAKOTA—Fargo, N. Dak.

OHIO:

NORTHEASTERN: Counties of Ashland, Ashtabula, Belmont, Carroll, Columbiana, Cuyahoga, Geauga, Harrison, Holmes, Jefferson, Lake, Lorain, Mahoning, Medina, Monroe, Portage, Richland, Stark, Summit, Trumbull, Tuscarawas, and Wayne—P. O. and Courthouse Bldg., Pittsburgh 30, Pa.

PUERTO RICO—San Juan, Puerto Rico.

RHODE ISLAND—Providence 2, R. I.

SOUTH CAROLINA—Columbia 1, S. C.

SOUTH DAKOTA—Aberdeen, S. Dak.

TENNESSEE—Nashville 3, Tenn.

TEXAS:

SOUTHERN: Counties of Aransas, Atascosa, Austin, Bandera, Bastrop, Bee, Bell, Bexar, Blanco, Bosque, Bexar, Brazos, Brewster, Brooks, Burleson, Burnet, Caldwell, Calhoun, Cameron, Chambers, Colorado, Comal, Coryell, Culberson, De Witt, Dimmit, Duval, Edwards, El Paso, Falls, Fayette, Fort Bend, Freestone, Frio, Galveston, Gillespie, Goliad, Gonzales, Grimes, Guadalupe, Hamilton, Hardin, Harris, Hays, Hidalgo, Hill, Hudspeth, Jackson, Jasper, Jeff Davis, Jefferson, Jim Hogg, Jim Wells, Karnes, Kendall, Kenedy, Kerr, Kimble, Kinney, Kleberg, Lampasas, La Salle, Lavaca, Lee, Leon, Liberty, Limestone, Live Oak, Llano, McCulloch, McLennan, McMullen, Madison, Mason, Matagorda, Maverick, Medina, Milam, Montgomery, Newton, Nueces, Orange, Pecos, Polk, Presidio, Real, Reeves, Refugio, Robertson, San Jacinto, San Patricio, San Saba, Somervell, Starr, Terrell, Travis, Trinity, Tyler, Val Verde, Victoria, Walker, Waller, Washington, Webb, Wharton, Willacy, Williamson, Wilson, Zapata, and Zavala—Austin 14, Tex.

NORTHERN: All other counties—Dallas 1, Tex.

UTAH—Salt Lake City, Utah

VERMONT—Burlington, Vt.

VIRGINIA—Richmond 19, Va.

VIRGIN ISLANDS—Customhouse Bldg., New York 4, N. Y.

WASHINGTON—Tacoma 2, Wash.

WEST VIRGINIA—Parkersburg, W. Va.

WISCONSIN—Milwaukee 1, Wis.

WYOMING—Cheyenne, Wyo.

Taxpayers with legal residence in foreign countries—Baltimore 2, Md., U. S. A.

deduct from your wages or other compensation, before entering the balance on page 1, transportation expenses paid in connection with the performance of services for your employer. Transportation expenses include payments for actual travel or, if you use your own car, the business portion of the cost of operation, including fuel, repairs, and depreciation. Any reimbursement of these expenses must be included in your income. Attach a statement to your return explaining in detail the expenses you deduct.

Going To and From Work.—The law regards the cost of transportation between your residence and your principal place of employment as personal expense and does not allow you to deduct such cost, no matter how far you live from work, or how expensive the transportation may be.

Expenses Of Outside Salesmen.—The new law allows "Outside Salesmen" to deduct all their ordinary and necessary business expenses from their compensation before entering the balance in item 2, page 1. This applies only to salesmen who are engaged full-time in soliciting business for their employers away from their employer's place of business. The term does not include one whose principal activities consist of service and delivery such as a milk-driver salesman.

Other Expenses Of Employees.—The expenses set forth above are the only ones which may be deducted from salaries and wages on page 1 of Form 1040 by employees. If you file a Short-Form 1040, or if you take the standard deduction on a Long-Form 1040, you automatically receive an allowance for a deduction which takes the place of all other employment expenses and nonbusiness deductions. On the other hand, if you itemize your deductions on a Long-Form 1040, you can deduct the cost of tools, materials, dues to unions and professional societies, entertaining customers, and other expenses which are ordinary and necessary in connection with your employment. These items may be itemized and deducted on page 3 under the heading "Miscellaneous."

Dividends

If you own stock, the payments you receive out of the company's earnings and profits are called dividends and must be reported in your tax return. Usually dividends are paid in cash, but if paid in merchandise or other property, they are taxable at their fair market value.

If a distribution is not paid from earnings and profits, it is not taxable as a dividend, but is treated as reduction of the cost or other basis of your stock. These distributions are not taxable until they exceed your cost or other basis, after which you must generally include any additional receipts as gains from the sale or exchange of property, for which special tax treatment is provided.

In some cases a corporation distributes both a dividend and a repayment of capital at the same time; the check or notice will usually show them separately. In any case, you must report the dividend portion as income.

There are special rules applicable to stock dividends or stock rights; ask your Internal Revenue Service office for more complete information.

If your taxable year ends after July 31, 1954, you may exclude from your income \$50 of dividends received from domestic corporations during your taxable year. Use Schedule J, page 4, to show the exclusion. However, this exclusion does not apply to dividends received from:

(a) life insurance companies, and mutual insurance companies (other than mutual marine or mutual fire insurance companies issuing perpetual policies).

(b) China Trade Act corporations.

(c) so-called exempt organizations (charitable, fraternal, etc.) and farmer's cooperative organizations.

(d) mutual savings banks, cooperative banks, domestic

building and loan associations, domestic savings and loan associations, Federal savings and loan associations on deposits or withdrawable accounts. Dividends from these organizations must be reported as interest in Schedule B, on page 2 of Form 1040 and not as dividends.

(e) regulated investment companies except to the extent designated by the company to be taken into account as a dividend for these purposes.

(f) corporations deriving 80 percent or more of their income from U. S. possessions and 50 percent or more of their income from active conduct of a business therein.

If a joint return is filed and both husband and wife have dividend income, each one may exclude up to \$50 of dividends received from qualifying corporations, but one may not use any portion of the \$50 exclusion not used by the other. For example, if the husband has \$200 in dividends, and the wife has \$20, only \$70 may be excluded on a joint return.

See page 15 for the dividends received credit.

Interest

You must include in your return any interest you receive or which is credited to your account (whether entered in your pass-book or not) and can be withdrawn by you. All interest on bonds, debentures, notes, savings accounts, or loans is taxable, except for certain governmental issues. For example, some of the interest which is fully exempt from tax is (a) interest from State and municipal bonds and securities and (b) interest on any \$5,000 principal value of Treasury bonds issued before March 1, 1941.

You must include in your gross income the interest from certain United States securities issued prior to March 1, 1941, which was exempt from the normal tax by the acts authorizing their issuance. However, under the new law you now receive a credit against your tax computed according to the instructions on page 14. The following securities are examples of those for which the credit for partially tax-exempt interest is allowed: (a) Treasury bonds in excess of \$5,000 issued before March 1, 1941; (b) "dividends" on shares of Federal savings and loan associations if the shares were issued before March 28, 1942.

The interest on U. S. Government bonds and securities issued on or after March 1, 1941, is fully taxable.

If you own United States Savings or War bonds (Series A to F, inclusive), the gradual increase in value of each bond (as shown in the table on its back) is considered interest, but you need not report it in your tax return until you cash the bond or until the year of final maturity which ever is earlier. However, you may at any time elect to report each year the annual increase in value, but if you do so you must report in the first year the entire increase to date and must continue to report the annual increase each year.

Itemize your interest in Schedule B, page 2, stating the name of the payor and the amount of interest received.

Business Or Profession

General.—The law taxes the profits from a business or profession—not its total receipts. Therefore, separate Schedule C, which contains further instructions, is provided to help you figure your profit or loss from business. Generally, you may deduct the ordinary and necessary expenses of doing business—cost of merchandise, salaries, interest, taxes, rent, repairs, and incidental supplies. In the case of capital investments and improvements in depreciable property, such as buildings, machines, fixtures, and similar items having a useful life of more than one year, the law provides a depreciation allowance as the method of

deducting the cost over the life of the property. For further information on depreciation, see page 11.

If some of your expenses are part business and part personal, you can deduct the business portion but not the personal portion. For instance, a doctor who uses his car half for business can deduct only half the operating expenses.

Everyone engaged in a trade or business and making payments to another person of salaries, wages, commissions, interest, rent, etc., of \$600 or more in the course of such trade or business during his taxable year must file information returns, Forms 1096 and 1099, to report such payments. If a portion of such salary or wage payments was reported on a Withholding Statement (Form W-2), only the remainder must be reported on Form 1099. Information returns are not required unless the payments are made in the course of business.

Individuals in business may under certain conditions elect to report and pay income tax on such business income on the same basis as a domestic corporation. For full details consult your Internal Revenue Service office.

Accrual-Method Taxpayers Only—Prepaid Income and Reserves for Estimated Expenses.—Under the new law a taxpayer using the accrual method of accounting in a trade or business may elect to take prepaid income into account proportionately in the year of receipt and subsequent taxable years (not to exceed five), and may elect to deduct for the taxable year an addition to a reserve for estimated expenses. Prepaid income is income received in a transaction in which you undertake to render services, furnish goods or other property, or allow the use of property beyond the end of the taxable year.

An election to deduct additions to reserves for estimated expenses applies to expenses part or all of which would be taken into account for subsequent taxable years but are attributable to income received in the current taxable year. In order to qualify as a deduction it is necessary that such expenses be estimated with reasonable accuracy. The election to take estimated expenses into account does not apply to expenses attributable to income which you elect to treat as prepaid income nor does it apply to additions to reserves for bad debts. For additions to reserves for bad debts see separate Schedule C.

For more information concerning the requirements to make elections with respect to prepaid income and estimated expenses (and the detailed statements which must be submitted when making the election) consult your Internal Revenue Service office.

Farming

For the assistance of farmers, a separate schedule, Form 1040F, is provided and must be used by all farmers who report on the cash method. This form is optional with farmers who keep books on the accrual method.

Farmers must report as business income all Government payments, such as milk subsidy and conservation payments and amounts received under the Soil Conservation and Domestic Allotment Act, as amended, section 303 of the Agricultural Adjustment Act, as amended, and the Sugar Act of 1937. A taxpayer may elect to treat as income loans received from the Commodity Credit Corporation. If he does so, he must continue to report them as income unless he secures permission to change.

Farmers who market produce through a cooperative should add any patronage dividends received in the taxable year to their gross receipts from farming. Farmers who buy, through a cooperative, implements, gasoline, seed, fertilizer, or other items for use in their business should either reduce the cost of such items by the amount

of patronage dividends received or add the patronage dividends to income. Patronage dividends received as rebates on purchases of items not used in your business should be omitted from your return. Patronage dividends are considered paid when remitted in cash, merchandise, stock certificates, or when credited to you.

If livestock are sold or exchanged because they are diseased, or if property is sold or disposed of to meet acreage limitations under Federal reclamation laws, the sale or disposition may be treated as an involuntary conversion provided proceeds are reinvested in similar property. Such reinvestment must generally be made within a year.

Soil and Water Conservation Expenditures.—If you are engaged in the business of farming, you may deduct certain expenditures made by you (including any amount paid on any assessment levied by a soil or water conservation or drainage district to defray expenditures made by such district) for soil or water conservation and the prevention of erosion if such expenditures are in respect of land used by you in your farming operations. The term expenditures means expenditures (a) for the treatment or moving of earth, including but not limited to leveling, grading, terracing, contour furrowing; (b) the construction, control, and protection of diversion channels, drainage ditches, earthen dams, watercourses, outlets, and ponds; (c) the eradication of brush; and (d) the planting of windbreaks. You may not deduct expenditures for the construction, installation, or improvement of facilities which are subject to the allowance for depreciation.

The allowable deduction for any one year may not exceed 25 percent of your gross income from farming but any excess may be carried over to succeeding years with the same limit applying to those years. The phrase "gross income from farming" means the gross income of the farmer from the production of crops, fruits or other agricultural products or from livestock and includes such income from a farm other than the one on which expenditures for soil and water conservation or for the prevention of erosion were made.

To claim a deduction for these expenditures you must (a) elect to do so for the first taxable year which began after December 31, 1953, and ended after August 16, 1954 for which such expenditures are paid; or, (b) secure consent from the Internal Revenue Service. Once you have elected to do so, you must continue to treat these expenditures as deductions in all future taxable years unless you secure consent from the Internal Revenue Service to change.

Partnership

A partnership does not pay income tax in the firm's name. Each partner must report in his personal tax return his share of his partnership's income and pay tax on it.

Include in Schedule C Summary, page 2 of Form 1040, your share of the ordinary net income (whether actually received by you or not) or the net loss of a partnership, joint venture, or the like, whose taxable year ends within the year covered by your return. Other income and deductions to be carried to your individual return are shown in Schedule K of the partnership return.

If the partnership is engaged in a trade or business, the individual partner may be subject to the self-employment tax on his share of the partnership's self-employment income. In such a case the partner's share of partnership self-employment net earnings (or loss) should be entered on line 30, separate Schedule C.

Net Operating Loss

If, in 1954, your business or profession lost money instead of making a profit or if you had a casualty loss, or a loss from the sale or other disposition of depreciable property (or real property) used in your trade or business, you can apply these losses against your other 1954 income. If these losses exceed your other income, the excess of this "net operating loss" may be carried back to offset your income for 1952 or 1953, and any remaining excess may be carried forward against your income for the years 1955 through 1959. If a carryback entitles you to a refund of prior year taxes, ask the District Director for Form 1045 to claim a quick refund. For further information, see section 172 of the Internal Revenue Code of 1954 and section 122 of the 1939 Code.

If you had a loss in preceding years which may be carried over to 1954, you should claim a net operating loss deduction on line 5 of Schedule C Summary, page 2, of Form 1040 whether or not there are other items to be entered, and file a concise statement setting forth this computation.

Self-employment Tax

Every self-employed individual will have to file an annual return of his self-employment income on Form 1040 if he has at least \$400 of net earnings from self-employment in his taxable year, even though he may not have sufficient income to require the filing of an income tax return.

If your income is derived solely from salary or wages, or from dividends and interest on investments, capital gains, annuities, or pensions, you will have no self-employment income and no self-employment tax to pay.

Generally, if you carry on a business as a sole proprietor, or if you render service as an independent contractor, or as a member of a partnership or similar organization, you will have self-employment income.

The computation of your self-employment tax is made on separate Schedule C which, with attached Schedule C-a, should be filed with your individual income tax return. The self-employment tax is a part of the income tax.

Any declaration of estimated tax required to be filed need not include estimated tax on self-employment income.

Sale and Exchange of Property

If you sell your house, car, furniture, securities, real estate, or any other kind of property, you must report any profit on your tax return. Generally, such profits are capital gains if the property was not held for sale to customers in the ordinary course of business. Separate Schedule D is provided to compute capital gains and losses, and the results from other transactions in property.

Sale of Homes, Etc.—GENERAL RULE.—The law requires you to report any gains from the sale or exchange of your residence or other nonbusiness property, but does not allow you to claim any loss from the sale of a home or other asset which was not held for the purpose of producing income. Your gain from the sale of this kind of property is the difference between (1) the sales price and (2) your original cost plus the cost of permanent improvements. If depreciation was allowed or allowable during any period because you rented the house or used part of it for business purposes, then the original cost must be reduced by the amount of depreciation which was allowed or allowable.

SPECIAL RULE FOR SALE OF RESIDENCE AT A GAIN.—If you sold or exchanged your residence during 1954 at a gain and within one year after (or before) the sale, you purchased and occupied another residence, none of the gain is taxable if the cost of the new residence equals or exceeds the adjusted sales price of the old residence. See, however, in-

structions below for information to be furnished. If instead of purchasing another residence, you begin construction of a new residence (either one year before or within one year after the sale of your old residence) and occupy it not later than 18 months after the sale, none of the gain upon the sale is taxable if your cost of construction plus the cost of land (acquired within the period beginning one year before the sale and ending 18 months after the sale), equals or exceeds the adjusted sales price of the old residence.

If the adjusted sales price of your old residence exceeds the cost of your new residence, the gain on the sale is taxable to the extent of such excess. The adjusted sales price is the gross selling price less commissions and the expenses for work performed on the residence in order to assist in its sale, such as selling and redecorating expenses. Redecorating expenses, however, must be for work performed during the 90-day period ending on the day on which a contract to sell is entered into, and must be paid within 30 days after date of sale.

For example, assume your adjusted sales price is \$15,000 for a residence which cost you \$10,000 and you purchase a new residence for \$14,000. The taxable portion of your gain is only \$1,000, the difference between the adjusted sales price of your original residence and the purchase price of the new residence. The nontaxable portion of the gain of \$4,000 serves to reduce the basis of the new property. Therefore in any future transaction its adjusted basis would be \$10,000 (cost of \$14,000 less non-taxable gain of \$4,000).

Special rules apply if (a) a part of your old or new residence is used for rental or business purposes, (b) you sell within one year more than one property used as your principal residence, (c) the shares of the husband and wife in the old and new residences are not identical, (d) you own more than one residence at the same time, or (e) you acquired your new residence because your old residence was destroyed by a casualty (such as fire) or condemned. Consult your Internal Revenue Service office for assistance in reporting the disposal of such property.

If you sold or exchanged your residence, report the details of the sale in separate Schedule D. If you do not intend to replace, or if the period for replacement has passed, report the details in the year of sale. If you have acquired and occupied your new residence, enter in column (h) of Schedule D only the amount of taxable gain, if any, and attach statement showing the purchase price, date of purchase, and date of occupancy.

If you have decided to replace, but have not done so, or if you are undecided, you should enter "None" in column (h) of Schedule D. When you do replace within the required period, you must advise the District Director, giving full details. When you decide not to replace, or the period has passed, you must file an amended return, if you previously filed a return. Since any additional tax due will bear interest from the due date of the original return until paid, it is advisable to file the amended return for the year of sale as promptly as possible.

The running of the 1-year period or the 18-month period will be suspended during the time, if any, in which you serve on active duty in the Armed Forces after the date of sale of the old residence and during an induction period, pursuant to a call or order for an indefinite period or for more than 90 days. This suspension applies only where your service begins before the end of the 1-year period or the 18-month period, as the case may be, and cannot extend such period beyond a date which falls 4 years after the date of sale.

If your residence is destroyed or condemned, or even if you sell because of the threat of condemnation, you may be entitled to the benefit of other provisions of law which give you a longer time in which to buy a new residence. If you

require more information about your particular case, you should apply to your Internal Revenue Service office.

Nonbusiness Bad Debts.—If you fail to collect a personal loan, you can list the bad debt as a "short-term capital loss" provided the loan was made with a true expectation of collecting. So-called loans to close relatives, which are really in the nature of gifts, must not be listed as deductible losses.

Annunities and Pensions

Noncontributory Annunities.—The full amount of an annuity or a pension of a retired employee, where the employee did not contribute to the cost and was not taxable on his employer's contributions, must be included in his gross income. The total of the payments received during his taxable year should be shown on line 6, Part I of Schedule E. *Other Annunities.*—Amounts received from other annuities, pensions, endowments, or life insurance contracts for a reason other than the death of the insured, whether paid for a fixed number of years or for life, may have a portion of the payment excluded from gross income. The following types are included under this rule: (a) pensions where the employee has either contributed to its cost or has been taxed on his employer's contributions, (b) amounts paid for a reason other than the death of the insured under an annuity, endowment, or life insurance contract, and (c) amounts paid to a beneficiary, through an option in the policy or otherwise, in installments or in a lump sum under a life insurance contract at a date or dates later than the insured's death where the death occurred on or after August 17, 1954.

Schedule E on Form 1040 and the following instructions should enable you to compute the taxable portion of the annuity. If you are receiving payments on more than one pension or annuity, fill out a separate schedule for each one.

General Rule for Annuities

In general, amounts received from annuities and pensions are included in income to the extent they exceed the exclusion described below. You may exclude from your income an amount found by using the following formula:

$$\frac{\text{Investment in the contract}}{\text{Expected return}} \times \text{payment received}$$

This formula means that you divide the investment in the contract by the expected return and multiply the result by the payment received under the annuity, pension, or contract. Formula terms are explained below.

"*Investment in the contract*" is, in general, the total amount of the premiums or other consideration paid (the amount contributed by you plus the contributions made by your employer on which you were previously taxable) for the contract as of the annuity starting date. This investment must be reduced by the amounts received under the investment before the annuity starting date to the extent excludable from gross income under prior income tax law. The "*annuity starting date*" is the first day of the first period for which a payment is received as an annuity under the contract; except that if the date was before January 1, 1954, then the annuity starting date is considered January 1, 1954. "*Expected return*"—There are two methods for determining expected return depending on the type of contract.

(a) If the contract provides for amounts to be received for a fixed number of years, then the expected return is the total amount of the payments to be received after the annuity starting date.

(b) If the contract provides for amounts to be received for the life of the annuitant, then the expected return is found by multiplying the amount of the annual payment by the multiple applicable to the age and sex of the annuitant as of the annuity starting date. Special multiples are applicable in the case of payments under joint and survivor an-

nuities. The multiples are set out in actuarial tables which will be furnished by your Internal Revenue Service office upon request.

"*Payment received*" is the total amount received for a year under the contract.

Example: D purchased a life annuity on January 1, 1952, for \$15,000 which provides for annual payments of \$1,200 beginning January 1, 1953. The multiple applicable in D's case as of January 1, 1954, is 15.0. During the year 1953, D received tax-free under the existing tax laws \$750 (\$1,200 less 3% of \$15,000). The amount of each payment which D is to exclude from his gross income beginning with the 1954 payment is \$950, determined as follows:

Annual payment	\$1,200
Investment in the contract	\$15,000
Less: Amount recovered tax free in prior years	750

Investment in the contract as of 1/1/54, the annuity starting date as defined above	\$14,250
Expected return (\$1,200 \times 15.0)	\$18,000

The amount to be excluded based on the formula above:

$$\frac{\$14,250}{\$18,000} \times \$1,200 \text{ which equals } \$950$$

D will include in his income \$250 (\$1,200 - \$950) in the year 1954 and each subsequent year as long as he lives.

Special Rule for Certain Types of Employees' Annuities

There is a special rule provided for amounts received as employees' annuities where part of the cost is contributed by the *employer* and the amount contributed by the *employee* will be returned within 3 years from the date (whether or not before January 1, 1954) of the first payment received under the contract. If both of these conditions are met, then all the payments received under the contract are to be excluded from gross income until the employee recovers his cost (the amount contributed by him plus the contributions made by the employer on which the employee was previously taxable); thereafter all amounts received under the contract are fully taxable. This method of computing taxable income also applies to employee's beneficiary if employee died before receiving any annuity or pension payments.

Example: An employee receives \$200 a month under an annuity. While he worked, he contributed \$4,925 toward the cost of the annuity. His employer also made contributions toward the cost of the annuity. The retired employee would be paid \$7,200 during his first 3 years, which amount exceeds his contribution of \$4,925. Therefore, he excludes from gross income all the payments received from the annuity until he has received \$4,925. All payments received thereafter are fully taxable.

Other Types of Annuities

Amounts Received Under Life-Insurance Policies By Reason Of Death.—In general, a lump sum payable at the death of the insured under a life insurance policy is excludable from the gross income of the recipient. When, however, the beneficiary of a life insurance contract leaves a sum on deposit with the insurer, and receives interest on it under an agreement with the insurer the interest is includable in its entirety in the beneficiary's gross income. If the beneficiary receives, through his option or otherwise, installment payments at dates later than the insured's death he or she may be taxed on a part of the amount or amounts so received.

Special rules also apply in the case of joint and survivor annuities where the first annuitant died in 1951, 1952, or 1953; where a refund feature is involved; where amounts are received under an annuity, endowment, or life insurance contract, if such amount is not received as an annuity; and in cases which have not been otherwise explained in the instructions. See your Internal Revenue Service office for more detailed instructions.

Rents and Royalties

If you are not engaged in selling real estate to customers but receive rent from property owned or controlled by you, or royalties from copyrights, mineral leases, and similar rights, report the total amount received in Schedule F on page 2 of Form 1040. If property, other than cash, was received as rent, its fair market value should be reported.

You are entitled to various deductions which are indicated in Schedule F. In the case of buildings you can deduct depreciation, as explained elsewhere in these instructions. If you have depletion, consult your Internal Revenue Service office for more detailed information.

You can also deduct all ordinary and necessary expenditures on the property such as taxes, interest, repairs, insurance, agent's commissions, maintenance, and similar items. However, you cannot deduct capital investments or improvements. For example, a landlord can deduct the cost of minor repairs but not the cost of major improvements such as a new roof or remodeling.

Expenses, depreciation, and depletion should be listed in total in the columns provided in Schedule F.

If You Rent Part of Your House, Etc.—If you rent out only part of your property, you can deduct only a similar portion of the expenses. For example, if you rent out one-half of your home, and live in the other half, you can deduct only one-half of the depreciation and other expenses.

Room rent and other space rentals should be reported as business income in separate Schedule C if services are rendered to the occupant; otherwise, report such income in Schedule F. If you are engaged in the business of selling real estate, you should report rentals received in separate Schedule C.

Estates and Trusts

If you are a beneficiary of an estate or trust, report in your personal tax return any of its income which is required to be distributed to you or which has been paid or credited to your account for the taxable year. The administrator, executor, or trustee should advise you what to report.

Include in Schedule G of your return your share of such income (whether actually received by you or not) of an estate or trust for its taxable year which ends with or within the year covered by your return. Subtract from your share of such income any depreciation on estate or trust property which is allocable to you and show the net amount (or loss). There may be distributions (other than ordinary income) by an estate or trust, such as capital gains, dividends, etc., which are properly reportable in other schedules in your return. The fiduciary should advise you of such items requiring this special treatment.

Other Income

If you cannot find any specific place on your return to list certain types of income, you should report it in Schedule G, page 2. This is the proper place to report amounts received as alimony, support, prizes; or recoveries of bad debts, taxes, etc., which reduced your tax in a prior year.

Depreciation

The law does not allow you to deduct the full cost of your capital investments or improvements in the year made in figuring your profits from rents, royalties, businesses and professions. For most property with a life longer than one year, with the exception of land, the law provides for a deduction from gross income called "depreciation" as the method of recovering your cost (less any salvage value) over the useful life of the asset.

What is "Useful Life"?—The useful life of an asset can be measured in units of production or machine hours (for

machinery), in miles of operation (for automotive equipment), etc., but the ordinary practice is to measure useful life in years. Business experience, engineering information, and other relevant factors provide a reasonable basis for estimating the useful life of property. For your guidance, comprehensive tables of "average useful lives" of various kinds of buildings, machines, and equipment in many industries and businesses have been published in a booklet called Bulletin F, which you can buy for 30 cents from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Figuring the Deduction—STRAIGHT LINE METHOD.—The most common method of computing depreciation is the "straight-line" method. It allows for the deduction of cost in equal annual amounts over the useful life of the property, with only salvage value remaining at the end of its useful life. To figure the deduction add the cost of improvements to the cost (or other basis) of the asset and deduct both the estimated salvage value and the total depreciation allowed or allowable in past years. Divide the result by the number of years of useful life remaining to the asset—the answer is the depreciation deduction.

Special Rules for New Assets Acquired After December 31, 1953.—New assets acquired by the taxpayer after 1953 and the portion of the basis of property attributable to construction or reconstruction by the taxpayer after 1953 may be depreciated under methods proper in the past or under additional methods provided in the new law. These methods (which may be employed only with respect to tangible assets having a useful life of three years or more) are—

(a) "*Declining balance method.*"—The deduction is computed by applying a uniform rate to the cost or other basis of the asset reduced by depreciation previously allowed or allowable. This rate cannot exceed twice the straight line rate computed without regard to salvage value.

(b) "*Sum of the years-digits method.*"—The deduction is the cost or other basis of the asset (reduced by estimated salvage value) multiplied by the number of years of useful life remaining to it (including the year of the deduction) divided by the sum of all the digits corresponding to the years of the asset's estimated useful life (in the case of a 3-year life such sum would be 6, that is $1+2+3$).

(c) "*Other methods.*"—Other methods may be employed subject to special limitations; for details consult your Internal Revenue Service office.

Accounting Methods and Records

Your return must be on the "cash method" unless you keep books of account. "Cash method" means that all items of taxable income actually or constructively received during the year (whether in cash or in property or services) and only those amounts actually paid during the year for deductible expenses are shown. Income is "constructively" received when it is credited to your account or set aside for you and may be drawn upon by you at any time. Uncashed salary or dividend checks, bank interest credited to your account, matured bond coupons, and similar items which you can immediately turn into cash are "constructively received" even though you have not actually converted them into cash.

An "accrual method" means that you report income when earned, even if not received, and deduct expenses when incurred, even if not paid within the taxable period.

If you keep accounting records, your return must be on the same method as your records. The method used in keeping your records may be the cash receipts and disbursements method, or an accrual method, so long as income is clearly reflected. However, in most cases you must secure consent of the Commissioner before changing your accounting method.

HOW TO CLAIM NONBUSINESS DEDUCTIONS

Contributions

If you itemize deductions on a Long-Form 1040, you can deduct gifts to religious, charitable, educational, scientific, or literary organizations, and organizations for the prevention of cruelty to children and animals, unless the organization is operated for personal profit, conducts propaganda or otherwise attempts to influence legislation, or participates or intervenes in any political campaign on behalf of any candidate for public office. You can deduct gifts to fraternal organizations if they are to be used for charitable, religious, etc., purposes. You can also deduct gifts to veterans' organizations, or to a governmental agency which will use the gifts for public purposes. A contribution may be made in money or property (not services). If in property, it is measured by the fair market value of the property at the time of contribution.

For the contribution to be deductible, the recipient of the contribution must have been organized or created in the United States or its possessions, or under our law. The law does not allow deductions for gifts to individuals, or to other types of organizations, however worthy.

In general, the deduction for contributions may not exceed 20 percent of your adjusted gross income.

Under the new law, there is a special additional deduction of up to 10 percent for contributions made to churches, a convention or association of churches, tax-exempt educational institutions, and tax-exempt hospitals, which must be computed as explained below. If all your contributions were to these churches, schools, and hospitals, you can deduct up to 30 percent of your adjusted gross income. To compute the deduction for contributions you should first figure the contributions to these special institutions to the extent of 10 percent of your adjusted gross income and the amount in excess of 10 percent should be added to the other contributions to which the 20 percent limitation applies. Attach a schedule showing this computation.

While you can deduct gifts to the kind of organizations listed below, you cannot deduct dues or other payments to them for which you receive personal benefits. For example, you can deduct gifts to a YMCA but not dues.

Some examples of the treatment of contributions are:

You CAN Deduct Gifts To:

Churches, including assessments
Salvation Army
Red Cross, community chests
Nonprofit schools and hospitals
Veterans' organizations
Boy Scouts, Girl Scouts, and
other similar organizations

Nonprofit organizations primarily engaged in conducting research or education for the alleviation and cure of diseases such as tuberculosis, cancer, multiple sclerosis, muscular dystrophy, cerebral palsy, poliomyelitis, and diseases of the heart, etc.

You CANNOT Deduct Gifts To:

Relatives, friends, other individuals
Political organizations or candidates

Social clubs
Labor unions
Chambers of commerce
Propaganda organizations

Interest

If you itemize deductions on a Long-Form 1040, you can deduct interest you paid on your personal debts, such as bank loans or home mortgages. Interest paid on business debts should be reported in separate Schedule C or Schedule F, page 2, of Form 1040. Do not deduct interest paid on money borrowed to buy tax-exempt securities or single-premium life insurance. Interest paid on behalf of another person is not deductible unless you were legally liable to pay it. In figuring the interest paid on a mortgage on your home or on an installment contract for goods for your personal use, eliminate such items as carrying charges and insurance, which are not deductible, and

taxes which may be deductible but which should be itemized separately.

The new law provides a deduction for interest paid for purchasing personal property (such as automobiles, radios, etc.) on the installment plan where the interest charges are not separately stated from other carrying charges. This deduction is equal to 6 percent of the average unpaid monthly balance under the contract. Compute the average unpaid monthly balance by adding up the unpaid balance at the beginning of each month during the year and dividing by 12. The interest deduction may not exceed the portion of the total carrying charges attributable to the taxable year.

You CAN Deduct Interest On:

Your personal note to a bank or
an individual

A life insurance loan, if you pay
the interest in cash

A mortgage on your home

Delinquent taxes

You CANNOT Deduct Interest On:

Indebtedness of another person,
when you are not legally liable
for payment of the interest

enforceable obligation

A gambling debt or other non-

A life insurance loan, if interest
is added to the loan and you
report on the cash basis

Taxes

If you itemize deductions on a Long-Form 1040, you can deduct most non-Federal taxes paid by you. You can deduct State or local retail sales taxes if under the laws of your State they are imposed directly upon the consumer, or if they are imposed on the retailer (or wholesaler in case of gasoline taxes) and the amount of the tax is separately stated by the retailer to the consumer. In general, you cannot deduct taxes assessed for pavements or other local improvements, including front-foot benefits, which tend to increase the value of your property. Consult your Internal Revenue Service office for circumstances under which local improvement taxes may be deducted. If you paid foreign taxes you may be entitled to a credit against your tax rather than a deduction from income.

Do not deduct on page 3 any nonbusiness Federal taxes, or any taxes paid in connection with a business or profession which are deductible in Schedule F or separate Schedule C.

You CAN Deduct:

Personal property taxes

Auto license fees

Real estate taxes

State capitation or poll taxes

State income taxes

State gasoline taxes

State or local retail sales taxes

You CANNOT Deduct:

Any Federal excise taxes on your personal expenditures, such as taxes on theater admissions, furs, jewelry, cosmetics, railroad tickets, telephone, etc.

Hunting licenses, dog licenses

Auto inspection fees

Water taxes

Taxes paid by you for another person

Federal social security taxes

Casualty Losses and Thefts

If you itemize deductions on a Long-Form 1040, you can deduct your net loss resulting from the destruction of your property in a fire, storm, automobile accident, shipwreck, or other losses caused by natural forces. Damage to your car by collision or accident can be deducted if due merely to negligent driving but cannot be deducted if due to your willful act or your willful negligence. You can also deduct in the year of discovery losses due to theft, but not losses due to mislaying or losing articles.

You should determine the amount of any casualty loss by comparing the fair market value of the property just before and just after the casualty. This loss or the adjusted basis of the property, whichever is lower, should then be reduced by any insurance or other reimbursement to arrive at your deductible loss. Explain in attached statement.

If your 1954 casualty losses exceed your 1954 income, the excess may be carried back as a "net operating loss" to offset your income for 1952. If the loss carried back

exceeds your 1952 income, the excess may be used to offset your 1953 income. Any remaining excess may be carried over to the years 1955-1959, inclusive.

You CAN Deduct Losses On:

Property such as your home, clothing, or automobile destroyed or damaged by fire

Property, including cash, which

You CANNOT Deduct Losses On:

Personal injury to yourself or another person

Accidental loss by you of cash or other personal property

Property lost in storage or in

is stolen from you
Loss or damage of property by flood, lightning, storm, explosion, or freezing

transit

Damage by rust or gradual erosion

Animals or plants damaged or destroyed by disease

allowable for estate tax purposes, but it is preferred to deduct them for income tax purposes, there must be filed with the Form 1040 a statement that this amount has not been claimed in the estate tax return, and a waiver of the right to have this amount allowed at any time for estate tax purposes.

Any expense claimed as a deduction for the care of children and certain other dependents should not be included in your computation of the deduction for medical expense.

You CAN Deduct Payments To or For:

Doctors, dentists, nurses, and hospitals

Drugs or medicines

Transportation necessary to get medical care

Eye glasses, artificial teeth, medi-

You CANNOT Deduct Payments For:

Funeral expenses

Cemetery plot

Illegal operations or drugs

cal or surgical appliances, braces, etc.

X-ray examinations or treatment

Premiums on health and accident insurance, and hospital or medical insurance

Travel ordered or suggested by your doctor for rest or change

Premiums on life insurance

Medical and Dental Expenses

If you itemize deductions on a Long-Form 1040 you can deduct, within the limits described below, the amount you paid during the year (not compensated for by hospital, health or accident insurance) for medical or dental expenses for yourself, your wife, or any dependent who received over one-half of his support from you. If you pay medical expenses for a dependent who gets over half of his support from you, you can deduct the payments even though you are not entitled to a deduction for an exemption for that dependent because he had more than \$600 of gross income.

You can deduct amounts paid for the prevention, cure, correction, or treatment of a physical or mental defect or illness. If you pay someone to perform both nursing and domestic duties, you can deduct only that part of the cost which is for nursing.

You can deduct the cost of transportation primarily for and essential to medical care, but you cannot deduct any other travel expense even if it benefits your health. Meals and lodging may not be treated as medical expense while away from home receiving medical treatment unless they are part of a hospital bill.

Figuring the Deduction.—You can deduct only those medical and dental expenses which exceed 3 percent of your adjusted gross income. However in figuring these expenses, the amount paid for medicine and drugs may be taken into account only to the extent it exceeds 1 percent of your adjusted gross income, item 6, page 1. There is a schedule provided on page 3 to make this computation.

Limitations.—The deduction may not exceed \$2,500 multiplied by the number of exemptions other than the exemptions for age and blindness. In addition there is a maximum limitation as follows:

(a) \$5,000 if the taxpayer is single and not a head of household or a qualifying surviving widow or widower;

(b) \$5,000 if the taxpayer is married but files a separate return; or

(c) \$10,000 if the taxpayer files a joint return, or is a head of household or a qualifying surviving widow or widower.

Special Rule For Persons 65 Or Over.—If either you or your wife were 65 or over, the maximum limitation for amounts spent is the same as set out above. However, amounts deductible for medical and dental expenses for you and your wife are not restricted to the excess over 3 percent of your adjusted gross income. In effect, the 3 percent rule may be disregarded. But the amounts spent by you for your medicine and drugs are still limited to the excess of 1 percent of your adjusted gross income, and amounts spent by you for your dependents' medical expenses are deductible only to the extent they exceed 3 percent of your adjusted gross income.

Special Rule For Decedents.—In the case of a decedent, expenses for medical care may be treated as paid by the decedent at the time incurred, if such expenses are paid from his estate within one year after his death, and provided they are not deducted in computing the decedent's taxable estate for Federal estate tax purposes. If the expenses are

Expenses For the Care of Children and Certain Other Dependents

Generally, there is allowed a deduction not to exceed a total of \$600 for expenses paid by a woman or a widower (including men who are divorced or legally separated under a decree and who have not remarried) for the care of one or more dependents if such care is to enable the taxpayer to be gainfully employed or actively to seek gainful employment. For this purpose, the term "dependent" is limited to the following persons for whom the taxpayer is entitled to a deduction for an exemption:

(a) a child or stepchild of the taxpayer who is under 12 years of age; or

(b) a person who is physically or mentally incapable of caring for himself, regardless of age.

The deduction is not allowable to the extent the payments are made to an individual who the taxpayer claims as a dependent.

In the case of a woman who is married, the deduction is allowed only if she files a joint return with her husband; and the deduction is reduced by the amount (if any) by which their combined adjusted gross income exceeds \$4,500. If the husband is incapable of self-support because mentally or physically defective these two limitations do not apply.

If the person who receives the payment performs duties other than dependent care, only that part of the payment which is for the dependent's care may be deducted.

Miscellaneous

If you itemize deductions on a Long-Form 1040, you can deduct several other types of expenses under the heading "miscellaneous."

If you work for wages or a salary, you can deduct the ordinary and necessary expenses which you incur for your employer's benefit and which have not been claimed on page 1. For example, if your job requires you to furnish small tools, you can deduct the cost of such tools.

You CAN Deduct Cost Of:

Safety equipment

Dues to union or professional societies

You CANNOT Deduct Cost Of:

Travel to and from work

Entertaining friends

Entertaining customers

Tools and supplies

Fees to employment agencies

Bribes and illegal payments

Educational expenses

You can deduct all ordinary and necessary expenses connected with the production or collection of income, or for the management or protection of property held for the production of income.

If you are divorced or legally separated and are making periodic payments of alimony or separate maintenance under a court decree, you can deduct these amounts.

Periodic payments made after August 16, 1954, under either (a) a written separation agreement entered into after that date or (b) a decree for support entered after March 1, 1954, are also deductible. Such payments must be included in the wife's income. However, you cannot deduct lump-sum settlements, specific maintenance payments for support of minor children, or any voluntary payments not under a court order or a written separation agreement.

You may not deduct gambling losses in excess of gambling winnings. If you are a tenant-stockholder in a cooperative housing corporation, you can deduct your share of its payments for interest and real-estate taxes.

Declarations of Estimated Tax

For many taxpayers the withholding tax on wages is not sufficient to keep them paid up on their income tax. The law requires every individual (including an alien who is a resident of Puerto Rico during the entire taxable year) to file a Declaration of Estimated Tax, Form 1040-ES, and to make quarterly payments in advance of filing the annual income tax return if:

(a) his gross income can reasonably be expected to consist of wages subject to withholding and of not more than \$100 from other sources and to exceed—

(1) \$5,000 for a single individual who is not a head of household or a surviving widow or widower or for a married individual not entitled to file a joint declaration;

(2) \$10,000 for a head of household or a surviving widow or widower; or

(3) \$5,000 for a married person entitled to file a joint declaration and the total income for both husband and wife can reasonably be expected to exceed \$10,000; or

(b) his gross income can reasonably be expected to include more than \$100 from sources other than wages and to exceed the sum of \$600 multiplied by the number of exemptions plus \$400.

The District Director will mail Form 1040-ES, as far as is practical, to each person who may need it. Anyone else required to file should obtain the form from an Internal Revenue Service office in time to file by April 15, 1955. Farmers may postpone filing their declarations for 1955, until January 15, 1956.

HOW TO FIGURE YOUR TAX

Using the Tax Table.—To relieve the average taxpayer from computing the tax, the law provides a table which shows the correct tax for any income up to \$5,000. If you file a Short-Form 1040, use the Tax Table on page 16, to determine your tax. The table is based on the same rates used in a Long-Form 1040 computation. If your actual

deductions are larger than 10 percent of your income, you may file a Long-Form 1040 and claim them.

Making a Long-Form Computation.—To figure your tax on the amount on either line 5 or line 7(a), page 3, of Long-Form 1040, use the schedule below.

1954 Tax Rate Schedule

I. FOR ALL TAXPAYERS EXCEPT UNMARRIED (OR LEGALLY SEPARATED) PERSONS QUALIFYING AS HEAD OF HOUSEHOLD

If the amount on line 5 or 7 (a) is: Enter on line 6 or 7 (b):

Not over \$2,000 20% of the amount on line 5 or 7 (a)
Over \$2,000 but not over \$4,000 . . . \$400, plus 22% of excess over \$2,000
Over \$4,000 but not over \$6,000 . . . \$840, plus 26% of excess over \$4,000
Over \$6,000 but not over \$8,000 . . . \$1,360, plus 30% of excess over \$6,000
Over \$8,000 but not over \$10,000 . . . \$1,960, plus 34% of excess over \$8,000
Over \$10,000 but not over \$12,000 . . . \$2,640, plus 38% of excess over \$10,000
Over \$12,000 but not over \$14,000 . . . \$3,400, plus 43% of excess over \$12,000
Over \$14,000 but not over \$16,000 . . . \$4,260, plus 47% of excess over \$14,000
Over \$16,000 but not over \$18,000 . . . \$5,200, plus 50% of excess over \$16,000
Over \$18,000 but not over \$20,000 . . . \$6,200, plus 53% of excess over \$18,000
Over \$20,000 but not over \$22,000 . . . \$7,260, plus 56% of excess over \$20,000
Over \$22,000 but not over \$26,000 . . . \$8,380, plus 59% of excess over \$22,000
Over \$26,000 but not over \$32,000 . . . \$10,740, plus 62% of excess over \$26,000
Over \$32,000 but not over \$38,000 . . . \$14,460, plus 65% of excess over \$32,000
Over \$38,000 but not over \$44,000 . . . \$18,360, plus 69% of excess over \$38,000
Over \$44,000 but not over \$50,000 . . . \$22,500, plus 72% of excess over \$44,000
Over \$50,000 but not over \$60,000 . . . \$26,820, plus 75% of excess over \$50,000
Over \$60,000 but not over \$70,000 . . . \$34,320, plus 78% of excess over \$60,000
Over \$70,000 but not over \$80,000 . . . \$42,120, plus 81% of excess over \$70,000
Over \$80,000 but not over \$90,000 . . . \$50,220, plus 84% of excess over \$80,000
Over \$90,000 but not over \$100,000 . . . \$58,620, plus 87% of excess over \$90,000
Over \$100,000 but not over \$150,000 . . . \$67,320, plus 89% of excess over \$100,000
Over \$150,000 but not over \$200,000 . . . \$111,820, plus 90% of excess over \$150,000
Over \$200,000 \$156,820, plus 91% of excess over \$200,000

II. ONLY FOR UNMARRIED (OR LEGALLY SEPARATED) TAXPAYERS WHO QUALIFY AS HEAD OF HOUSEHOLD

If the amount on line 5 is: Enter on line 6:

Not over \$2,000 20% of the amount on line 5.
Over \$2,000 but not over \$4,000 . . . \$400, plus 21% of excess over \$2,000
Over \$4,000 but not over \$6,000 . . . \$820, plus 24% of excess over \$4,000
Over \$6,000 but not over \$8,000 . . . \$1,300, plus 26% of excess over \$6,000
Over \$8,000 but not over \$10,000 . . . \$1,820, plus 30% of excess over \$8,000
Over \$10,000 but not over \$12,000 . . . \$2,420, plus 32% of excess over \$10,000
Over \$12,000 but not over \$14,000 . . . \$3,060, plus 36% of excess over \$12,000
Over \$14,000 but not over \$16,000 . . . \$3,780, plus 39% of excess over \$14,000
Over \$16,000 but not over \$18,000 . . . \$4,560, plus 42% of excess over \$16,000
Over \$18,000 but not over \$20,000 . . . \$5,400, plus 43% of excess over \$18,000
Over \$20,000 but not over \$22,000 . . . \$6,260, plus 47% of excess over \$20,000
Over \$22,000 but not over \$24,000 . . . \$7,200, plus 49% of excess over \$22,000
Over \$24,000 but not over \$28,000 . . . \$8,180, plus 52% of excess over \$24,000
Over \$28,000 but not over \$32,000 . . . \$10,260, plus 54% of excess over \$28,000
Over \$32,000 but not over \$38,000 . . . \$12,420, plus 58% of excess over \$32,000
Over \$38,000 but not over \$44,000 . . . \$15,900, plus 62% of excess over \$38,000
Over \$44,000 but not over \$50,000 . . . \$19,620, plus 66% of excess over \$44,000
Over \$50,000 but not over \$60,000 . . . \$23,580, plus 68% of excess over \$50,000
Over \$60,000 but not over \$70,000 . . . \$30,380, plus 71% of excess over \$60,000
Over \$70,000 but not over \$80,000 . . . \$37,480, plus 74% of excess over \$70,000
Over \$80,000 but not over \$90,000 . . . \$44,880, plus 76% of excess over \$80,000
Over \$90,000 but not over \$100,000 . . . \$52,480, plus 80% of excess over \$90,000
Over \$100,000 but not over \$150,000 . . . \$60,480, plus 83% of excess over \$100,000
Over \$150,000 but not over \$200,000 . . . \$101,980, plus 87% of excess over \$150,000
Over \$200,000 but not over \$300,000 . . . \$145,480, plus 90% of excess over \$200,000
Over \$300,000 \$235,480, plus 91% of excess over \$300,000

Credits Against Tax

Credit For Foreign Taxes.—If you claim credits for such taxes, you should submit with your return Form 1116 which contains a schedule for the computation of the credit with appropriate instructions. This form may be obtained from your Internal Revenue Service office.

Credit For Partially Tax-Exempt Interest.—If you itemize your deductions, you may deduct on line 11, page 3, a credit for partially tax-exempt interest. This credit is 3 percent

of the partially tax-exempt interest included in gross income. See instructions on page 7 for the type of securities for which a credit is allowed. The credit may not exceed the lesser of (a) 3 percent of the taxable income (line 5, page 3, Form 1040, or line 20, separate Schedule D (twice line 20 in the case of a joint return or the return of a surviving widow or widower), whichever is applicable) for the taxable year or (b) the amount of tax less the credit for taxes paid to foreign countries and possessions of the U. S. and the credit for dividends received.

Credit For Dividends Received.—The new law provides a credit against tax for dividends received from domestic corporations after July 31, 1954. This credit is equal to 4 percent of the dividends in excess of those which you may exclude from your gross income (see page 7). The credit may not exceed the lesser of:

(a) the total income tax reduced by the foreign tax credit; or

(b) 2 percent of the taxable income (4 percent for taxable years ending after December 31, 1954).

Schedule J has been provided to compute the dividend credit. Dividends from certain types of corporations do not qualify for either the credit for dividends received or for the exclusion previously explained. These corporations are the same corporations as those listed on page 7 under the explanation of the dividend exclusion. The credit does not apply to a nonresident alien who is not engaged in trade or business in the United States and whose gross income from sources within the United States is not more than \$15,400.

Example: Assume a single individual with no dependents had gross income consisting of salary of \$3,300 and dividends of \$3,050 received from domestic corporations after July 31, 1954 (\$50 of the dividends are excluded from gross income). The credit is computed as follows:

Adjusted gross income (\$3,000 + \$3,300)	\$6,300
Standard deduction	630
	<hr/>
One exemption	600
	<hr/>
Taxable income	\$5,070
	<hr/>
Tax before credit	\$1,118.20
Dividends received credit: 4 percent of \$3,000 or \$120 but limited to 2 percent of \$5,070 or	101.40
	<hr/>
Net tax liability	\$1,016.80

Credit For Retirement Income.—Under the new law you may qualify for a retirement income credit if you received earned income in excess of \$600 in each of any 10 calendar years—not necessarily consecutive—before the beginning of your taxable year. If you qualify, you are entitled to a credit for retirement income you are now receiving. If your deceased husband (or wife) would qualify for this credit, if living, you may claim the credit even though you did not meet the earnings test. If a husband and wife both qualify and each has retirement income, each one is entitled to the credit.

The credit is 20% of the retirement income (as defined below) with a maximum limit of \$240 for each qualified individual. The credit may not exceed your tax (item 7, page 1) reduced by the dividends received credit in item 8A, page 1. Schedule K of the return is provided to make this computation.

Retirement income for the purpose of the credit means—

(a) In the case of an individual who is 65 years of age or over before the close of his taxable year, income from pensions, annuities, interest, rents, and dividends, which were included in gross income in your return. (Gross income from rents for this purpose means gross receipts from rents without reduction for depreciation or any other expenses.)

(b) In the case of an individual who is not 65 years of age before the close of his taxable year, only that income received from pensions or annuities under a public retirement system (one established by the Federal Government, a State, county, city, etc., but not including one established by the United States for members of the Armed Forces).

The amount of the retirement income used for the credit computation may not exceed \$1,200 reduced by:

(a) any amount received and excluded from gross income as a pension or annuity under the Social Security Act and Railroad Retirement Acts and by tax-exempt pensions or annuities. This reduction does not include that part of a pension or annuity which is excluded from gross income because it represents, in effect, a return of capital or tax-free proceeds of a like nature. Moreover, this reduction does not include amounts excluded from gross income which are received as compensation for injuries or sickness or under accident or health plans; and

(b) in the case of any individual who is not 75 before the close of the taxable year, any amount of earned income in excess of \$900 received in the taxable year.

Example: Assume that a qualified individual, who is married and over 65 but not 75, has the following items of income for 1954:

Dividend income after exclusion	\$700
Pension under the Railroad Retirement Act (entirely excludable from gross income)	500
Disability payments under a workmen's compensation act (entirely excludable from gross income)	400
Rental income (Gross)	600
Earned at odd jobs	1,200

The credit is computed as follows:

Retirement income includes—

Dividend income

Rental income

Total retirement income

\$1,300

But the retirement income is limited to

\$1,200

Less:

Railroad retirement pension

\$500

Earned income in excess of \$900 (\$1,200-\$900)

300

\$800

Base for computation of credit

\$400

Retirement income credit 20 percent of \$400

\$80

Credit For Withholding Tax.—Itemize the taxes withheld in item 2, page 1, and report the total amount as item 12A, page 1. If you have lost any Withholding Statement, ask your employer for a copy. If you cannot furnish Withholding Statements for all taxes withheld from you, attach an explanation.

Credit For F. I. C. A. Tax.—If more than \$72 of F. I. C. A. (Social Security) employee tax was withheld during 1954 because you received wages from more than one employer, the excess should be claimed as a credit against income tax. Enter any excess of F. I. C. A. tax withheld over \$72 in the "Income Tax Withheld" column of item 2, page 1, and write "F. I. C. A. tax" in the "Where Employed" column. If a joint return compute the credit separately.

Credit For Estimated Tax Payments.—If you paid any estimated tax on a Declaration of Estimated Tax (Form 1040-ES) for 1954, report the total of such payments as item 12B on page 1. If on your 1953 return you had an overpayment which you chose to apply on your 1954 tax include this in item 12B.

Balance Of Tax Or Refund.—After figuring your tax either from the Tax Table or from the long-form computation, enter the amount as item 7, page 1. Enter as item 10 the amount of your self-employment tax shown on line 35, separate Schedule C. Show as item 13 any balance you owe, or as item 14 the amount of any overpayment due you, after taking credit for the amounts entered as item 12.

TAX TABLE FOR CALENDAR YEAR 1954

FOR PERSONS WITH INCOMES UNDER \$5,000 NOT COMPUTING TAX ON PAGE 3 OF FORM 1040

Read down the shaded columns below until you find the line covering the adjusted gross income you entered in item 6, page 1, Form 1040. Then read across to the appropriate column headed by the number corresponding to the number of exemptions claimed in item 1E, page 1. Enter the tax you find there in item 7, page 1.

If total income in item 6, page 1, is—		And the number of exemptions claimed in item 1E, page 1, is—				If total income in item 6, page 1, is—		And the number of exemptions claimed in item 1E, page 1, is—

INSTRUCTIONS

Page 2

If you owned a business, or practiced a profession, you should fill in separate Schedule C on other side and enter the net profit (or loss) on line 1, Schedule C Summary, page 2, Form 1040.

Separate Schedule C should include income from (1) sale of merchandise, or products of manufacturing, mining, and construction; (2) business service; and (3) professional service. In general, you should report any income in the earning of which you have incurred expenses for material, labor, supplies, and the like. A farmer keeping his books of account on the accrual method may include the income in such schedule from the sale of products of agriculture in lieu of including such income in Form 1040F.

Item A—Business Activity.—State the general classification of business activity, as well as the principal product or service. For example, "Wholesale food," "Retail men's apparel," "Manufacture of upholstered wooden household furniture," "Transportation by truck," "Broker, real estate," "Contractor—carpenter work," "Physician," etc. Do not use such terms as "partnership," "owner," "student," etc. The "principal business activity" is the one which accounts for the largest percentage of your total receipts. All trades and businesses except those specifically excluded are subject to self-employment tax.

Item E—Employer Identification Number.—This is the number given on Form 941, Employer's Quarterly Federal Tax Return, which you file as an employer.

Item F—Business Address.—Do not use home address as business address unless business is actually conducted from home.

Line 1—Total Receipts.—You should include all income derived from your trade or business. Enter in the space provided such items as returned sales, rebates, and allowances from the sale price or service charge.

If you have dividend income from stocks held by you in the ordinary course of carrying on your trade or business, such dividends must be considered together with your dividends from stocks regularly held for investment purposes in computing your dividend exclusion and credit.

Installment Sales.—If you use the installment method of reporting income from sales, you should attach to your return a schedule showing separately for the years 1951, 1952, 1953, and 1954 the following: (a) Gross sales; (b) cost of goods sold; (c) gross profits; (d) percentage of profits to gross sales; (e) amounts collected; and (f) gross profits on amount collected.

COST OF GOODS SOLD

Lines 2-10.—If you are engaged in a trade or a business in which the production, purchase, or sale of merchandise produces income, you should take inventories of merchandise and materials on hand at the beginning and end of the taxable year in order to reflect the gross profits correctly. The usual methods of valuing inventory are (a) cost and (b) cost or market whichever is lower. The method properly adopted for the first year in which inventory is taken must be continued unless permission to change is secured from the Commissioner. Application for permission to change the method of valuing inventories must be made in writing and filed with the Commissioner within 90 days after the beginning of the taxable year in which it is desired to effect a change. You should enter the letters "C" or "C or M" immediately before the amount column if inventories are valued either at cost, or at cost or market whichever is lower.

Other methods for valuing inventories of material or merchandise are provided for dealers in securities, for farmers, for miners, for manufacturers who produce more than one product from a single process, and for retail merchants using the "retail method."

A special method based on cost, LIFO, is allowable only if you file an application on Form 970 with your return for the first year used. The requirements for adopting and using the LIFO method are set forth on Form 970. Thereafter, you should attach a separate schedule showing: (a) a summary of all inventories; (b) with respect to inventories computed under the LIFO method, the computation of quantities and cost by acquisition levels.

OTHER BUSINESS DEDUCTIONS

Line 12—Salaries and Wages.—You should enter all salaries and wages not included as "Cost of Labor" in "Cost of Goods Sold." Do not deduct any salary or wages for your own services or services of others not performed in connection with your business.

Line 13—Rent on Business Property.—Rents paid or accrued on business property in which you have no equity are deductible. Do not include rent for a building, or any part, which you occupy solely for residential purposes.

Line 14—Interest on Business Indebtedness.—Interest on business indebtedness to others is deductible. Do not include interest to yourself on capital invested in or advanced to the business.

Line 15—Taxes on Business and Business Property.—Include taxes paid or accrued on business property or incurred for carrying on your business. Federal import duties and Federal excise and stamp taxes are deductible if paid or incurred in carrying on a trade or business. Do not include taxes assessed against local benefits of a kind tending to increase the value of the property assessed, as for paving, sewers, front foot benefits, etc.

Line 16—Losses of Business Property.—You may deduct losses of business property by fire, storm, or other casualty, or theft, not compensated by insurance or otherwise and not made good by repairs claimed as a deduction. Attach a statement showing a description of the property, date acquired, cost, subsequent improvements, depreciation allowable since acquisition, insurance, salvage value, and deductible loss.

Line 17—Bad Debts Arising From Sales or Services.—Include debts, or portions thereof, arising from sales or professional services that have been included in income, which have been definitely ascertained to be worthless, or such reasonable amount as has been added to a reserve for bad debts within the taxable year. A debt previously deducted as bad which reduced your tax in a prior year, if subsequently collected, must be returned as income for the year in which collected.

Line 18—Depreciation and Obsolescence.—You may deduct a reasonable allowance for exhaustion, wear and tear, and obsolescence of property used in the trade or business. For additional information regarding depreciation, especially on new property acquired or constructed after December 31, 1953, see depreciation section in the instructions for Form 1040.

If a deduction is claimed on account of depreciation, you should fill in Schedule C-1. In case obsolescence is included, state separately amount claimed and basis upon which it is computed. The value or cost of land must not be included in this schedule, and where land and buildings were purchased for a lump sum, the cost of the building subject to depreciation must be established. The adjusted property accounts and the accumulated depreciation shown in the schedule should be reconciled with those accounts as reflected on your books.

Line 19—Repairs.—You may deduct the cost of incidental repairs, including labor, supplies, and other items, which do not add to the value or appreciably prolong the life of the property. Expenditures for new buildings, machinery, equipment, or for permanent improvements or betterments which increase the value of the property are chargeable to capital accounts. Expenditures for restoring or replacing property are not deductible, since such expenditures are chargeable to capital accounts or to depreciation reserve depending on how depreciation is charged on your books.

Line 20—Depletion of Mines, Oil and Gas Wells, Timber, Etc.—If a deduction is claimed on account of depletion, you should procure from your District Director Form M (mines and other natural deposits), Form O (oil and gas), or Form T (timber), fill in and file with return. If complete valuation data have been filed with questionnaire in previous years, then file with your return information necessary to bring depletion schedule up to date, setting forth, in full, statement of all transactions bearing on deductions from or additions to value of physical assets during the taxable year with explanation of how depletion deduction for the taxable year has been determined. (See sections 615 and 616 of the Internal Revenue Code of 1954 for election to capitalize or deduct expenditures for exploration and development of mineral properties.)

Line 21—Amortization.—If you elect the deduction with respect to the amortization of the adjusted basis of (a) any emergency facility with respect to which the Government has issued a certificate of necessity, or (b) a grain storage facility, a statement of the pertinent facts should be filed with your election. (See sections 168 and 169 of the Internal Revenue Code of 1954.)

For the election to amortize research or experimental expenditures not subject to depreciation or depletion, see section 174 of the Code.

Line 22—Other Business Deductions.—You should include all ordinary and necessary business expenses for which no space is provided in the schedule. Any deduction claimed should be explained in Schedule C-2. Do not include cost of business equipment or furniture, expenditures for replacements, or for permanent improvements to property, or personal living and family expenses.

Soil and Water Conservation Expenditures.—Taxpayers engaged in the business of farming may under certain conditions expense amounts paid for soil and water conservation. For more detailed instructions, see the instructions for Form 1040.

Net Operating Loss Deduction.—Any net operating loss deduction should be entered in Schedule C Summary, Form 1040, instead of in this schedule.

Accrual-Method Taxpayers Only.—If you have (a) receipts which constitute prepaid income, or (b) reserves for estimated expenses, see the instructions for Form 1040.

PURPOSE OF THIS FORM

Schedule C (Form 1040).—Schedule C serves two purposes. First, it provides for the determination of net profit (or loss) from business or profession to be used in computing income tax. Second, it provides for the computation of the self-employment tax in accordance with Chapter 2 of Subtitle A of the Internal Revenue Code of 1954.

INSTRUCTIONS FOR CALENDAR YEAR 1954

SELF-EMPLOYMENT TAX

In general, every individual deriving income during the taxable year from a trade or business carried on by him or from a partnership of which he is a member is subject to the self-employment tax, the computation of which is made on lines 25 through 36.

"Net earnings from self-employment" (line 31) is the gross income derived by an individual from any trade or business carried on by him, less the allowable deductions attributable to such trade or business, plus his share of self-employment net earnings (or loss) from a partnership of which he is a member.

No Deductions for Personal Exemptions.—The deductions for personal exemptions are not allowable in determining the net earnings from self-employment.

EXCLUSIONS

In determining the amount of net earnings from self-employment report on line 28 income from the following sources or deductions attributable thereto:

1. Certain professions.—Income from the performance of service as a physician, lawyer, dentist, osteopath, veterinarian, chiropractor, naturopath, optometrist, Christian Science practitioner, architect, certified public accountant, accountant registered or licensed as an accountant under State or municipal law, full-time practicing public accountant, funeral director, or professional engineer; or income from the performance of such service by a partnership;

2. Religious services.—Income from the performance of service by a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry or by a member of a religious order in the exercise of duties required by such order;

3. Farming.—Income from farming or from any other business in which, if the business were carried on exclusively by employees, the major portion of the services would constitute agricultural labor;

4. Employees and public officials.—Income from the performance of service as:

- (a) a public official, including a notary public;
- (b) an employee or employee representative under the railroad retirement system; or
- (c) an employee. "Employee" includes among others:
 - (1) an agent-driver or commission driver engaged in distributing meat, vegetable, fruit, and bakery products, beverages (other than milk), or laundry or dry-cleaning services;
 - (2) a full-time life insurance salesman;
 - (3) a home worker performing work subject to licensing requirements under State law; and
 - (4) traveling or city salesmen generally, engaged upon a full-time basis for their principals (except for sideline sales activities on behalf of another person).

Note.—The income of an employee over the age of 18 from the sale of newspapers or magazines to an ultimate consumer is subject to the self-employment tax if the income consists of retained profits from such sales.

5. Real estate rentals.—Rents from real estate, except rentals received in the course of a trade or business as a real estate dealer. Payments for the use or occupancy of rooms or other space where services are also rendered to the occupant, such as rooms in hotels, boarding houses, apartment houses furnishing hotel services, tourist camps, tourist homes, or space in parking lots, warehouses, or storage garages do not constitute rentals from real estate and therefore are included in determining net earnings from self-employment;

6. Interest and dividends.—Dividends on shares of stock, and interest on bonds, debentures, notes, certificates, or other evidences of indebtedness, issued with interest coupons or in registered form by a corporation, or by a government or political subdivision thereof, unless received in the course of a trade or business as a dealer in stocks or securities; and

Schedule C-a (Form 1040).—The lower portion of page 3, Schedule C, which is designated as Schedule C-a (Form 1040), is designed to provide the Social Security Administration with the information on self-employment income necessary for old-age and survivors insurance purposes.

7. Property gains and losses.—Gain or loss (A) from the sale or exchange of a capital asset, (B) to which sections 631 and 1231 are applicable, or (C) from the sale, exchange, involuntary conversion, or other disposition of property if such property is neither (1) stock in trade or other property of a kind which would properly be includable in inventory if on hand at the close of the taxable year, nor (2) property held primarily for sale to customers in the ordinary course of the trade or business.

Net operating losses.—In determining the net earnings from self-employment, no deduction for net operating losses of other years shall be allowed.

MORE THAN ONE TRADE OR BUSINESS

If an individual is engaged in more than one trade or business, his net earnings from self-employment are the total of his net earnings from self-employment of each trade or business carried on by him. Thus, the loss sustained in one trade or business will operate to reduce the income derived from another trade or business.

JOINT RETURNS

Where husband and wife file a joint return, page 3 of Schedule C (Form 1040) should show the name of the one with self-employment income. Where husband and wife each have self-employment income, a separate Schedule C must be attached for each. In such cases the total of amounts shown on line 24 of each separate schedule should be entered on line 1, Schedule C Summary, page 2, Form 1040, and the aggregate self-employment tax (line 36) should be entered as item 10, page 1, Form 1040.

COMMUNITY INCOME

For the purpose of computing net earnings from self-employment, if any of the income from a trade or business is community income, all the income from such trade or business is considered the income of the husband unless the wife exercises substantially all the management and control of the trade or business, in which case all of such income is considered the income of the wife.

If separate returns are filed by the husband and wife, a complete Schedule C should be attached to the return of the one with self-employment income. Community income included on such a schedule must, however, be allocated between the two returns (on line 1, Schedule C Summary, page 2, Form 1040) on the basis of the community property laws.

In computing his aggregate net earnings from self-employment, a partner should include his entire share of such earnings from a partnership. No part of that share may be attributed to the partner's wife (or husband) even though the income may, under State law, be community income.

FISCAL YEARS

For fiscal years ending after December 31, 1954, the amounts of \$3,600 appearing on lines 32 and 33, page 3, in the computation of the self-employment tax should be changed to \$4,200.

If you are a Christian Science practitioner, architect, accountant, funeral director, engineer, minister, member of a religious order, or a farmer, reporting on a fiscal year basis, consult your nearest Internal Revenue Service office for the recent changes in the law which affect your liability for self-employment tax.

SCHEDULE C-a (Form 1040)

To assure proper credit to your account, be sure to enter your name and social security account number on Schedule C-a (Form 1040) exactly as they are shown on your social security card. If you do not have a social security account number, you must get one. These account numbers are obtainable from any of the approximately 500 Social Security Administration offices throughout the country. The telephone directory or your local post office will give you the address. Do not delay filing your return beyond the due date even though you have not obtained your social security account number.

Regardless of whether a joint or separate returns on Form 1040 are filed by husband and wife, Schedule C-a (Form 1040) should show only the name of the one with the self-employment income. If both had net earnings from self-employment, a separate Schedule C-a must be filed by each.

NOTE.—In lines 18 to 25 the treatment in the case of a joint return is also applicable to a return of a surviving widow or widower.

16-70900-1

INSTRUCTIONS—(References are to the Internal Revenue Code of 1954)**GAINS AND LOSSES FROM SALES OR EXCHANGES OF PROPERTY.**—Report details in schedule on other side.

"Capital assets" defined.—The term "capital assets" means property held by the taxpayer (whether or not connected with his trade or business) but does NOT include—

- (a) stock in trade or other property of a kind properly includable in his inventory if on hand at the close of the taxable year;
- (b) property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business;
- (c) property used in the trade or business of a character which is subject to the allowance for depreciation provided in section 167;
- (d) real property used in the trade or business of the taxpayer;
- (e) certain government obligations issued on or after March 1, 1941, at a discount, payable without interest and maturing at a fixed date not exceeding one year from date of issue;
- (f) certain copyrights, literary, musical, or artistic compositions, etc.; or
- (g) accounts and notes receivable acquired in the ordinary course of trade or business for services rendered or from the sale of property referred to in (a) or (b) above.

In connection with (b) above, the law allows dealers in securities capital gain or loss treatment with respect to certain securities which were clearly identified as being held for investment. Also, in the case of a taxpayer other than a corporation, certain real property subdivided for sale may be treated as capital assets. Sections 1236 and 1237.

If the total distribution to which an employee is entitled under an employees' pension, bonus, or profit-sharing trust plan exempt from tax under section 501(a), is received by the employee in one taxable year, on account of the employee's separation from the service, the aggregate amount of such distribution, to the extent it exceeds the amounts contributed by the employee, shall be treated as a long-term capital gain. See section 402.

A capital gain dividend, as defined in section 852 (relating to tax on regulated investment companies), shall be treated by the shareholder as a long-term capital gain.

Gain on sale of depreciable property between husband and wife or between a shareholder and a "controlled corporation" shall be treated as ordinary gain. Section 1239.

A transfer (other than by gift, inheritance, or devise) by an individual "holder" of all substantial rights evidenced by a patent, or an undivided interest therein, shall be considered the sale or exchange of a capital asset held for more than 6 months.

Gains and losses from transactions described in section 1231 (see below) shall be treated as gains and losses from the sale or exchange of capital assets held for more than 6 months if the total of these gains exceeds the total of these losses. If the total of these gains does not exceed the total of these losses, such gains and losses shall not be treated as gains and losses from the sale or exchange of capital assets. Thus, in the event of a net gain, all these transactions should be entered in the "long-term capital gains and losses" portion of Schedule D. In the event of a net loss, all these transactions should be entered in the "property other than capital assets" portion of Schedule D, or in other applicable schedules on Forms 1040, 1041, or 1065.

Section 1231 deals with gains and losses arising from—

- (a) sale, exchange, or involuntary conversion, of land (including in certain cases unharvested crops sold with the land) and depreciable property if they are used in the trade or business and held for more than 6 months;
- (b) sale, exchange, or involuntary conversion of livestock held for draft, breeding, or dairy purposes (but not including poultry) and held for 1 year or more;
- (c) the cutting of timber or the disposal of timber or coal to which section 631 applies, and
- (d) the involuntary conversion of capital assets held more than 6 months.

See sections 1231 and 631 for specific conditions applicable.

Description of property listed.—State following facts: (a) For real estate (including owner-occupied residences), location and description of land and improvements; (b) for bonds or other evidences of indebtedness, name of issuing corporation, particular issue, denomination, and amount; and (c) for stocks, name of corporation, class of stock, number of shares, and capital changes affecting basis (including nontaxable distributions).

Basis.—In determining gain or loss in case of property acquired after February 28, 1913, use cost, except as specially provided. The basis of property acquired by gift after December 31, 1920, is the cost or other basis to the donor in the event of gain, but, in the event of loss, it is the lower of either such donor's basis or the fair market value on date of gift. Generally the basis of property acquired by inheritance is the fair market value at time of acquisition which usually is the date of death. For special cases involving property acquired from a decedent, see section 1014. In the case of sales and exchanges of automobiles and other property not used in

your trade or business, or not used for the production of income, the basis for determining gain is the original cost plus the cost of permanent improvements thereto. No losses are recognized for income tax purposes on the sale and exchange of such properties. In determining GAIN in case of property acquired before March 1, 1913, use the cost or the fair market value as of March 1, 1913, as adjusted, whichever is greater, but in determining LOSS use cost as adjusted.

Sale of a personal residence.—See Form 1040 instructions for special rules applicable to sale or exchange of your residence.

Losses on securities becoming worthless.—If (a) shares of stock become worthless during the year or (b) corporate securities with interest coupons or in registered form become worthless during the year, and are capital assets, the loss therefrom shall be considered as from the sale or exchange of capital assets as of the last day of such taxable year.

Nonbusiness debts.—If a debt, such as a personal loan, becomes totally worthless within the taxable year, the loss resulting therefrom shall be considered a loss from the sale or exchange, during the taxable year, of a capital asset held for not more than 6 months. Enter such loss in column (h) and describe in column (a) in the schedule of short-term capital gains and losses on other side. This does not apply to (a) a debt evidenced by a corporate security with interest coupons or in registered form and (b) a debt acquired in your trade or business.

Classification of capital gains and losses.—The phrase "short-term" applies to gains and losses from the sale or exchange of capital assets held for 6 months or less; the phrase "long-term" applies to capital assets held for more than 6 months.

Treatment of capital gains and losses.—Short-term capital gains and losses will be merged to obtain the net short-term capital gain or loss. Long-term capital gains and losses (taken into account at 100 percent) will be merged to obtain the net long-term capital gain or loss. If the net short-term capital gain exceeds the net long-term capital loss, 100 percent of such excess shall be included in income. If the net long-term capital gain exceeds the net short-term capital loss, 50 percent of such excess shall be included in income. In the case of a fiduciary, see section 1202.

Limitation on allowable capital losses.—If the sum of all the capital losses exceeds the sum of all the capital gains (all such gains and losses to be taken into account at 100 percent), then such capital losses shall be allowed as a deduction only to the extent of (1) current year capital gains plus (2) the smaller of either the taxable income of the current year (or adjusted gross income if tax table is used) or \$1,000. For this purpose taxable income is computed without regard to capital gains or losses or the deduction for exemptions. The excess of such allowable losses over the sum of items (1) and (2) above is called "capital loss carryover" (not applicable to partnerships). It may be carried forward and treated as a short-term capital loss in succeeding years. However, the capital loss carryover of each year should be kept separate, since the law limits the use of such carryover to the five succeeding years. In offsetting your capital gain and income of 1954 by prior year loss carryovers, use any capital loss carryover from 1949 before using any such carryover from 1950 or subsequent years. Any 1949 carryover which cannot be used in 1954 must be excluded in determining total loss carryover to 1955 and subsequent years.

Collapsible corporations.—Gain from the sale or exchange of stock in a collapsible corporation is not a capital gain. Section 341.

"Wash sales" losses.—Losses from the sale or other disposition of stocks or securities are not deductible (unless sustained in connection with the taxpayer's trade or business) if, within 30 days before or after the date of sale or other disposition, the taxpayer has acquired (by purchase or by an exchange upon which the entire amount of gain or loss was recognized by law) or has entered into a contract or option to acquire, substantially identical stock or securities.

Losses in transactions between certain persons.—No deduction is allowable for losses from sales or exchanges of property directly or indirectly between (a) members of a family, (b) a corporation and an individual (or a fiduciary) owning more than 50 percent of the corporation's stock (liquidations excepted), (c) a grantor and fiduciary of any trust, (d) a fiduciary and a beneficiary of the same trust, (e) a fiduciary and a fiduciary or beneficiary of another trust created by the same grantor, or (f) an individual and a tax-exempt organization controlled by the individual or his family.

ALTERNATIVE TAX.—If the net long-term capital gain exceeds the net short-term capital loss, or in the case of only a long-term capital gain, individual taxpayers (a) filing separate returns with taxable income exceeding \$18,000, or (b) filing joint returns or as surviving widows or widowers with taxable income exceeding \$36,000, or (c) filing as head of household with taxable income exceeding \$24,000, will usually find it to their advantage to compute the alternative tax on the other side. The alternative tax, if less than the tax computed on page 3 of Form 1040, shall be the tax liability.

INSTRUCTIONS

Page 4

METHOD OF ACCOUNTING

Farmers may compute their income either on the cash receipts and disbursements method or the accrual method, but whichever method is adopted in filing their first return must be followed until the consent of the Commissioner is received to change the method.

CASH RECEIPTS AND DISBURSEMENTS METHOD

A farmer reporting on the basis of cash receipts and disbursements shall include in his gross income for the taxable year (1) the amount of cash or the value of merchandise or other property received from the sale of livestock and produce which were raised during the taxable year or prior years, (2) the profits from the sale of any livestock or other items which were purchased, and (3) gross income from all other sources. The farm expenses will be the actual amounts paid out during the taxable year.

ACCURAL METHOD

For a farmer reporting on the accrual method, the gross profits are obtained as indicated in summary of income and deductions on page 3 of this form. The farm expenses will be the actual expenses incurred during the year, whether paid or not.

Farmers who compute income on an accrual method and use inventories, may value their inventories according to the "farm-price method," which provides for the valuation of inventories at market price less direct cost of disposition. If the use of the "farm-price method" of valuing inventories for any taxable year involves a change in method of valuing inventories from that employed in prior years, permission for such change shall first be secured from the Commissioner. Farmers raising livestock may value their inventories of animals according to either the "farm-price method" or the "unit livestock price method."

INCOME

All the farm income from whatever source must be reported in this schedule. Anything of value received instead of cash, such as groceries received in exchange for produce, must be treated as income to the extent of its market value.

The value of farm produce consumed by the farmer and his family need not be reported as income; but expenses incurred in raising such produce must not be claimed as deductions.

Recoveries for hail and fire insurance on growing crops should be included in gross income.

Rents received in crop shares shall be reported in income in the year in which the crop shares are reduced to money or the equivalent of money.

A taxpayer electing to include in gross income amounts received during the year as loans from Commodity Credit Corporation should file with his return a statement showing details of such loans. (See section 77 of the Internal Revenue Code of 1954.)

Report gains and losses from sales or exchanges of capital assets and other property in separate Schedule D (Form 1040).

The term "farm" embraces the farm in the ordinarily accepted sense, and includes stock, dairy, poultry, fruit, truck farms, and all land used for farming operations. A person cultivating or operating a farm for recreation or pleasure, the result of which is a continual loss from year to year, is not regarded as a farmer.

EXPENSES AND OTHER DEDUCTIONS

In general, a farmer who operates a farm for profit is entitled to deduct from gross income as necessary expenses all amounts actually expended in carrying on the business of farming, except those which represent capital investment. The following is a list of such expenses (taken from the classification appearing on page 2 of this form though any other equally descriptive classification may be used):

Labor hired.—Amounts paid for regular farm labor, piece work, contract labor, and other forms of hired labor. Do not deduct the value of your own labor or that of your wife. Only that part of the board which is purchased for hired labor should be deducted. The value of products furnished by the farm and used in the board of hired labor is not deductible. Rations purchased for laborers or share-croppers are deductible. Do not deduct amounts paid to persons engaged in household work, except to the extent that the services of such persons are used in boarding and otherwise caring for farm laborers. Services of such employees engaged in caring for the farmer's own household are not deductible.

Feed purchased.—Cost of grain, hay, silage, mill feeds, other concentrates and roughages purchased, and amounts paid for grinding, mixing, and processing of feed.

Machine hire.—Amounts paid for threshing, combining, silo filling, baling, ginning, and other machine hire.

Supplies purchased.—Cost of twine, spray material, poisons, disinfectant, cans, barrels, baskets, egg cases, bags, and other similar farm supplies purchased.

Cost of repairs and maintenance.—Amounts expended for repairs and maintenance of farm buildings (except your dwelling), fences, drains, and other farm improvements, and for repairs and maintenance of farm machinery and equipment; cost of small tools of short life such as shovels, rakes, etc. Amounts expended for replacements of, or additions to, farm machinery, farm buildings, or other farm equipment of a permanent nature are not deductible.

Fertilizers and lime.—Cost of commercial fertilizers, lime, and manure purchased during the year, the benefit of which is of short duration.

Taxes.—State and local taxes. Do not deduct Federal income taxes; estate, inheritance, legacy, succession, and gift taxes; nor taxes assessed for any improvement or betterment tending to increase the value of the property assessed. Do not deduct taxes on your dwelling or household property and other personal taxes.

Insurance.—Cost of all insurance on farm buildings (except your dwelling) and improvements, equipment, crops, and livestock.

Interest on farm notes and mortgages.—Interest paid on farm mortgages and other obligations incurred to carry on farming.

Water rent, electricity, and telephone.—The farm share of these expenditures. Do not deduct personal expenses.

Rent of farm, part of farm, or pasture.—Rent paid in cash. A tenant farmer paying rent to his landlord in the form of crops raised on the farm (under a cropshare agreement) may not deduct as rent the value of the crop given to the landlord, but the tenant may deduct all amounts paid by him in raising the crop.

Automobile upkeep.—For automobiles used exclusively in farm operations, all expenses of operation, repair, and depreciation. For automobiles used both for farm and for personal transportation, only that part of the expense corresponding to the farm use may be deducted.

Soil and water conservation expenses.—See instructions to Form 1040 for explanation of these expenses.

Other farm expenses.—Fees paid for advertising farm products; expenditures for stamps, stationery, account books, and other office supplies purchased for farm use; expenditures for travel in connection with the farm and similar expenditures. Amounts expended for purchase of automobiles, farm machinery, farm buildings, or other farm equipment of a permanent nature are not deductible.

Depreciation.—Allowance for depreciation of buildings, improvements, machinery, or other farm equipment of a permanent nature. In computing depreciation do not include the value of farm land nor the land on which farm buildings are located. Do not deduct repairs or depreciation on the dwelling you occupy or on your personal or household equipment. Do not claim as a separate item depreciation on livestock or any other property included in your inventory. Depreciation, however, may be claimed on livestock acquired for work, breeding, or dairy purposes which are not included in your inventory of livestock purchased or raised for sale. See the instructions to Form 1040 for methods of computing depreciation.

Losses.—Losses of farm buildings, machinery, and other farm property not included in your inventory, resulting from fire, storm, or other casualty and not compensated for by insurance or otherwise. Losses of property included in your inventory are taken care of by the reduced amount of the inventory at the close of the year. The total loss of a prospective crop by frost, storm, flood, or fire, is not deductible. When reporting on the cash basis, the value of animals raised by you and lost by death is not deductible, while in the case of animals purchased and lost by death, the cost less depreciation allowed or allowable is deductible.

Amortization.—If you elect the deduction with respect to the amortization of the adjusted basis of a grain storage facility, a statement of the pertinent facts should be filed with your election. (See section 169 of the Internal Revenue Code of 1954.)

Net operating loss deductions.—Every farmer claiming a net operating loss deduction shall file with his return a concise statement setting forth the amount of the net operating loss deduction claimed and all material facts. The deduction should be entered in Schedule C Summary, Form 1040, instead of on Form 1040F.

Fiscal year farmers.—If you report income on a fiscal year basis and your year ends after December 31, 1954, consult your local Internal Revenue Service office for the recent changes in the law which affect your liability for self-employment tax.

Read instructions carefully. Complete both sides of form. Please print.		U. S. INDIVIDUAL INCOME TAX RETURN																																		
		If you use this form, the Internal Revenue Service will compute your tax.

15. Enter total number of exemptions listed in items 13 and 14 above.		

FOR EMPLOYEES EARNING LESS THAN \$5,000

The enclosed card, Form 1040A, offers a simple way for employees receiving less than \$5,000 total income to file their 1954 U. S. income tax returns.

To use this form:

- 1 Read instructions below. Be sure you qualify. If you don't, obtain and file a Form 1040.
- 2 Fill out the copy on other side for your records.
- 3 Transfer answers from your copy to card.
- 4 Sign the card and mail it, together with your withholding statements (Forms W-2), to your District Director in the envelope provided. The Internal Revenue Service will figure your tax and send you a check for any refund due you or a bill for any amount you owe.

NOTE *{The tax table shown below is only for your information. You do not use this table in preparing Form 1040A. The Internal Revenue Service will use the table to figure your tax. The table allows you about 10% of your income as deductions. This 10% allowance takes the place of deductions which are allowed only if you itemize your deductions on Form 1040, such as the deductions for charitable contributions, interest, taxes, losses, medical expenses, miscellaneous items, and the new deduction for child care expenses. If your deductions exceed 10% of your income, it will be to your advantage to use Form 1040 and itemize them.}*

GENERAL INSTRUCTIONS

Who Must File.—Every citizen or resident of the United States under 65 who had \$600 (\$1,200 if 65 or over) or more gross income.

Who May Use U. S. Individual Income Tax Return, Form 1040A.—If your total gross income was less than \$5,000 and consisted entirely of wages reported on Withholding Statements (Forms W-2) and not more than \$100 total of other wages, dividends, and interest, you may use this form. A husband and wife may file a joint return if their combined incomes do not exceed these limits. If you had income from any other sources, you may not use this form but must file your return on Form 1040. Likewise, Form 1040 must be used (1) in making a separate return of a married person domiciled in a community property State, (2) if husband or wife itemizes deductions, (3) if you claim the status of head of household or surviving widow or widower, or (4) if you wish to claim credit for dividends received or retirement income.

When to File.—On or after January 1, 1955, but not later than April 15, 1955.

Where to File.—With the District Director of Internal Revenue for your district.

Where to Get Forms.—If you need a Form 1040 you can get one from any Internal Revenue office, and from most banks and post offices. Your employer will furnish you with a Withholding Statement.

Married Couple—Advantage of Joint Return.—A husband and wife may make a joint return even though one has no income. To assure any benefits of the split-income provisions, they should file a joint return. Both husband and wife must sign a joint return. A joint return on Form 1040A never results in more tax than separate returns.

Sick Pay Exclusion.—If an employer continues to pay wages to an employee under a wage continuation plan while the employee is absent from work due to injury or sickness, such payments may be excluded from the employee's income, but only to the extent they do not exceed a weekly rate of \$100. However, the exclusion does not apply to the first seven calendar days of an absence due to sickness unless the employee is hospitalized for at least one day during the period of sickness.

INSTRUCTIONS FOR FRONT OF FORM 1040A

Item 7.—Enter your social security number and your wife's (husband's) social security number, if any, even though she (he) files a separate return.

Items 8 and 9.—Enter the total amount of your wages subject to income tax and the total amount of income tax withheld as shown on your Withholding Statements, Forms W-2.

Item 10.—Enter all other taxable income from wages, dividends, or interest. Exclude dividends received from corporations in the United States up to \$50. This exclusion does not apply to dividends received from mutual savings banks or building and loan associations. If joint return and both husband and wife had dividend income, each is entitled to a \$50 exclusion provided it is applied against his individual dividend income. If the sum of items 10 (a) and 10 (b) exceeds \$100, you must file a Form 1040.

Item 11.—If more than \$72 of F.I.C.A. (Social Security) employee tax was withheld during 1954 because you worked for more than one employer, enter the excess, and it will be credited against your income tax. Figure separately for husband and wife.

Item 12.—See "Sick Pay Exclusion" in general instructions. If you received such payments and your employer has not excluded them from the amount of wages shown on your withholding statement (Form W-2), enter your exclusion here. Enclose a statement showing your computation and your name and address.

Item showing your computation and your name and address.

Items 8(b) to 12(b).—Complete these items only if this is a joint return. The signatures of both taxpayer and his wife (or husband) are required on joint returns.

FRONT

**Read instructions carefully.
Complete both sides of form.
Please print.**

U. S. INDIVIDUAL INCOME TAX RETURN

If you use this form, the Internal Revenue Service will compute your tax.
